Description

The RWY series dc/dc converters are designed for use on Rail Rolling Stock and for many extremely harsh environments.

They are fully potted with a thermally conductive MIL-Spec silicon compound, meeting a high level of shock and vibration.

The table below illustrate the most common output voltages, but can also be manufactured to special input & output specifications with total flexibility to match customer requirements.

Model	Output	Power W
RWY40	12V and 24V are standard Other outputs upon request	40W
RWY60		60W

Final part numbers will be factory allocated to reflect customer input & output requirements.
