

**CONNECT AND PROTECT**

# Grounding, Bonding and nVent ERICO Cadweld

Solutions Guide

  
nvent

**ERICO**

#### Introduction

nVent Engineered Electrical & Fastening Solutions is a leading global manufacturer and marketer of superior engineered products for niche electrical, mechanical and concrete applications. These nVent products are sold globally under a variety of market-leading brands: nVent ERICO welded electrical connections, facility electrical protection, and rail and industrial products; nVent CADDY fixing, fastening and support products; nVent ERIFLEX low voltage power and grounding connections; and nVent LENTON engineered systems for concrete reinforcement.

For more information please visit [nVent.com/ERICO](http://nVent.com/ERICO).

#### WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials. Instruction sheets are available at [nVent.com/ERICO](http://nVent.com/ERICO) and from your nVent customer service representative. Improper installation, misuse, misapplication or other failure to completely follow nVent's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.

# Facility Electrical Protection for the 21st Century

Lightning strikes and the dangerous over-voltage surges caused by lightning and man-made events represent a direct threat to people, buildings and sensitive electronic equipment.

Today, the consequences of an unexpected lightning strike or power surge can be catastrophic for a company. Proper protection can save thousands of dollars in damage, operational downtime and lost business opportunities.

## TOTAL FACILITY PROTECTION

The consequences of an unexpected lightning strike or power surge can be catastrophic for a facility:

- Personnel are at risk.
- Critical equipment may be damaged or destroyed.
- Data can be corrupted.
- The costs of operational downtime and lost revenue can be very substantial.

As industries become more dependent on increasingly sensitive equipment, proper protection from lightning and dangerous over-voltage transients is necessary.

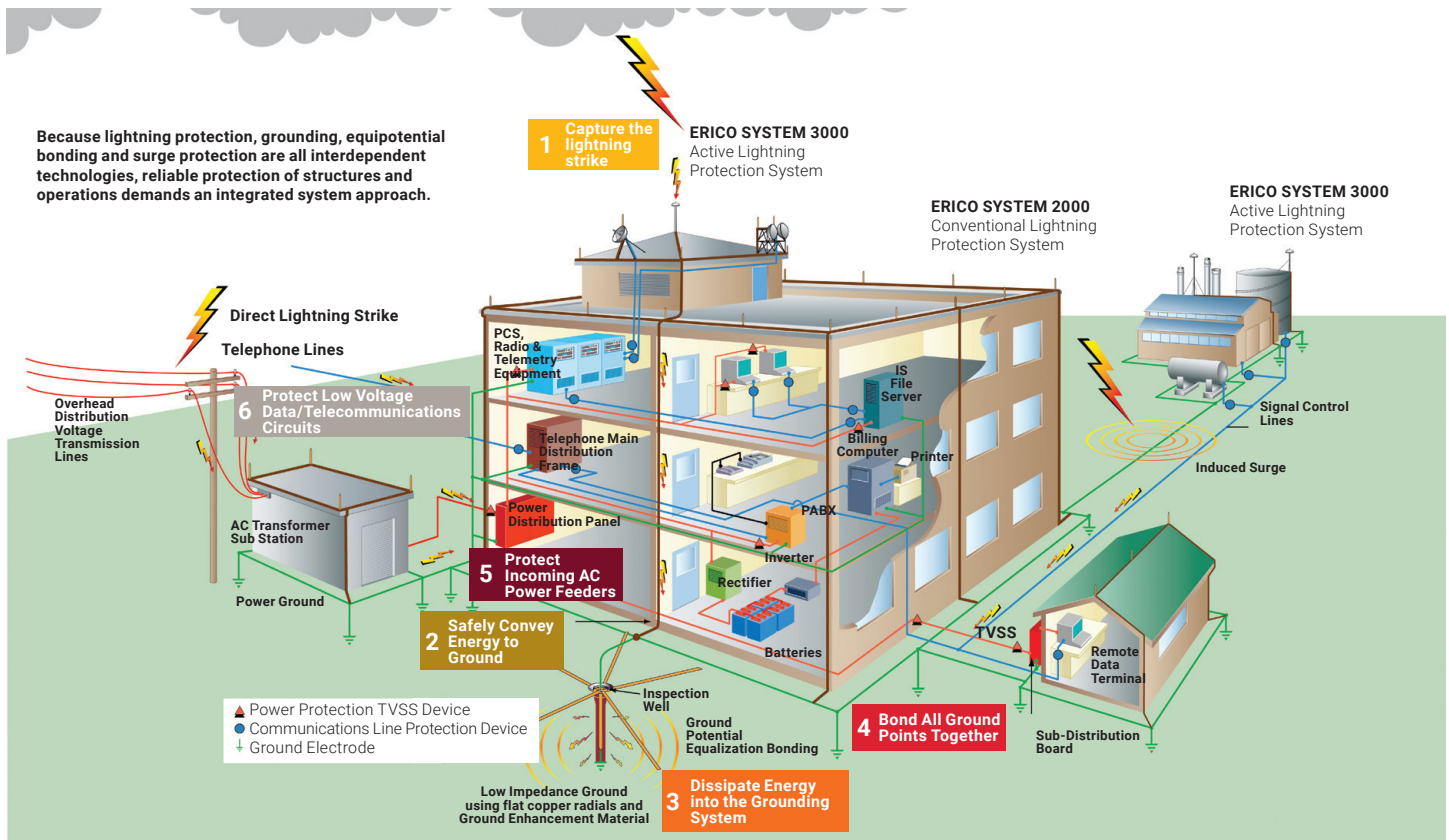

With over 60 years of research, testing and product development, nVent ERICO has acknowledged that no single technology can totally eliminate vulnerability to lightning and surges.

The nVent ERICO Six Point Plan of Protection is designed to provide total facility protection by integrating several concepts. The Six Point Plan will minimize the risk of damage to facilities through:

- Direct Strike Protection
- Grounding and Bonding
- Surge and Over-voltage Transient Protection

## THE SIX POINT PLAN OF PROTECTION

- 1 Capture the lightning strike.**  
Capture the lightning strike to a known and preferred attachment point using a purpose-designed air terminal system.
- 2 Convey this energy to ground.**  
Conduct the energy to the ground via a purpose-designed downconductor.
- 3 Dissipate energy into the grounding system.**  
Dissipate energy into a low impedance grounding system.
- 4 Bond all ground points together.**  
Bond all ground points to eliminate ground loops and create an equipotential plane.
- 5 Protect incoming AC power feeders.**  
Protect equipment from surges and transients on incoming power lines to prevent equipment damage and costly operational downtime.
- 6 Protect low voltage data/telecommunications circuits.**  
Protect equipment from surges and transients on incoming telecommunications and signal lines to prevent equipment damage and costly operational downtime.

nVent ERICO is a leading global designer, manufacturer and marketer of precision-engineered specialty metal products serving niche markets in a diverse range of electrical, construction, utility and rail applications. The company is headquartered in Solon, Ohio, USA with a network of sales locations serving more than 25 countries and with manufacturing and distribution facilities

worldwide. nVent ERICO's well-known brand names include: nVent CADDY electrical and mechanical fixings, fasteners and supports; Cadweld welded electrical connections; surge protection devices; rail and industrial products; ERIFLEX low voltage power distribution; facility electrical protection; and nVent LENTON concrete products. Visit nVent ERICO online at [nVent.com/ERICO](http://nVent.com/ERICO).

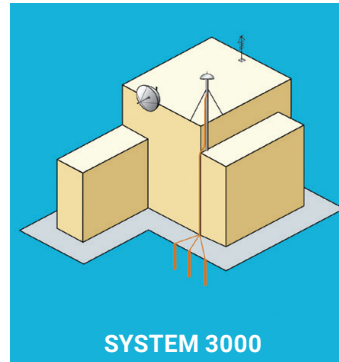

# Facility Electrical Protection for the 21st Century

## DIRECT STRIKE PROTECTION

nVent ERICO's innovative technology provides two systems for capturing lightning energy. The nVent ERICO System 2000 provides conventional air terminal technology to meet traditional needs.

An alternative approach to lightning protection is the nVent ERICO System 3000, which utilizes the collection volume principle to determine the effective placement of lightning protection to ensure the safe conveyance and dissipation of the lightning energy into the ground.

Over 7000 facilities, including some of the tallest and most vulnerable buildings in the world, are protected by System 3000.

- Well known technology of passive rods or air terminals, familiar to installers
- Air terminals available in aluminum, copper and stainless
- IEC®, B.S., and U.S. Standard Compliant
- Precision manufacturing helps ensure easy assembly and installation
- Computer-aided design to IEC62305, NFPA®-780, AS/NZS1768

- Advanced lightning protection system based on latest lightning research and technology
- Enhanced area of protection, fewer air terminals needed
- Economical and easy to install
- Fewer downconductors are required
- Designed to protect all types of structures and "open areas"
- Computer-aided design using Collection Volume method

## GROUNDING AND BONDING

For the efficient performance of a lightning protection system, it is essential that a low impedance ground be provided to facilitate the dissipation of the lightning energy into the earth mass.

Because soil conditions and seasonal patterns vary from site to site, the methods of grounding need to be considered on an individual basis.

As a grounding specialist, nVent ERICO provides a range of grounding systems to suit any application.

### NVENT ERICO CADWELD PLUS

Connections are often the most critical element of grounding systems, so the preferred method of connection is the Cadweld exothermic welding process.

nVent ERICO offers a variety of products, such as ground bars, signal reference grids, ground plates and potential equalization clamps, which are designed to create an equipotential plane and help protect personnel and valuable equipment. Cadweld copper-bonded or stainless steel earth rods and GEM facilitate the transfer of surges and fault currents into the earth, and provide a very long service life due to superior construction and quality.

# Grounding Principles

## INTRODUCTION

Grounding and bonding are an integral part of any modern electrical protection system design. An effective, low-impedance ground system is a key element of this system.

It is crucial to help provide personnel safety, as well as reliable protection for vital equipment and to minimize interruptions of service and costly downtime.

With over a century of experience in the design and manufacture of bonding and grounding products, nVent ERICO, a single source provider, offers what we believe is the best range of long lasting and cost-effective grounding products available.

Soil conditions and seasonal patterns vary from site to site, the methods of grounding need to be considered on an individual basis.

## BASIC DEFINITIONS

**Ground:** A conducting connection, whether intentional or accidental, between an electrical circuit or equipment and the earth, or to some conducting body that serves in place of the earth.

**Earth:** The conductive mass of the earth, whose electric potential at any point is conventionally taken as equal to zero. (In some countries the term "ground" is used instead of "earth.")

**Bonding:** The permanent joining of metallic parts to form an electrically conductive path that will ensure electrical continuity and the capacity to conduct any current likely to be imposed.

## THE NEED TO GROUND!

There are important reasons why a grounding system should be installed.

1. The most important reason is to help protect people!
2. To help provide protection of structures and equipment from unintentional contact with live conductors.
3. To help support maximum safety from electrical system faults and lightning.

It is a fundamental fact that electricity ALWAYS flows to the point of lowest potential. The task is to help ensure that electricity, including faults, lightning and electronic noise, flows to this point with maximum safety to people, while maintaining the reliability of equipment. Therefore we must help ensure the safe, controlled flow of electricity with minimum voltage drop to earth in all cases.

## GROUNDING CODES AND STANDARDS

Grounding needs vary according to function. The grounding requirements of a power system will vary from those of electrical equipment, lightning protection or for the proper function of electronic equipment.

Proper installation of appropriate grounding systems requires knowledge of the needs and layout of the facility. Soil characteristics, grounding conductor materials grounding connections and terminations, are significant factors determining the design of a grounding system. Applicable standards and codes must be applied.

While many codes and standards contain minimum grounding and bonding requirements, the design and installation of electrical grounding systems is one of the most important aspects of any electrical distribution system. However, codes and standards are often misunderstood and grounding systems subsequently installed improperly.

# Grounding Principles

## WHY IS GOOD GROUNDING IMPORTANT?

The transient nature of lightning with its associated fast rise times and large magnitude currents mean that special consideration needs to be given to grounding, for lightning protection to be effective. Many factors such as soil resistivity variations, installation accessibility, layout and existing physical features are all site specific and tend to affect decisions on grounding methods employed. The primary aim of a direct strike grounding system is to:

- Efficiently dissipate lightning energy into the ground
- Help protect equipment and personnel

## GROUNDING PRINCIPLES

Low impedance is the key to lightning protection. All grounding connections should be as short and direct as possible to minimize inductance and reduce peak voltages induced in the connections. The ground electrode system must efficiently couple lightning surges into the ground by maximizing capacitive coupling to the soil. The resistance of the ground itself to lightning currents must also be minimized. Only when all these factors are taken into account will maximum lightning protection be achieved.

## GROUND IMPEDANCE

Soil resistivity is an important design consideration. It varies markedly for different soil types, moisture content and temperatures and gives rise to variations in ground impedances.

## SHORT, DIRECT GROUND CONNECTIONS

The voltage generated by a lightning discharge depends primarily on the risetime of the current and the impedance (primarily inductance) of the path to ground. Extremely fast rise times result in significant voltage rises due to any series inductance resulting from long, indirect paths, or sharp bends in the routing of ground conductors. This is why short, direct ground connections are important.

## COUPLING FROM THE ELECTRODE SYSTEM TO THE GROUND

The efficiency of a ground electrode system in coupling a lightning current to ground is dependent on a number of factors, including the geometry of the ground electrode system, the shape of the conductors and the effective coupling into the soil.

A typical grounding system.

# Grounding Principles

**Figure 1-B** illustrates current flow from the injection point of a single ground electrode. As current flows out from the central injection point, a voltage gradient on the ground surface around the electrode is produced. This gradient levels off to a plateau at some distance from the electrode, as seen in Figure 1-A. The impedance seen by the current is determined by the soil particles in direct contact with the surface of the rod, and by the general impedance of the soil.

- **Good electrical conductivity**
- **Conductors capable of withstanding available electrical fault currents**
- **Long life — at least 40 years**
- **Low ground resistance and impedance**

The basic philosophy of any grounding installation should be an attempt to maximize the surface area of electrodes or conductors with the surrounding soil. Not only does this help to lower the earth resistance of the grounding system, but it also greatly improves the impedance of the grounding system under lightning surge conditions.

## • Equipotential bonding

Equipotential bonding helps ensure that hazardous potential differences do not occur between different incoming conductors such as metallic water services, power systems, telecommunication systems and the local ground, and also minimizes step and touch potentials.

## • Good corrosion resistance

The ground electrode system should be corrosion resistant, and compatible with other conductors that are buried and bonded to the ground system. Copper is by far the most common material used for grounding conductors. In general, some form of maintenance or inspection procedure should be adopted to ensure the long-term effectiveness of a grounding system.

## • Electrically and mechanically robust and reliable

Mechanical coupling can be used to join ground conductors, but suffers from corrosion effects when dissimilar metals are involved. As well as mechanical strength, Cadweld connections provide excellent low impedance, long life electrical connections with excellent corrosion resistance.

## Ground Resistance

When current flows from a ground electrode into the surrounding soil, it is often described as flowing through a series of concentric shells of increasing diameter.

Each successive shell has a greater area for current flow and consequently, lower resistance. At some point distant from the earth conductor the current dissipation becomes so large and current density so small, that the resistance is negligible.

In theory, the ground resistance may be derived from the general formula:

$$R = \rho \frac{L}{A} \text{ Resistance} = \text{Resistivity} \times \frac{\text{Length}}{\text{Area}}$$

This formula illustrates why the shells of concentric earth decrease in resistance the farther they are from the ground rod:

$$R = \text{Resistivity of Soil} \times \frac{\text{Thickness of Shell}}{\text{Area}}$$

In the case of ground resistance, uniform earth (or soil) resistivity throughout the volume is assumed, although this is seldom the case in nature. The equations for systems of electrodes are very complex and often expressed only as approximations. The most commonly used formula for single ground electrode systems, developed by Professor H.R. Dwight of the Massachusetts Institute of Technology, is the following:

$$R = \rho \frac{1}{2\pi L} \left\{ \ln \frac{4L}{r} - 1 \right\}$$

R = resistance in ohms of the ground rod to the earth (or soil)

L = grounding electrode length

r = grounding electrode radius

$\rho$  = average resistivity in ohms-cm.

# Grounding Principles

## CONDITIONS INFLUENCING SOIL RESISTIVITY

The resistance of the earth itself (soil resistivity) can significantly impact the overall impedance of the grounding system. Several factors, such as soil composition, moisture content, mineral content, contaminants, etc., determine the overall resistivity of the earth.

SOIL TYPE	Resistivity ohm-cm		
	Average	Min.	Max.
Fills – ashes, cinders, brine wastes	2,370	590	7,000
Clay, shale, gumbo, loam	4,060	340	16,300
Clay, shale, gumbo, loam with varying proportions of sand and gravel	15,800	1,020	135,000
Gravel, sand, stones, with little clay or loam	94,000	59,000	458,000

U.S. Bureau of Standards Technical Report 108

## SOIL RESISTIVITY TESTING

To properly design a grounding system, it is essential to test soil resistivity. Several methods can be used to measure earth resistivity: the four-point method, the variation in-depth method (three-point method) and the two-point method. The most accurate method and the one that nVent ERICO recommends is the four-point method.

Sphere of Influence - electrical current flows from the ground rod into surrounding soil and progressively dissipates in waves of increasing diameter.

## THE FOUR-POINT METHOD

1. Four test stakes are positioned in a straight line an equal distance apart and are hammered into the ground to be surveyed to a depth of not more than 1/20 the distance between the adjacent stakes.
2. An earth resistance tester is connected to these four stakes as shown in Figure 2.
3. The DC test option on the tester is then selected and performed, and the resistance figure "R" recorded.
4. The soil resistivity level "r" (in ohms/cm) is then calculated using the formula:  $r = 2\rho aR$  where:

R = the resistance figure, in ohms

a = the separation of the test stakes, in meters.

$$\rho = \frac{4\pi AR}{\frac{1 + 2A}{\sqrt{A^2 + 4B^2}} - \frac{2A}{\sqrt{A^2 + 4B^2}}}$$

Where:

A = distance between the electrodes in centimeters

B = electrode depth in centimeters

If  $A > 20 B$ , the formula becomes:

$$\rho = 2\pi AR \text{ (with A in cm)}$$

$$\rho = 191.5 AR \text{ (with A in feet)}$$

$$\rho = \text{Soil resistivity (ohm-cm)}$$

This value is average resistivity of the ground at a depth equivalent to the distance "A" between two electrodes.

# Grounding Principles

Avoid hazardous Step and Touch Potentials (shock) or even death by low impedance grounding and bonding between metallic equipment, chassis, piping, and other conductive objects so that currents, due to faults or lightning, do not result in hazardous voltage rise.

## STEP AND TOUCH POTENTIAL

### Step Potential

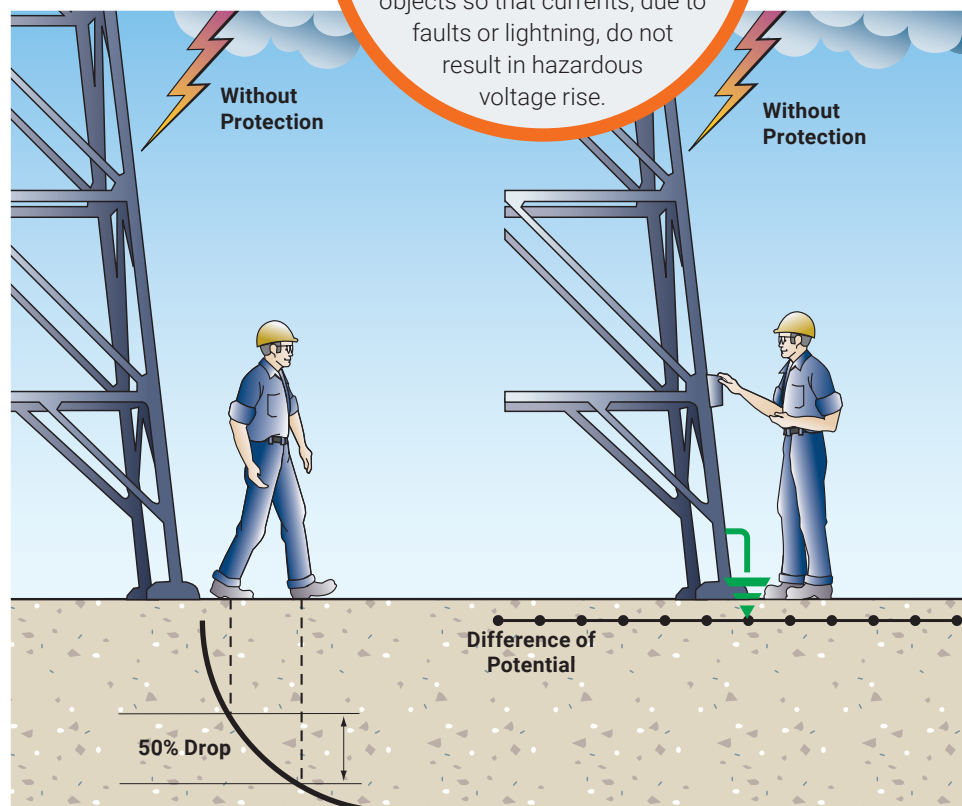

Step Potential is the voltage difference between a person's feet caused by the dissipation gradient of a fault entering the earth.

### Touch Potential

Touch Potential is similar to "Step Potential" except that the fault current passes through the person's arm and torso on the way to the ground.

Another function of the grounding system is to provide a reference for circuit conductors to stabilize their voltage to ground during normal operation. The earth itself is not essential to provide a reference function; another suitable inductive body may be used instead.

The function of a grounding electrode system and a ground terminal is to provide a system of conductors, which ensures electrical contact with the earth.

# Grounding Principles

## **GROUNDING / EARTHING SYSTEM DESIGN**

Grounding systems are important. It is not expensive to build an appropriate ground system during initial construction of a facility, but it can be very expensive to add to it, enhance it, or replace it after the facility is complete. Care should be taken to design a system that is appropriate both for clearing ground faults and dissipating lightning energy. The system must have a long performance life, meet applicable codes / standards for safety, and have sufficient bonding points to make it easy to add new equipment / facility grounding to it easily.

### **Design considerations include:**

- Purpose of facility
- Design life of facility
- Soil resistivity at 3 depths
- Corrosive nature of soil
- Shape and available area of facility site
- Existing structures and their grounding systems
- Seasonal variations in moisture and temperature for facility site
- Public access & personnel use
- Adjacent facilities and electrical systems
- Future uses, additions, equipment for facility

For proper operation of overcurrent devices, it is important to have a low DC ohmic resistance to remote earth. In many instances, this is best achieved by installing a deep ground electrode on site. It should be driven deep enough to reach the permanent water table.

For dissipation of direct or indirect lightning currents, it is better to have many horizontal ground conductors in the soil, preferably in a radial array. This provides a low impedance path of dissipation to the high frequency component of the lightning energy.

For personnel, particularly where people congregate or where equipment operators will be located, it is important to have a grid system or other equipotential plane to reduce "step potential" and have equipment and metal structures bonded to the ground system to reduce "touch potential".

A proper facility grounding system incorporates these necessities in the most cost-effective manner that will last for the design life of the facility.

nVent ERICO is a manufacturer and marketer of grounding, bonding, lightning protection and surge protection products and systems. nVent ERICO has many knowledgeable and experienced engineers on staff with the training and the tools (including some of the latest design software) to design appropriate grounding systems. These engineers can assist facility owners, engineers and contractors in designing the most appropriate system for the facility in question.

### **Grounding Chain**

1. Grounding Electrode Conductor
2. Grounding Connections
3. Grounding Electrode
4. Electrode to Soil Resistance
5. Soil

# Grounding Principles

## THE GROUNDING CHAIN

The performance of the grounding system is determined by the quality of the following five components all of which are of equal importance.

1. **The Grounding Electrode Conductor.** Typically made from copper or copper-bonded steel, the grounding electrode conductor must be large enough to withstand the maximum available fault current over the maximum clearing time.
2. **The Grounding Connections.** Often overlooked, the grounding connections are used to tie the elements of the electrode system together. Exothermically welded connections provide a molecular bond that will never loosen or corrode. Mechanical connectors, such as crimp, bolted, and wedge type, rely on physical point-to-point surface contact to maintain the integrity of the electrical connection. IEEE® Standard 837-2014 provides detailed information on the application and testing of permanent grounding connections. nVent ERICO can provide an independent, third-party test report evaluating the performance of these connectors in accordance with the testing procedures set forth in IEEE Standard 837-2014 Standard for Qualifying Permanent Substation Grounding Connections.
3. **The Grounding Electrode.** The grounding electrode provides the physical connection to the earth and is the instrument used to dissipate current into it. There are two main types of electrodes. "Natural" electrodes are intrinsic to the facility and include metal underground water pipe, the metal frame of the building (if effectively grounded), and reinforcing bar in concrete foundations. "Made" electrodes are installed specifically to improve the performance of the ground system and include wire meshes, metallic plates, buried copper conductor and rods or pipes driven into the ground. The ground rod is the most widely used electrode.
4. **Electrode to Soil Resistance.** Amount of rod surface and rod replacement are the controlling factors. Doubling diameter reduces resistance by only 10% and is not cost effective. Doubling rod length, however, theoretically reduces resistance by 40%. The most common solution is proper placement of multiple rods that are driven to the required depths.
5. **The Soil.** The soil resistivity, measured in ohm-centimeters or ohm-meters, plays a significant role in determining the overall performance of the grounding system and must be known before a proper grounding system can be engineered. Measuring soil resistivity allows the design engineer to locate an area with the most conductive soil and to determine the depth of the conductive soil so that electrodes can be placed accordingly.

The grounding system will carry little or no current for long periods of time until a fault occurs or a lightning strike or other transient requires dissipation. At that point, the grounding system components will be expected to perform like new while conducting large amounts of current. Most of the grounding system is concealed below grade, making inspection of the grounding components difficult or impossible. The underground environment is a harsh one. The initial selection of the components used in the grounding system is of critical importance to its long-term effectiveness.

# Ground System Components

## GROUND ELECTRODES

The ground electrode is a critical component of the grounding system. Many different types of electrodes are available, some "natural" and some "made". The natural types include metal underground water pipe, the metal frame of a building (if effectively grounded), a copper wire or reinforcing bar in a concrete foundation or underground structures or systems. Consideration should be given to bonding of natural earths to ensure electrical continuity with a facility's other "earths".

"Made" electrodes are specifically installed to improve the system grounding or earthing. These earth electrodes must ideally penetrate into the moisture level below the ground level to reduce resistance. They must also consist of metal conductors (or a combination of metal conductor types), which do not corrode excessively for the period of time they are expected to serve. Made electrodes include rods or pipes driven into the earth, metallic plates buried in the earth or a copper wire ring encircling the structure. Underground gas piping or aluminum electrodes are NOT permitted for use as ground electrodes.

## GROUND RODS - WHICH GROUND ROD SHOULD BE USED?

Ground rods are often selected on the basis of their resistance to corrosion. The other major factor is cost. All too often, the cost of a product is seen as the initial up front price, but the real cost is determined by the serviceable life of the ground rod.

Galvanized steel rods are one of the cheapest electrodes available. However, they are not the most cost effective since they have a relatively short service life. Solid copper and stainless steel rods have a long service life. However, they are considerably more expensive than galvanized steel rods. In addition to this, solid copper rods are not suited to deep driving or even driving short lengths into hard ground, without bending.

Ask for the nVent ERICO White Paper on Ground Rods – Copper-bonded vs. Galvanized.

The photo shows two ground rods subjected to the same pressure load test. The nVent ERICO copper-bonded ground rod, shown on the left, will bend without tears, cracks or folds, to the outer sheath. The inferior copperclad rod shown on the right, has developed cracks and creases to the outer sheath, which will significantly reduce its serviceable life and put the integrity of the entire electrode at risk.

Copper-Bonded Ground Rod	Galvanized Ground Rod
--------------------------	-----------------------

• **Cost-effective long service life**

- Copper-bonded coating:**
- Permanent molecular bond
  - Low resistance performance
  - High fault current capacity (IEEE® Std 80)
    - Will not slip or tear when driven
    - Will not crack if rod is bent
  - Copper coating may vary to meet required standards
    - 10 mil (254 micron) minimum coating on rods listed to UL® 467

**Carbon Steel core and tip\*:**

- Greater tensile strength
- Deep driving capability

• **Lower purchase price – not as cost-effective over the expected life as Copper-bonded**

**Galvanized coating:**

- Relatively short service life
- May crack if rod is bent

**3.9 mil (99 micron) minimum coating per ASTM® 123**

\* ERICO copper-bonded and galvanized rods

# Ground System Components

## COPPER-BONDED GROUND ROD

The copper-bonded ground rod has an electrolytic coating of copper deposited over a layer of nickel. This process ensures a long lasting, molecular bond between the copper layer and the steel core. nVent ERICO recommends copper-bonded ground rods because the copper coating will not slip or tear when driven, nor will it crack if the rod is bent. The tough, carbon steel core has good characteristics for deep driving. Copper-bonded ground rods have a high resistance to corrosion and provide a low resistance path to ground.

## THE STAINLESS STEEL GROUND ROD OPTION

It is important to note that certain soils and land fill areas may not be compatible with copper. In these situations, stainless steel is a better proposition. Stainless steel may also be an alternative, where structures or components, such as steel towers, poles or lead sheathed cables are in close proximity to an array of ground electrodes. In these circumstances, consideration must be given to the consequence of galvanic corrosion. The high cost of stainless steel rods prohibits their widespread use.

## NEGRP

The photo on the left shows two ground rods that were driven into the soil vertically at the Pecos testing site in Las Vegas, NV in December of 1992. The top ground rod is galvanized steel, 3/4" x 10'. Bottom ground rod is copper-bonded, 5/8" x 8'. Both ground rods were exhumed from the site in April of 2004. The loss of zinc resulted in excessive corrosion of the steel. The copper-bonded steel ground rods showed minimal corrosion.

Excavated after 12 years.

Excavated after 11 years.

The photo on the right shows a galvanized steel ground rod driven vertically into the ground at the Pawnee testing site in Las Vegas, NV. One area is reduced from a 3/4" diameter to approximately a 1/4" diameter due to extensive corrosion. The eventual failure would result in a potentially catastrophic loss of ground.

# nVent ERICO Hammerlock

Hammerlock is machined from highly conductive copper.

It is easy to see why acorn clamps are more susceptible to corrosion than any other type of grounding connection.

Hammerlock cutaway.

## HIGH QUALITY CONNECTIONS

The patented nVent ERICO Hammerlock grounding connector from nVent ERICO connects the grounding conductor to the ground rod. Machined from highly conductive copper, the state-of-the-art Hammerlock provides a low-resistance connection designed to withstand ground fault currents and lightning transients. The Hammerlock connector's mechanically rugged design will help ensure that the highest level of performance is maintained for many years after the connection has been buried in the harsh underground environment. The Hammerlock is one of the quickest and easiest grounding connectors to install and requires no special tools or training. It has been engineered to be user-friendly, cost-effective, and provides a high level of protection for people and expensive equipment.

### Features Include:

- Machined from 100% high-conductivity copper
- Excellent mechanical strength
- Irreversible connection
- Fast and simple installation requires only a hammer
- No training required
- Provides a visual indication of completed connection
- Allows for "T" or pass-through connections
- UL® Listed (#2, 4 and 6 solid to 5/8" copper or galvanized rod)

### The Importance of Grounding Connections

Electrical utilities and other industries are discovering significant cost benefits when high-quality electrical grounding systems are installed. Many are specifying low-resistance grounds along their transmission and distribution networks. These low-resistance electrodes limit neutral-to-ground voltage, improve safety and provide better protection against lightning damage. In fact, the savings realized from reduced equipment damage and the decrease in service interruptions have prompted many utilities to undertake large-scale grounding improvement programs.

The three main components of the grounding system are the grounding connector, grounding conductor and ground rod. They are all equally important to the performance of the system. A loose or corroded connection will render the grounding system ineffective. While acorn clamps are still the connector of choice, many installers recognize the serious deficiency in their performance and the risks associated with poor-quality connections. Many acorn clamps are loose the day they are installed.

In order to install an acorn clamp effectively, it is necessary to know the proper torque level for the bolt. Since acorn clamps don't come with instructions and most crews don't have or wouldn't use a torque wrench, many are broken or installed incorrectly. The cost of replacing damaged equipment, and the labor associated with doing so, quickly puts the cost of using inferior connectors into perspective.

### Installation Costs

The actual cost of the grounding connector represents only a small fraction of the total installed expense when the labor rate of the installation crew, equipment overhead costs, ground rod and conductor costs are considered. Installation costs increase significantly when deep-driven rods are used—a common practice in grounding improvement programs.

Therefore, investing in the best-performing, longest-lasting grounding connector is a wise choice. Initially paying more for a quality connector will actually save money in the long run, by reducing downtime and eliminating the need for crews to return to the site for repairs.

# nVent ERICO Hammerlock

## Hammerlock Is The Answer!

Acorn clamps are utilized because they are inexpensive. They were developed before the proliferation of expensive electronics, at a time when the demand for electric power was lower and before power quality was a serious consideration. The Hammerlock, on the other hand, was designed to meet the needs of today's modern grounding programs. Therefore, an upgraded or perhaps more aptly stated, updated, grounding program specification should require a quality connector and exclude the acorn clamp.

## How the Hammerlock works

The ground wire is placed through the connector body and then the body is placed on the top of the ground rod. As the connector is struck with a hammer, Hammerlock is connected to the ground rod using the same compression technology used in the nVent ERICO threadless couplers that connect deep-driven rods together.

At the same time, the ground wire is locked in place as the connector plug enters the body.

## Ease of Installation

Installing the Hammerlock is as easy as swinging a hammer. Its intuitive design requires no special tools or training. When the large diameter on the Hammerlock plug is flush or below the round body, the connection is complete and irreversible. The Hammerlock can be installed three to five times faster than an acorn clamp and is easier to install in a trench.

The Hammerlock provides a high-quality grounding connection that is easy to use and cost-effective – withstanding 100% of the current carrying capacity of the conductor. Given the important function of today's grounding system, the Hammerlock provides excellent connector value.

## Hammerlock Specification

Cable to ground rod connectors shall be made from a round, high conductivity copper alloy bar stock, with a minimum of 90% IACS. The connector shall provide a high quality, irreversible, compression connection area for the conductor and a taper fit compression connection area for the ground rod. The connector shall be able to withstand 100% of the current carrying capacity of the conductor. The connector shall not rely on bolts or screws to maintain the integrity of the connection. Each connector shall be clearly marked with the catalog number and clear description of the conductor and ground rod to be connected and packaged with installation instructions.

A hammer shall be required for the connector installation. The connector shall provide a positive visual means of verifying a successfully completed connection. The connector shall be the Hammerlock as manufactured by nVent ERICO or approved equal. Silicon bronze connectors are not acceptable.

# nVent ERICO Ground Enhancement Material (GEM)

nVent ERICO Ground Enhancement Material (GEM) is the effective, maintenance free, permanent, easy to use, and environmentally sensitive solution to your toughest grounding problems.

GEM is a low-resistance, non-corrosive, carbon-based superior conductive material that improves grounding effectiveness, especially in areas of poor conductivity such as rocky ground, mountain tops and sandy soil. GEM is also the answer in situations where ground rods can't be driven or where limited land area makes adequate grounding difficult with conventional methods.

GEM contains portland cement, which sets within 3 days and fully cures within 28 days, to become a highly conductive concrete that performs in all soil conditions irrespective of the presence of water. GEM maintains a constant level of superior performance once cured that will not diminish over the life of the grounding system.

GEM comes in easy to use 25 lb (11.3 kg) bags or buckets that one person can install. GEM is maintenance-free and will never leach or wash away. A Material Safety Data Sheet (MSDS) is available on request.

## GEM is effective

- Dramatically reduces earth resistance and impedance measurements
- Maintains constant resistance for the life of the system once in its set form
- Performs in all soil conditions even during dry spells
- May reduce the size of the grounding system where conventional methods are unsatisfactory

## GEM is maintenance free

- Does not require periodic charging treatments or placement
- Does not require the continuous presence of water to maintain its conductivity

## GEM is permanent

- Fully sets within 3 days, fully cures within 28 days.
- Does not dissolve, decompose or leach out with time
- Non-corrosive
- Reduces vandalism and theft since conductors are hard to remove from concrete

## GEM is easy to use

- Easy-to-handle 25 lb (11.3 kg) bags or buckets
- Requires one person to install

## GEM is environmentally sensitive

- Exceeds IEC® 62561-7 which sets the benchmark for corrosion, leaching, sulfur content, and other environmental regulations
- MSDS sheet available upon request

**GEM**  
Ground Enhancement Material  
Conforms to IEC 62561-7

## FAST AND EASY ORDERING

For more information, contact your local ERICO sales representative for a quote. You can reference the GEM part numbers.

Part Number	Description
GEM25A	25-lb. (11.3 kg) bag with handles
GEM25ABKT	25-lb. (11.3 kg) plastic bucket with locking lid

# nVent ERICO Ground Enhancement Material (GEM)

## DESIGN AND ESTIMATING SOFTWARE

Design software estimates the quantity of GEM needed and calculates the anticipated ground resistance on any installation. GEM software is available at [nVent.com/ERICO/products/GEM.asp](http://nVent.com/ERICO/products/GEM.asp).

Parameter	Recommended Values	Test Method
Standards Compliance		Full compliance to IEC 62561-7 EPA Toxicity Characteristic Leaching Procedure (TCLP), test method 1311
Leaching	Arsenic < 1.5 mg/L, Barium < 60 mg/L, Cadmium < 0.15 mg/L, Chromium < 3.0 mg/L, Lead < 1.5 mg/L, Mercury < 0.06 mg/L, Elenium < 1.0 mg/L	EC 62561-7 EN 12457-2
Sulfur Content	< 2%	ISO 14869-1
Resistivity	<2 Ω-cm for powder <20 Ω-cm for mixed and cured material	Compressed powder according to ASTM G187-12 Mixed and cured per ASTM D991-89
Corrosion Performance	For copper-plated earth electrodes, the polarization resistance shall be > 8 Ω x m2 for aggressive environments For galvanized earth electrodes, the polarization resistance shall be > 7.6Ω x m2 for aggressive environments	IEC 62561-7, Sec 5.5, aggressive environment.
Flexural Strength	300-450 psi [2070-3100 kPa]	ASTM C293
Compressive Strength	100-200 psi [690-1390 kPa] after 672 hours curing time	ASTM C109

## INSTALLATION INSTRUCTIONS

### Trench Installation:

- Mix GEM into a slurry form by using a standard cement mixer or mix in a bucket, mixing box, wheelbarrow, etc. Use 1.5 to 2 gallons (5.7 to 7.6 liters) of clean-potable water per bag or bucket of GEM. Do not mix GEM with salt water.
- Spread out enough GEM to uniformly cover bottom of trench –about 2 in (5 cm) deep. (See Table). Let the GEM harden to prevent the conductor from sinking to the bottom of the trench.
- Place conductor on top of GEM. (See Note 1)
- Spread more GEM on top of conductor to completely cover conductor – about 2 in (5 cm) deep. Allow GEM to harden. Wait 30 minutes to one hour before filling the trench with soil backfill.
- Carefully cover the GEM with soil making sure not to expose the conductor.

**Note 1:** Wait for the GEM to harden, about 15 to 20 minutes, before placing the conductor on top of the GEM. You must apply 4 inches (10 cm) of insulating material to the conductors and ground rods exiting the GEM, starting 2 inches (5 cm) inside the GEM.

**Note 2:** Excess standing water must be removed from trench.

### Estimated linear feet of ground conductor covering with each bag of GEM.

Trench Width		Total Thickness of GEM					
		in	cm	in	cm	in	cm
Inches	Centimeters	4	10.2	5	12.7	6	15.2
4	10.0	3.5	1.0m	2.8	0.8m	2.3	0.7m
6	15.2	9.3	0.7m	1.8	0.5m	1.5	0.4m
8	20.3	7.0	0.5m	1.4	0.4m	1.1	0.3m
10	25.4	5.6	0.4m	1.1	0.3m	0.9	0.3m
12	30.5	4.7	0.3m	0.9	0.3m	0.7	0.2m

A 25 lb. bag of GEM will cover 3.5 linear feet (1.0 m) of conductor length for a 4" wide (10.2 cm), 4" thick (10.2 cm) covering [2" (5.1 cm) below and 2" (5.1 cm) above conductor], based on 63.5 lb/cu ft (1017 kg/m<sup>3</sup>)

# nVent ERICO Ground Enhancement Material (GEM)

## Ground Rod Backfill Installation:

1. Auger a 3-inch (7.5 cm) or larger diameter hole to a depth of 6 inches (15 cm) shorter than the length of the ground rod.
2. Place ground rod into augered hole and drive 1 foot (30 cm) (if possible) into bottom of the hole. The top of the ground rod will be approximately 6 inches (15 cm) below grade. At this time, make any connections to ground rod using Cadweld connections. (See Note 1)
3. Premix GEM into a slurry form. Use 1.5 to 2 gallons (5.7 to 7.6 liters) of clean-potable water per bag or bucket of GEM. The installation of GEM in a dry state is acceptable for vertical ground rod applications.
4. Pour the appropriate amount of GEM (see table) around the ground rod. To ensure the GEM material completely fills the hole, tamp around the ground rod with a pole. Wait 30 minutes to 1 hour before filling the hole with soil backfill.
5. Fill remainder of augered hole with soil removed during augering.  
For various augered-hole diameters and depths, see the table below:

**Note 1:** 4 inches (10 cm) of insulating material must be applied to the conductors and ground rods exiting the GEM, starting 2 inches (5 cm) inside the GEM.

**Note 2:** Excess standing water must be removed from the hole.

## Estimated bags of GEM for backfilling around ground rods to a density of 63.5 lb/ft<sup>3</sup>

Diameter of Hole		Depth of Hole*											
		ft		m		ft		m		ft		m	
Inches	Centimeters	5	1.5	6	1.8	8	2.4	10	3.0	15	4.6	20	6.1
4	10.2	2		2		2		3		4		5	
6	15.2	3		3		4		5		8		10	
8	20.3	5		6		8		9		14		18	
10	25.4	7		9		12		14		21		28	
12	30.5	10		12		16		20		30		40	

\*8' (2.4 m) minimum rod length required to be in contact with the soil (or GEM). Per NEC® 250-52

Note: To mix GEM into a slurry form, use a standard cement mixer or mix in a mixing box, wheelbarrow, etc. Use 1.5 to 2 gallons (5.7 to 7.6 liters) of clean-potable water per bag of GEM. Do not mix GEM with salt water. For storage and safety precautions, see product packaging.

## Customer Support

# nVent ERICO Cu-Bond Composite Cable

nVent ERICO Cu-Bond is a bare concentric stranded conductor that consists of peripheral tinned copper plated steel which protects and conceals the internal copper stranding.

This conductor is ideal for exposed electrical grounding applications where copper theft may occur. The conductor is difficult to cut with hand tools and the outer stranding is magnetic, which further deters thieves looking for copper.

The CC5A05CB (19 strand) is electrically equivalent to a 4 AWG (25mm<sup>2</sup>), the CC5A20CB is electrically equivalent to a 2/0 AWG (70mm<sup>2</sup>) and the CC5A40CB is electrically equivalent to a 4/0 AWG (120mm<sup>2</sup>).

These conductors are ideal for transmission tower, distribution pole and a wide range of above and below grade grounding applications.

## FEATURES

- Outer strands comprised of tinned copper bonded steel for corrosion resistance and theft deterrence
- Inner copper stranding is tinned for superior corrosion resistance
- Copper stranding inside of conductor provides increased conductivity and conductor flexibility
- Copper strands are hidden by outer tinned copper bonded steel strands
- Available in three sizes / configurations with electrical equivalency to 4, 2/0 and 4/0 AWG copper
- Suitable for direct burial applications
- More flexible and easier to work with than copper clad steel conductors

# nVent ERICO Cu-Bond Round Conductor

Substation earthing riser

For decades, nVent ERICO has provided the market with high quality copper-bonded ground rods.

nVent ERICO has taken that same concept in ground rods and made this into a revolutionary new grounding conductor. The nVent ERICO Cu-Bond Round Conductor is comprised of an electro-plated coating of copper deposited over a layer of nickel surrounding a steel core. This process helps ensure a long-lasting molecular bond between the copper layer and the steel.

The conductor core consists of a low-carbon steel grade for improved flexibility in the field. The copper surface of the conductor provides high conductivity and corrosion-resistance properties.

## FEATURES

- Copper-bonded coating will not crack or tear when the conductor is bent
- High resistance to corrosion and provides a low resistance path to Earth
- Available in standard packaging lengths of 100 meters, 50 meters, and 25 meters
- Minimum copper plating thickness of 254 microns
- Available in nominal diameters of 8, 10, 13, 14, 16, and 18 mm
- Meets the requirements of IEC® 62305-3 Edition 2 and IEC/EN 62561-2 for lightning protection applications
- Cu-Bond Round conductors are UL certified to IEC® 62561-2

## BENEFITS AS AN ALTERNATIVE TO COPPER CONDUCTOR

- **Theft deterrent:** Copper theft is a problem everywhere. Cu-Bond Round Conductor is hard to cut with hand tools due to its steel core. They are also magnetic, notifying potential thieves that the materials within are of little scrap value.
- **Cost-effective:** Because the copper is bonded to a steel core, the cost of the conductor is minimized by reducing the total amount of copper in the cable.

## BENEFITS AS AN ALTERNATIVE TO GALVANIZED STEEL CONDUCTOR

- **Superior corrosion resistance:** In comparison to other steel-based products, Cu-Bond Round Conductor provides excellent application life of typically 30-40 years in most soil conditions.

Equipotential grounding conductor

GT Cadweld connection

# nVent ERICO Cu-Bond Round Conductor

## ABOVE GRADE APPLICATIONS

The unique properties of Cu-Bond Round Conductor make it ideal for both horizontal and vertical placement. Above grade, the conductor is well-suited as a lightning-protection conductor when applied in accordance with the IEC 62305-3 Edition 2.0 standard.

### • Utility

- Distribution down-lead conductor and assemblies
- Bonding kits for substation fence or equipment ground risers back to the grid

### • Commercial and Industrial

- Alternative conductors to solid copper rod and tapes in grounding and lightning protection

### • Telecom

- Conductor for connecting equipment ground to ground grid, and riser (down-lead) conductors for tower
- Grounding conductor for datacenter mesh bonding

### • Rail

- Trackside bonding conductor and stray current conductor
- Grounding kits for trackside equipment, electrical traction power
- Substation, wayside shelters, communication antenna equipment

## BELOW GRADE APPLICATIONS

Copper-bonded steel conductors are ideal as earthing and bonding conductors where copper theft on-site may occur. Cu-Bond is ideal for use in a variety of applications including power distribution earthing and bonding; substation earthing; commercial, industrial, and railway earthing.

### • Buried ground grid conductors and electrodes:

- Wireless telecom tower earthing
- Utility substation earthing; power distribution and transmission earthing
- Large scale ground mount solar farm earthing
- Industrial facility earthing, for example, petro-chemical and mining infrastructure
- Railway earthing

### • Interconnecting grounding conductor between wind towers or grounding grid at base of wind tower

**Cu-Bond Round Conductor is stamped with compliance markings directly on the product to ensure genuine product and high quality standards. Beware of imitations.**

# Ground Stainless Steel Braids (CPI + CPIW)

## Stainless Steel Braids Technical Characteristics

- 316L stainless steel braid ready to use
- Full application range: 16 to 70 mm<sup>2</sup> section with 150 to 1100 mm length
- High-quality 316L stainless steel: superior abrasion, corrosion, chemical, and UV resistance for outdoor applications
- Time savings: Quick and easy to install. Ready to use. No additional cutting, stripping, crimping and punching needed. Less labor time for installation
- Material savings: No additional lugs or terminals needed
- Durable in outdoor, salt and corrosive environments
- Non-magnetic material
- UL® Listed to UL467 - grounding and bonding equipment for US and Canada
- Great for expansion joints where constant movement requires a flexible and indestructible covering

## READY-TO-USE STAINLESS STEEL BRAIDS FOR MULTIPLE APPLICATIONS

nVent ERICO developed and manufactures a range of ground stainless steel braids. These high-quality 316L stainless steel braids can be installed in extremely corrosive environments, like offshore applications or coastal applications. The CPI braid is ideal for applications using stainless steel pipe or tanks, like the food and beverage industry, building industry, transportation, oil and chemical industry.

nVent ERICO offers 316L stainless steel, one of the highest resistant stainless steel options on the market. nVent ERICO has mastered the process of manufacturing stainless steel for braiding, crimping, cutting or punching and offers a full range of ready-to-use stainless steel braids.

In addition, the CPIW offered by nVent ERICO allows for more connections to larger bolts than any other 50 mm<sup>2</sup> or 70 mm<sup>2</sup> braid.

## WHERE STAINLESS BRAIDS CAN BE USED:

# Ground Copper Braids (MBJ & BJ)

## Tinned Copper Ground Braids Technical Characteristics

### With integral palm

- A complete range of ground flexible connections from 6 to 100 mm<sup>2</sup> section and from 100 to 500 mm length
- Resistant to vibration and fatigue, reducing maintenance
- Reliable: No extra contact due to the lugs crimped at the ends of the cable
- Provides weight savings, material savings and lower impedance when compared to similar lugged cables with insulation
- Integral palm, without tin or crimped lugs for superior electrical contact and tensile strength resistance
- Quick and easy to install: Ready to use. No cutting, stripping, crimping or punching. Less labor time for installation
- Material savings: No lugs or terminals
- GOST compliant
- RoHS compliant

## INNOVATIVE, STATE-OF-THE-ART MANUFACTURING PROCESS

nVent ERICO manufacturing directly massivates the palms of the MBJ tinned-plated braids. This manufacturing process provides an effective electrical contact, due to the integral palms, without the addition of tin or crimped lugs.

This process welds the flexible braid and brings back a solid tinned or red copper block as a palm. Unlike the traditional press-welded palms process, nVent ERICO's process is suitable for red copper, but also for tin plated copper. The electrical contact between each wire is optimized.

This nVent ERICO process also helps eliminate moisture issues in the palms. By using crimped lugs in a severe environment, moisture can enter in the lug (often by capillarity) and create corrosion between each wire. After several years, the electrical contact between each wire can deteriorate and alter the electrical conductivity of the equipment. The corrosion in the palm is impossible to remove without changing the element.

This process produces RoHS products; no additional substances are added to the tinned-plated wires during the manufacturing process.

### BJ

#### Round braids with crimped lugs

Part No.	Description	Cross Section	L in	Ø D in	Intensity A

# nVent ERICO Cadweld Plus

nVent ERICO Cadweld Plus connections offer all the benefits of conventional Cadweld connections:

- Current carrying capacity equal to or greater than that of the conductor
- Withstand repeated fault currents without failing during operation
- Permanent, molecular bond that will not loosen or corrode, resulting in a connection with a lifetime equal to that of the installation
- Join copper to copper, copper to galvanized or plain steel, copper to copper clad steel, copper to bronze/brass/stainless steel, steel to steel, etc.
- No external power or heat source required
- Quality Assurance Inspection is easy and visual
- Minimal installation training required
- Exceed requirements of "IEEE Std. 837-2014 -Std. for Qualifying Permanent Connections Used In Substation Grounding"

The Cadweld molecular bond will last the lifetime of the conductors.

## CADWELD PLUS

**The ultimate welded connection that will never loosen, corrode or increase in resistance.**

nVent ERICO is dedicated to continuous product improvement to meet its customers' needs and maintain the highest level of satisfaction. The introduction of Cadweld electrical connections in 1938 enabled them to be quickly recognized as the ultimate connection for rail, cathodic, power and grounding applications.

Continuing the tradition of technical leadership, Cadweld Plus was developed as a simplified method of performing exothermically welded electrical connections. This trusted system now features a new Cadweld Plus cup design for the integrated welding material package which has streamlined the installation process by eliminating ignition materials.

The tamper proof, integrated welding material package consists of a steel cup containing Cadweld patented welding material alloys and an ignition source. This newly shaped welding material package is designed for use in all standard Cadweld molds, including Cadweld Multi. Once placed in the Cadweld mold, the welding material is electronically ignited using a simple battery-powered control unit with a six-foot lead.

Feature	Benefits
Integrated Welding Material Package	<ul style="list-style-type: none"> <li>• Simplifies training and set up</li> <li>• Saves labor</li> <li>• Simplifies cleaning</li> </ul>
Color Coded Welding Material	<ul style="list-style-type: none"> <li>• Helps reduce risk of misapplication</li> <li>• Simple visual verification of correct welding material size</li> </ul>
Electronic Control Unit	<ul style="list-style-type: none"> <li>• No starting material required</li> <li>• Easy ignition</li> </ul>
Replaceable Six or Fifteen Foot Control Unit Lead	<ul style="list-style-type: none"> <li>• Increased flexibility in hard to reach areas</li> </ul>

# nVent ERICO Cadweld Plus

- Consists of a tamper proof, disposable, moisture-resistant welding material cup. The welding material, disk and ignition source are incorporated into the self-contained package
- Long shelf life
- Completes welds at distances of up to 6 ft/1.8 meters (up to 15 ft/4.6 meters with optional lead)
- Requires minimum components – no starting material, no disks, no flint igniters
- Easy to handle, store and transport – by air, land or sea in unlimited quantities
- Reduces installation time by 20%
- Has color-coded welding material containers – by size and alloy type – for easy identification
- Has electronic ignition with a CE/UL battery powered controller box that is designed for 600 connections with one set of 8 standard AA batteries (included) – requiring no special batteries or chargers
- Designed for use in standard Cadweld molds including Cadweld Multi

## Installation Is Easy! 4 Simple Steps For Permanently Welded Electrical Connections

Self contained welding material package

1 Insert Cadweld Plus cup into mold (may require use of a cover/baffle)

2 Attach control unit termination clip to ignition strip

3 Press and hold control unit switch and wait for the ignition

4 Open the mold and remove the expended steel cup – no special disposal required

Cadweld Plus Control Unit initiates the reaction of the metal crucible. The standard unit includes a 6-foot (1.8 meter) high temperature control unit lead. The lead attaches to the ignition strip using a custom made, purpose-designed termination clip.

After the termination clip is installed on the ignition strip, the installer pushes and holds the ignition button to start a charging and discharging sequence. Within a few seconds the control unit sends a predetermined voltage to the ignition strip and the reaction is initiated.

# Cadweld Multi

## CADWELD MULTI

**The complete welding system for improving grounding system performance, reliability, and installation convenience.**

Cadweld Multi simplifies the exothermic welding process. Make over 30 separate connection types with a single, universal mold, which now enables you to make connections to a ground rod.

Welding material sold separately.

## EXOTHERMIC WELDED CONNECTIONS

Exothermic welded connections are immune to thermal conditions which can cause mechanical and compression joints to become loose or corrode. They are recognized for their durability and longevity.

### Cadweld Multi offers enhanced user benefits:

- Performs welds to ground rods
- Versatile mold produces an unlimited variety of connections
- Compact compression structure enables easy alignment of conductors
- Language-free instruction guide
- Lightweight kit for easy transportation
- Easy-to-use system completes weld in seconds
- Video available on [nVent.com/ERICO](http://nVent.com/ERICO)

## CADWELD CONNECTION

The ERICO CADWELD PLUS exothermic welding process fuses conductors together to form a molecular bond with a current-carrying capacity equal to that of the conductor. Grounding systems incorporating this type of connection therefore operate as a continuous conductor with lower resistivity.

### Standard Compliance

Cadweld Multi satisfies the requirements of:

- BS 6651
- BS 7430
- NFC 15-100
- IEEE® 837-2014
- IEEE 80-2000
- IEC 1025-1 (ENV 61024-1)

# Cadweld Multi

## 4 EASY STEPS FOR MULTIPLE, PERMANENTLY WELDED, ELECTRICAL CONNECTIONS

**Step 1:** Layer batting and variable conductor sizes to be welded into dry mold.

**Step 2:** Add Cadweld Plus welding material.

**Step 3:** Close cover and connect Cadweld Plus control unit.

**Step 4:** Press and hold operate button. Open mold after 10 seconds.

## HOW DOES IT WORK?

Cadweld Multi combines a versatile mold block and a range of gaskets (batting) to allow numerous different welded connections to be produced without the need to change the mold for each connection type

The process is similar to the Cadweld with one distinct difference...

there is no need to change the mold for different connection types.

The whole process is complete in about one minute. Page 31 details the gasket quantities required for each weld.

# Cadweld Multi

## Cadweld Multi offers all of the benefits of Cadweld connections:

- Current-carrying capacity equal to that of the conductor
- Permanent molecular bond that will not loosen or corrode
- Works with Cadweld traditional welding material
- Works with Cadweld Plus welding material
- Will withstand repeated fault currents
- No external power or heat required
- Ground rod capabilities
- Visual inspection possible
- Requires minimal training

# Cadweld Multi

## CADWELD MULTI CONNECTION CAPABILITIES

### Copper Cable/Solid to Copper Cable/Solid

### Copper Cable/Solid Strip to Rebar

### Copper Strip to Copper Strip

### Copper Cable/Solid to Copper or Steel Strip/Lug

### Galvanized Steel Strip to Galvanized Steel Strip

### Ground Rod Connections

### Cadweld Multi Available Items

Part Nr	Article Nr	Description	 Weight (kg)
KITCDMV01	167782	Cadweld Multi Kit	1 25.000
The CADWELD MULTI kit (KITCDMV01) contains the following list of items:			
FMCDMV01	120883	Handle Clamp	1 1.800
CDMV01H	240399	Mold for H welds	1 1.200
CDMV0112	240398	Mold for welds on 1/2 rods	1 1.200
CDMV0158	240397	Mold for welds on 5/8 rods	1 1.200
CDMV0134	240396	Mold for welds on 3/4 rods*	1 1.200

B136B	182030	Slag Removal Spade	1 0.144
		Language free instruction sheet	1
The following items can be used with the Cadweld Multi Kit (KITCDMV01). They are sold separately.			
T320	165000	Flint Ignitor T320	1 0.090
90	163040	Cadweld Traditional welding material	10 0.090
115	163050	Cadweld Traditional welding material	10 0.115
PLUSCU	165745	Control Unit	1 1.088
PLUS#90F20	165705	Cadweld Plus welding material	10 0.158

Symbol denotes number of batting (gaskets) required for each connection.

 Requires 2 batting layers for weld

 Requires 3 batting layers for weld

### NOTES:

- \*For connections using a 3/4" ground rod, it is necessary to use #115 / 115PLUSF20 weld material (sold separately).
- For all other connection types, use #90 or 90PLUSF20.
- For connections using galvanized material, remove galvanizing before welding, for a better connection.

# Cadweld One Shot

## PERMANENT EXOTHERMIC CONNECTIONS WITHOUT THE MOLD

Cadweld One Shot produces a permanent exothermic connection to a ground rod that will not loosen, corrode or increase in resistance for the life of the installation. The convenient single-use package makes the connection to the ground rod without a mold or starting material.

Thanks to the electronic Cadweld One Shot Control Unit, welds can now be completed up to 6 ft. (1.8 m) away, increasing weld flexibility in hard-to reach areas. The refractory ceramic body on the Cadweld One Shot is more durable than conventional ceramic and resists breaking.

## INSTALLATION IS EASY!

1. After preparing the ground rod and wire, position the Cadweld One Shot and attach the lead to the control unit.

2. Ignite the Cadweld One Shot with the electronic Cadweld Plus Control Unit.

3. After one minute, break off the ceramic crucible. It can also be left in place, if desired.

## FEATURES:

- Easy-to-use electronic ignition. No starting material needed
- Extremely durable disposable ceramic outer body eliminates the graphite mold and frame
- Produces a permanent connection that will not loosen or corrode
- Fits both plain and threaded copper-bonded and full-size steel and stainless steel ground rods
- NEC® compliant
- cULus® Listed

## HOW TO ORDER CADWELD PRODUCTS

---

This catalog lists the most popular Cadweld connections using solid or concentric stranded copper conductor, insulated or bare. Look in the index for the connection you need. To save time and money, avoid non-catalog items or specials whenever possible.

If you cannot find the connection you need, contact nVent ERICO or your local distributor or agent. We have designed over 45,000 connections, and "specials" are designed every day.

### 1. What connection do you want?

We strongly recommend that wherever possible you use molds listed in this catalog. After selecting the connection, turn to the appropriate page and select the mold, weld metal and tools you need.

---

### 2. Only the most popular Cadweld connections are listed in this catalog.

For a complete listing of Cadweld Exolon connections, please refer to [nVent.com/ERICO](http://nVent.com/ERICO) or your local nVent ERICO representative.

---

### 3. What are the conductor sizes?

This catalog covers connections between solid or concentric stranded copper conductors to each other, to lugs, to ground rods, to rebar, to rail and to special grounding accessories. For sizes not listed, contact your local Cadweld distributor, agent, or nVent ERICO.

---

Note: Other publications describe connections to conductors of copperclad, high voltage copper, aluminum, busbar, lightning protection cable, steel cable, etc.

### 4. You must have the following to make a weld:

- 4.1 Mold to fit your conductors
- 4.2 Weld metal required by your mold
- 4.3 Handle clamps on frame
- 4.4 Flint ignitor (included with handle clamps and frames)
- 4.5 If using Cadweld Exolon, you need a Relia-Start™ battery instead of a flint ignitor.
- 4.6 Lugs, sleeves, packing material listed on the page with the mold.

# Cadweld Exolon

## CADWELD EXOLON REDUCED-EMISSION MOLDS

Developed in 1988, Cadweld Exolon connections represented a significant advancement in welded electrical connections for sensitive indoor applications like data centers, hospitals, and other clean room environments. The virtual elimination of smoke and a unique electronic starting system makes this an ideal solution for sensitive applications. Each Cadweld Exolon package contains ceramic filters that produce an extremely low emission connection.

### How to order Cadweld Exolon:

1. To order Cadweld Exolon products, just specify molds and weld metal from the catalog and add an "XL" prefix.

**Example:** TAC2Q2Q becomes XLTAC2Q2Q, and 150 becomes XL150.

2. If the weld metal shown in the catalog shows more than one tube required such as 2-#200, you must specify #XL400 to get the correct size filters.

**Example:** XLTAD-4L3Q: XL400

3. The following molds require a price key change:

- "C" price key molds using 2-#150 weld metals change to XLD price key.
- "E" price key molds using 2-#150 weld metals change to XLJ price key.
- "H" price key molds using 2-#150 weld metals, contact nVent ERICO.
- "M" price key molds using 2-#150 weld metals change to XLV price key.
- "R" price key molds using 2-#150 weld metals change to XLF price key.
- "T" price key molds, ALL change to XLP price key.

**Example:** TAC3Q3Q using 2-#150 weld metals change to XLTAD3Q3Q using #XL300 weld metal

4. Filters and ignitors are included with the weld metal. XL filters and ignitors are not sold separately.

5. The ignitor can be used only once and then must be discarded. Filters will last as specified in the instructions supplied with each mold.

6. A Relia-Start electric starter, part number XLB971A1 (battery, charger, carrying case and connecting cable), is required for XL weld metal. There is no starting material in the XL weld metal tube. Batteries operate about 200 starts before recharging from 120 VAC is required. The charger, all electrical connections and instructions are included in the battery case.

7. Baffle with cover is required for larger molds. Estimated life of the baffle is 500 welds.

- XLB972A1 Baffle is required for molds using XL200 and XL250 weld metals.
- XLB973A1 Baffle is required for molds using XL300 to XL750 weld metals.

8. For EZ Change Handles, add XL prefix. (Flint ignitor not included.)

9. Welding Tray, part number XLB974B2, is used under the mold to protect cables and equipment from hot materials.

# Cadweld

## OTHER INFORMATION

Certain tools may be required for various connections. If required, these tools are listed on the same pages as the connection and in Section A. Some tools in section A can save you a lot of time. Also refer to A9E, Contractor Tips, to make your job easier, and learn about labor saving ideas.

For complete pricing information, please visit [nVent.com/ERICO](http://nVent.com/ERICO) or contact an ERICO Representative  
For Cadweld literature, guides, instructional videos, and more, visit [nVent.com/ERICO](http://nVent.com/ERICO).

For all your connection needs – we're only a phone call away.

Phone: 800-677-9089

Fax: 800-677-8131

or call your local Cadweld distributor, agent, or Cadweld regional sales manager

### Required tools summary:

Required tools are listed with each mold. For your reference, handle clamps and/or frame are summarized below.

Mold	Required
A*	Includes frame with handle
C, Q & R	Requires L160
D, F & Z	Requires L159
E*	Includes frame but also requires L160
J*	Includes frame but also requires L159
K*, M* & V*	Includes frame with handles

\* To order mold only – without handles or frame – add suffix "M" to mold part number.

### Heavy Duty Electrical Connections for Stranded Concentric Copper Conductors

Heavy Duty connections were developed to be used on reclaimed cable. Heavy Duty connections use a larger size connection cavity in the mold and a larger size weld metal than the equivalent standard connections.

The larger size weld metal supplies extra BTU's (but not a higher temperature) to melt the heavy oxide coating on the conductor and to overcome severe field conditions.

#### Heavy Duty connections offer the following advantages:

- Eliminates cutting the run conductor on certain types of connections.
- Reduces cable cleaning requirements for old or reclaimed cable.
- Increases reliability under adverse field conditions.

# Cadweld

## GROUNDING CONNECTION SPECIFICATION

This specification covers the Cadweld exothermic welding system for use in making electrical connections. The Cadweld system supplied under this specification shall include welding material, molds, tools and accessories as required.

Unless otherwise specified, Cadweld exothermic welding system shall be used for all electrical grounding connections of copper to copper and copper to steel conductors. Cadweld connections shall be suitable for exposure to the elements of direct burial in earth or concrete without degradation over the lifetime of the grounding system.

The Cadweld exothermic welding system furnished under this specification shall meet the applicable requirements of IEEE Standard 80 "IEEE Guide for Safety in AC Substation Grounding" and IEEE Standard 837 IEEE "Standard for Qualifying Permanent Connections Used in Substation Grounding". Independent test data showing conformance to IEEE Std. 837 shall be readily available.

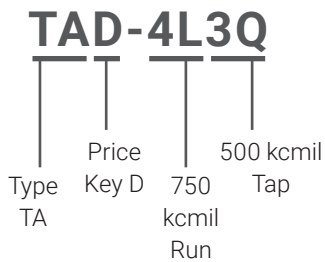

### The Cadweld Mold Numbering System

The Cadweld mold part number gives, in code, the complete information about the mold.

Type of connection, mold price key, and conductor size(s)

### Examples:

# Cadweld

A graphite mold is used for making most Cadweld connections. Cadweld molds will generally last an average of 50 or more connections under normal usage.

## Price Key and Handle Clamp and/or Frames

Handle clamps are required for most molds. Specialized frames with handles are used on some molds. Flint igniters are included with handle clamps. The following handle clamps are most widely used.

L160 for all molds having a "C", "E", "R" and "Q" mold price key (3" wide molds)

L159 for all molds having a "D", "F", "J" and "Z" mold price key (4" wide molds)

Handle Clamps with an "XL" prefix are for use with the Cadweld Exolon system and do not come with a flint igniter.  
Mini E-Z Change Clamps for use with mini-welders.

Pictured below are the molds and handle clamps / and or frames and handles for the various price key molds:

"A" Price Key Mold  
Includes Hold Down Frame

"C", "D", "F", "R", "Q" and "Z" Price Key  
Mold L160 or L159  
Handle Clamp Required

"E" and "J" Price Key Mold  
L160 or L159 Handle Clamp Required

"M" and "V" Price Key Mold  
Includes Frame with Handles

# Cadweld

"H" Price Key Mold Includes Hold Down Frame with Handles

"G", "K", and "L" Price Key Mold Includes Frame with Handles

"T", "P" and "N" Price Key Mold Includes Mini-EZ Handle Clamp

To order mold only, add an "M" suffix to the part number (for example, SST1TM)

## MOLD OPTIONS

### Split Crucible Molds

Molds made with a horizontal opening and solid crucible section may be specified as a split crucible type. The advantage of the split crucible mold is easier cleaning.

To order a mold with a split crucible, add an "L" suffix to the mold part number (for example, TAC2G2GL).

### WEAR PLATES

Wear Plates reduce mechanical abrasion of molds at cable entry points and help prevent leakage of molten metal (particularly on larger 7 strand conductor). These features prolong mold life.

To order a mold with wear plates, add a "W" suffix to the mold part number (for example, PTC2G2GW).

# Grounding, Bonding & Connectivity Products

## nVent ERICO Facility Electrical Protection

nVent ERICO offers a full range of grounding, bonding and connectivity products for data centers and other datacom applications worldwide. nVent ERICO's product offerings include grounding and bonding accessories, surge protection and lightning protection products, and welded electrical connections.

### Grounding and Bonding

nVent ERICO offers an extensive line of grounding and bonding products, which includes ground rods and accessories, signal reference grids, chemical ground rods, GEM ground enhancement material, couplers, clamps, inspection wells, grounding and perimeter bus bars and ground test instruments.

### Surge Protection

nVent ERICO surge protection products are designed to protect against damaging electrical surges on power and communications lines caused by lightning, building systems and other switching events.

### Lightning Protection

Direct and indirect lightning strikes can pose many risks to businesses, including damaging buildings and critical equipment. nVent ERICO lightning protection products offer a variety of solutions to help protect valuable equipment and personnel and to avoid disruption and downtime.

### Welded Electrical Connections

Cadweld welded electrical connections are used to connect the grounding and bonding conductors to each other and to the ground electrode system, including ground rod electrodes, building steel and rebar. Cadweld connections provide a permanent, low-resistance connection needed to create a long-lasting, reliable bonding network. Cadweld connections will not deteriorate, cannot loosen and are made with inexpensive, lightweight and portable equipment. Cadweld Exolon is a filtered, smokeless connection system designed for making connections indoors.

**Lightning Protection Cable**

## ERICO CADWELD CONNECTIONS

- 1 Cable-to-Lug (GL)
- 2 Cable-to-Rebar (RH)
- 3 Cable-to-Ground Rod (GT)
- 4 Cable-to-Cable (PT)
- 5 Cable-to-Steel (VF)

## Prefabricated Signal Reference Grid (SRG)

The SRG is an integrated high-frequency, low-impedance signal reference grid structure, which consists of a network of flat copper strips welded at the crossovers in accordance with recommendations found in IEEE® 1100 "IEEE Recommended Practice for Powering and Grounding Electronic Equipment." The SRG is also referred to as a "Supplementary Bonding Grid" (SBG) per TIA® 607.

The SRG lies directly on the sub-floor under the raised-floor structure and is used to interconnect metal frames, racks, enclosures, common terminals for signal level power and the electrical distribution grounding system. The SRG is used as a ground reference system for IT equipment by creating an equipotential ground reference plane over a large range of frequencies from DC through the Megahertz range. At high frequencies, flat strip conductors have considerably lower inductive reactance than concentric stranded or solid conductors and the configuration of the SRG results in a lower impedance system, which limits potential differences between data systems and other systems during voltage transients or other power system disturbances. The following graph from IEEE 1100 shows the impedance of an SRG system versus a wire-only grounding system.

## SRG Features and Benefits

- Economical and maintenance-free
- Recommended in IEEE® 1100
- Reduces common-mode noise
- Increases noise immunity to electric fields
- Reduces capacitive coupled interference
- Compliant with Information Technology Industry Council Information Letter "Guidelines For Grounding Information Technology Equipment (ITE)" and the National Electrical Code.

IEEE is a registered trademark of The Institute of Electrical and Electronics Engineers, Incorporated.

TIA is a copyright of Telecommunications Industry Association

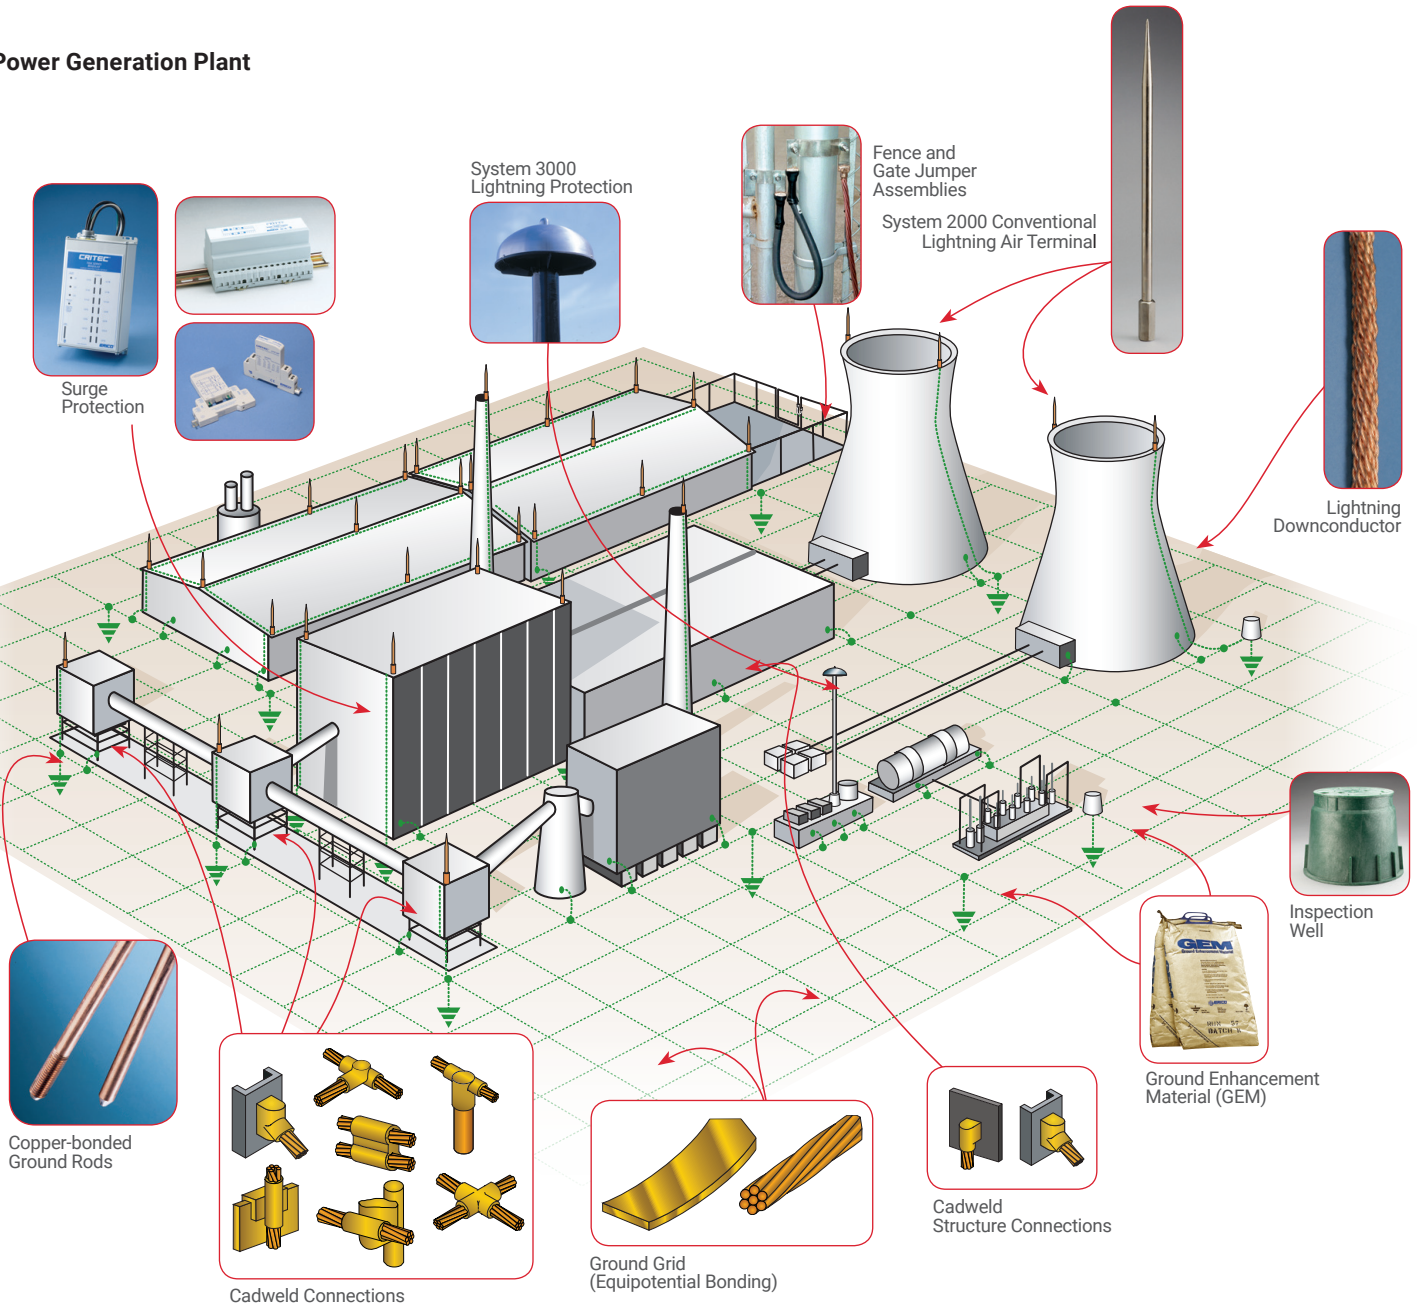

NOTE: Cadweld connections shown are typical. Connections for any configuration and conductor are available to meet specific application requirements.

# Power Generation

## Power Generation Facilities

Traditional power generation facilities have either been coal-fired, gas-fired, nuclear, diesel or hydro-powered. Modern alternative power generation facilities can include geothermal, bio-gas, wind or solar. nVent ERICO brand of lightning protection systems have been used to provide lightning protection to the whole host of facilities in a unique manner. nVent ERICO grounding and bonding solutions can provide a complete system for the grounding and bonding of any of these facilities.

## Power Generation Plant

# Power Transmission and Distribution

## Distribution Pole

## Transmission Tower

# Substation Earthing/Grounding and Lightning Protection

The conceptual design of a ground grid at a substation is summarized by the points below and depicted on pages 4 and 5.

- A continuous loop conductor should surround the perimeter to enclose as much area as practical. Under Standard IEEE® 80, this loop conductor is placed 3 ft (or 1 meter) outside the fence line. This measure helps to avoid high current concentration and high gradients both in the grid area and near the projecting cable ends. Enclosing more area also reduces the resistance of the grounding grid.
- Within the substation, conductors are typically laid in a parallel grid and, where practical, along the structures or rows of equipment to provide for short ground connections.
- A typical grid system for a substation may include bare copper conductors buried 18" (0.5 m) below grade, spaced 9 ft to 21 ft (3 m to 7 m) apart, in a grid pattern. At cross-connections, the conductors would be securely bonded together. Ground rods may be at the grid corners and at junction points along the perimeter.
- This grid system would be extended over the entire substation switchyard and beyond the fence line.

## Earth/Ground Rods

nVent ERICO offers a range of ground rods to suit the needs and preferences of the utilities. The most common of these are copper-bonded steel rods, due to their versatility in varied soil conditions and compatibility with various common metals used underground. The copper-bonded ground rod has an electrolytic coating of copper deposited over a layer of nickel. This process helps ensure a long-lasting molecular bond between the copper layer and the steel core. nVent ERICO recommends nVent ERICO brand of copper-bonded ground rods because the copper coating will not slip or tear when driven, nor will it crack if the rod is bent. The tough, carbon steel core has good characteristics for deep driving. Copper-bonded ground rods have a high resistance to corrosion and provide a low-resistance path to ground.

It is important to note that certain soils and landfill areas may not be compatible with copper. In these situations, stainless steel is a better choice. The nVent ERICO brand of copper-bonded ground rods comply with UL® 467, BS:7430 & EN50164, Standards.

# Substation Earthing/Grounding and Lightning Protection

## Surge Protection for SCADA-controlled Equipment

Electronic equipment operating within a substation environment is particularly subject to electrical disturbances such as switching, electrical noise, ground potential rise and occasional induced or direct lightning impulse. Surge protection is an extremely cost-effective investment for electronic substation equipment, because:

- Each site's operation is critical to the quality supply of electrical power
- Downtime costs are significant

# Solar Products

nVent ERICO offers a wide range of products for the solar market. In addition to an extensive product offering, nVent ERICO engineers and designers can provide design assistance for many solar installation aspects of your facilities worldwide.

The megawatts of solar energy produced continues to increase globally. More countries have focused resources on this valuable endeavor. Solar photovoltaic power systems include modules, inverters, rack mounting components, monitoring systems for off-grid systems, batteries and charge controllers. Solar power systems are designed to be in service for periods of 30 years or more, therefore it is imperative to construct the systems with products that are designed to help provide efficient operation for the lifetime of the installation. nVent ERICO is uniquely positioned to provide the necessary products, components and services for solar programs worldwide.

Years of experience in the fields of grounding and bonding, lightning protection, low-voltage power distribution, fastening and support and reinforced concrete construction, combined with global manufacturing capabilities, allow nVent ERICO to provide comprehensive solutions for the solar market. Four of our product lines have joined together to offer a full range of solutions: nVent ERICO facility electrical protection products, nVent ERIFLEX low-voltage power distribution products, nVent LENTON concrete reinforcement products and nVent CADDY fixings, fasteners and supports.

nVent ERICO's products are technically superior, meet or exceed international and industry code requirements and help prolong service life. As a global organization, nVent ERICO is experienced with regional codes, standards and practices, including OEM specs.

# Telecom

Grounding/earthing, lightning protection and surge protection are critical parts of a telecommunications facility installation. nVent ERICO has complete telecommunications applications solutions to help protect the facility against electrical noise, lightning induced surges and transients caused by switching components in the power systems.

nVent ERICO solutions include ground rods, ground mats, ground enhancing material (GEM), ground bars, Cadweld connections, lightning protection systems and MDF, co-axial and power surge protectors.

To make the application of these products simpler, the grounding, lightning protection and surge protection system at a telecommunications facility is divided into 5 components.

1. Indoor Bonding Arrangement
2. Outdoor Grounding Arrangement
3. Surge Protection for Power Lines
4. Surge Protection for Telephone Lines
5. Direct Strike Lightning Protection

nVent ERICO ground bars can be used to achieve the ideal indoor grounding arrangement as required at the telecommunications facility.

# Telecom

The outdoor arrangement of a grounding system at a telecommunications facility is depicted here. This arrangement is not always possible due to certain constraints at the site. Where the telecommunication equipment is installed in a large multi functional building or several floors above the ground floor this layout may not be possible.

Alternative outdoor ground electrode system needs to be considered on a case by case basis if the suggested layout below is not possible to implement.

nVent ERICO offers a full range of products to form the outdoor grounding system at a telecommunications facility.

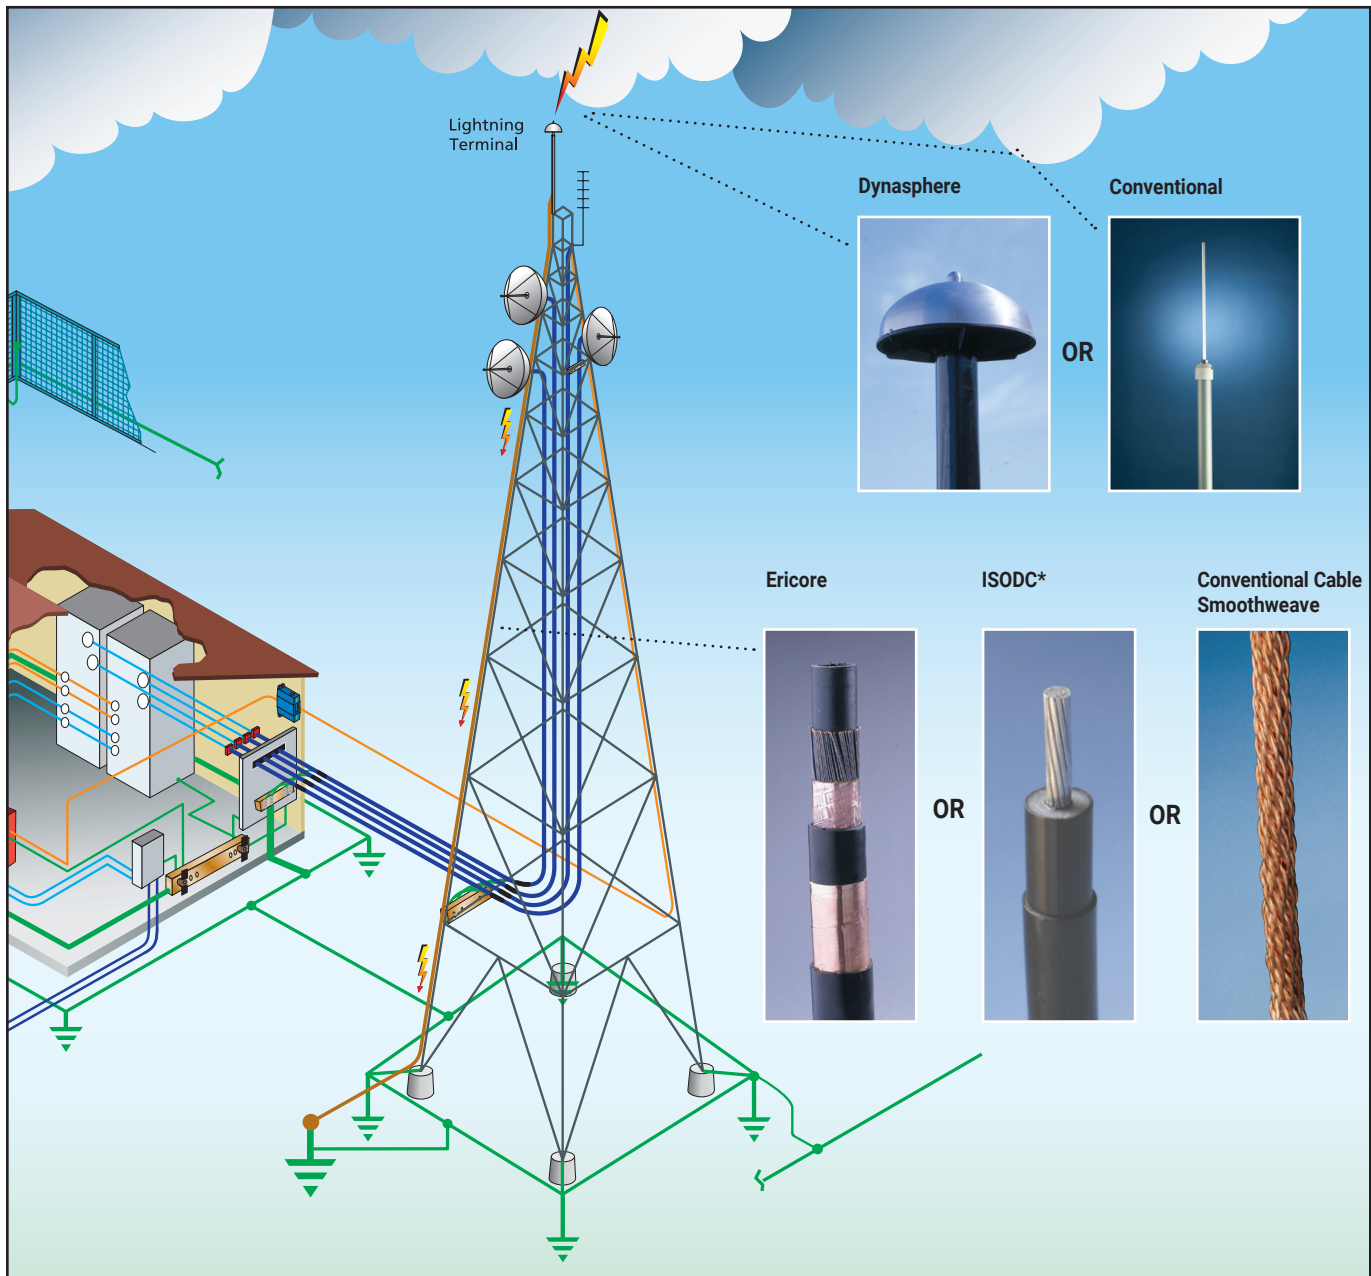

# Lightning Protection for Telecommunications Towers

Direct lightning strikes to telecommunications towers are a reasonably regular occurrence, more so on mountain tops and in certain parts of the world. The traditional approach to lightning protection on towers is to have a lightning rod on the top of the tower and a dedicated down conductor comprised of bare cable or tape that is installed on the tower to connect the lightning rod to the ground.

A modern method is to use an optimal air terminal design, the nVent ERICO Dynasphere mounted on top of the telecommunications mast on a 3-4 metres long fibreglass reinforced pole, FRP. The FRP provides isolation between the air terminal and the tower and helps ensure that the lightning

does not flash over and electrify the mast or the antenna. A special purpose downconductor, called the nVent ERICO Ericore is routed in the core of the FRP and connects to the bottom of the Dynasphere via a high voltage, impulse rated termination. The Ericore runs along a leg of the tower away from the routes of feeders, down to the tower grounding system. Ericore cable is designed to minimize the voltage between itself and the tower so that the bulk of the lightning energy is contained within the cable, thereby protecting the tower and feeders from conducted lightning currents and having much less reliance on bonding practices which sometimes are overlooked or completed incorrectly.

\* ISODC - is an isolated lightning protection cable system based around IEC62305. It is designed to isolate the lightning current from sensitive equipment, eliminating the need for separation distances required with conventional cable. Contact nVent ERICO for further information.

# Lightning Protection for Roof Mounted Installations

Traditionally, some rooftop installation have been protected by the use of air terminals (Franklin Lightning Rods), often connected to the building lightning protection system. However, the traditional building lightning protection techniques are not well suited to protect these roof top installations. Hence many telecommunications companies have opted not to provide any form of air terminal. Instead they do extensive bonding of all their roof mounted equipment.

The Isolated Downconductor System provides a modern approach to lightning protection for rooftop installations. The nVent ERICO brand of isolated systems provide a traditional air terminal fitted to an isolated fiberglass reinforced plastic (FRP) mast. The isolated downconductor internally connects to the air terminal inside the FRP. The FRP mast has natural isolation properties, high strength for windy sites and low weight to minimize mast loading.

The advantage is that this downconductor can be mounted directly on the mast or structure to be protected – without electrification of mounted equipment under lightning conditions.

# Connectors & Positioners

## HAMMERLOCK GROUND CLAMP

## FEATURED HIGHLIGHTS

- Irreversible connection with excellent mechanical strength
- Fast and simple installation requires only a hammer
- No special training required
- Low resistance connection
- Provides a visual indication of completed connection
- Allows for "T" or pass-through connections

The patented Hammerlock irreversible grounding connector mechanically connects the grounding conductor to the ground rod. Machined from highly conductive copper, the state-of-the-art Hammerlock provides a low resistance connection designed to withstand ground fault currents and lightning transients. The connector's mechanically rugged design will help ensure that the highest level of performance is maintained for many years after the connection has been buried in the harsh underground environment.

3/4" galvanized/stainless steel ground rod	Par.	Both	-	-

## GROUND ROD CLAMP, U-BOLT, TINNED, ONE CONDUCTOR

### FEATURED HIGHLIGHTS

- Ground rod clamp that allows up to three separate conductors to be connected to a ground rod
- Bronze material is a copper alloy with high copper content
- Tinned bronze has theft-deterrent appearance

Material: Bronze  
Finish: Tinned

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Conductor Size
GC065TH	5/8" - 3/4"	0.625" - 0.750"	2/0 Solid - 250 kcmil Stranded, 70 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded

## GROUND ROD CLAMP, U-BOLT SADDLE, ONE CONDUCTOR

### FEATURED HIGHLIGHTS

- Clamp that allows a conductor to be connected to a ground rod

Material: Copper Alloy

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Conductor Size
REP16120L	3/4"	0.68"	#4 Solid - 4/0 Stranded, 16 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded

**GROUND ROD CLAMP, U-BOLT, BARE, ONE CONDUCTOR****FEATURED HIGHLIGHTS**

- Accepts conductors in both parallel and perpendicular orientations
- For use with copper-bonded ground rods

Material: Copper, Bronze, Brass

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Conductor Size
GUV16070	5/8" - 1"	0.560" - 0.914"	#4 Solid - 2/0 Stranded, 16 mm <sup>2</sup> Stranded - 70 mm <sup>2</sup> Stranded
GUV70185	5/8" - 1"	0.560" - 0.914"	#4 Solid - 300 kcmil Stranded, 16 mm <sup>2</sup> Stranded - 185 mm <sup>2</sup> Stranded

**Conductor Orientation (Parallel or Perpendicular)**

Nominal Ground Rod Diameter	#4 Sol - 4/0 Sol	4/0 Str	250 kcmil Str	300 kcmil Str
5/8" copper-bonded ground rod	Both	Both	Both	Both
3/4" copper-bonded ground rod	Both	Both	Both	Both
1" copper-bonded ground rod	Both	Both	Both	-

**GROUND ROD CLAMP WITH PREFABRICATED PIGTAIL****FEATURED HIGHLIGHTS**

- Prefabricated assembly including grounding clamp with pigtail
- Fast and simple installation requires only a hammer

Material: Copper

Insulation: Green and Yellow Insulated Cable

Part Number	Ground Rod Diameter, Nominal	Length	Pigtail Length	Conductor Size	Unit Weight
EPT1225300	1/2"	2.8"	11.8'	25 mm <sup>2</sup> Stranded	1.1 lb
EPT1425350	5/8"	3.0"	13.8'	25 mm <sup>2</sup> Stranded	1.1 lb
EPT1435350	5/8"	3.0"	13.8'	35 mm <sup>2</sup> Stranded	1.1 lb
EPT1450350	5/8"	3.0"	13.8'	50 mm <sup>2</sup> Stranded	1.1 lb

## GROUND ROD SPLIT CLAMP, ROD TO TAPE

### FEATURED HIGHLIGHTS

- Used to connect a ground rod to a lug or to tape with a punched hole

Material: Gunmetal

Part Number	Ground Rod Diameter, Actual	Thread Size
RCC16	0.56" Max	M10
SRC15	0.58" Max	M10

## U-BOLT GROUND ROD CLAMP

### FEATURED HIGHLIGHTS

- Connects conductors to ground rods
- Listed to UL® 96

Material: Brass

Part Number	Conductor Size, UL	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Depth	Height	Width	Unit Weight
LPC795	Class 1 - Class 2 (4/0 Max)	1/2" - 3/4"	0.504" - 0.681"	1.66"	2 1/2"	2"	0.242 lb

## GROUND ROD CLAMP

### FEATURED HIGHLIGHTS

- Unique stamped body design will not crack as mechanical forces are increased
- Stainless steel threads will not strip if over-tightened
- Unique internal profile offers pull-out load in excess of four times the UL® 96 requirement
- Listed to UL® 96

Material: Copper

Part Number	Conductor Size, UL	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Height	Length	Width	Unit Weight
LPC790	Class 1 - Class 2 (4/0 Max)	1/2" - 3/4"	0.504" - 0.681"	1.65"	1 3/4"	0.94"	0.336 lb

## COMPRESSION COUPLER FOR COPPER-BONDED GROUND ROD, POINTED

### FEATURED HIGHLIGHTS

- Threadless compression coupler for use with pointed copper-bonded ground rods
- Inside of coupler is tapered so ground rod compresses during installation to form an irreversible conductive connection

Material: Steel  
Finish: ElectroGalvanized

Part Number	Ground Rod Diameter, Nominal	Length	Unit Weight	Complies With
CC12F	1/2"	2 3/4"	0.29 lb	
CC34	3/4"	2 3/4"	0.44 lb	IEC® EN 62561-2
CC58	5/8"	2 3/4"	0.32 lb	IEC® EN 62561-2

IEC® EN 62561-2 supercedes EN 50164-2.

## COMPRESSION COUPLER FOR GALVANIZED GROUND ROD, POINTED

Material: Steel  
Finish: Electrogalvanized

### FEATURED HIGHLIGHTS

- Threadless compression coupler for use with galvanized steel ground rods
- Inside of coupler is tapered so ground rod compresses during installation to form an irreversible conductive connection

Part Number	Ground Rod Diameter, Nominal	Length	Unit Weight
GCC34	3/4"	3 1/2"	0.36 lb
GCC58F	5/8"	3"	0.31 lb

## COMPRESSION COUPLER FOR STAINLESS STEEL GROUND ROD, POINTED

Material: Stainless Steel 304 (EN 1.4301)

### FEATURED HIGHLIGHTS

- Threadless compression coupler for use with pointed stainless steel ground rods in corrosive soils
- Inside of coupler is tapered so ground rod compresses during installation to form an irreversible conductive connection

Part Number	Ground Rod Diameter, Nominal	Length	Unit Weight	Certifications
CC34SS	3/4"	3 1/4"	0.34 lb	cULus
CC58SS	5/8"	3"	0.25 lb	cULus
CCSS14	14 mm	2 3/4"	0.10 lb	

## THREADED COUPLER FOR COPPER-BONDED GROUND ROD, SECTIONAL

### FEATURED HIGHLIGHTS

- High-strength couplings are threaded and chamfered at both ends for easy driving
- Corrosion-resistant couplings ensure permanent, low resistance copper-to-copper connections

Part Number	Ground Rod Diameter, Nominal	Length	Thread Size	Unit Weight	Certifications
<b>Material: Bronze</b>					
CR12S	9/16"	2.5"	9/16 UNC	0.16 lb	CSA, cULus
CR34	3/4"	3.0"	3/4 UNC	0.34 lb	CSA, cULus
CR58	5/8"	2.4"	5/8 UNC	0.23 lb	CSA, cULus
<b>Material: Silicon Bronze</b>					
CR100	1"	3.9"	1 UNC	0.78 lb	cULus

## THREADED COUPLER FOR STAINLESS STEEL GROUND ROD, SECTIONAL

### FEATURED HIGHLIGHTS

- Corrosion-resistant couplings ensure permanent, low-resistance connections between ground rods

Material: Stainless Steel 304 (EN 1.4301)

Part Number	Ground Rod Diameter, Nominal	Length	Thread Size	Unit Weight	Certifications
CR34SS	3/4"	3.06"	3/4 UNC	0.40 lb	cULus
CR58C E	5/8"	2.75"	5/8 UNC	0.26 lb	
CR58SS	5/8"	3.06"	5/8 UNC	0.27 lb	cULus

## GROUNDING BUSBAR CONNECTOR, SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- Used to connect Cu-Bond Round Conductor to grounding busbars

Material: Copper Alloy, Stainless Steel 18-8 (EN 1.4305)  
Finish: Tinned

Part Number	Height	Diameter	Hole Size	Thread Size	ERICO CU-BOND Conductor	Complies With
BCR8T	1.56"	0.79"	0.37"	M10	CBSC8	IEC® 62561-1

IEC compliance is valid only for ERICO CU-BOND Conductors listed.

## STAMPED BONDING PLATE

### FEATURED HIGHLIGHTS

- Stamped bonding plate suitable for structural steel applications
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Contact Area	Depth	Height	Width	Hole Size 1	Hole Size 2	Unit Weight
<b>Material: Copper – Finish: Bare</b>							
LPC540	8 in <sup>2</sup> Min	2 1/8"	1 1/4"	4 1/4"	0.2"	0.311"	0.560 lb
<b>Material: Copper – Finish: Tinned</b>							
LPC540L	8 in <sup>2</sup> Min	2 1/8"	1 1/4"	4 1/4"	0.2"	0.311"	0.560 lb
<b>Material: Copper, Aluminum, Stainless Steel 304 (EN 1.4301) – Finish: Bare</b>							
LPC540A	8 in <sup>2</sup> Min	2 1/8"	1 1/4"	4 1/4"	0.2"	0.311"	0.230 lb

Stainless steel separator included with LPC540A for bi-metallic applications.

## BONDING PLATE

### FEATURED HIGHLIGHTS

- Cast bonding plate for structural steel applications
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Contact Area	Depth	Height	Width	Hole Size	Unit Weight
<b>Material: Brass</b>						
LPC532	8 in <sup>2</sup> Min	2 7/8"	0.66"	2 7/8"	5/16"	0.640 lb
<b>Material: Brass – Finish: Tinned</b>						
LPC532L	8 in <sup>2</sup> Min	2 7/8"	0.66"	2 7/8"	5/16"	0.640 lb

## CAST BEAM BONDING CLAMP

### FEATURED HIGHLIGHTS

- Clamp for bonding cable to flat metal objects such as I-beams, angle irons and channel irons
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Flange Thickness	Depth	Width	Unit Weight
<b>Material: Copper – Finish: Bare</b>				
LPC559	1/4" Max	2 1/4"	1.6"	0.385 lb
<b>Material: Copper – Finish: Tinned</b>				
LPC559L	1/4" Max	2 1/4"	1.6"	0.385 lb

## CAST TWO BOLT BEAM BONDING CLAMP

### FEATURED HIGHLIGHTS

- Clamp for bonding cable to flat metal objects such as I-beams, angle irons and channel irons
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Flange Thickness	Depth	Height	Width	Contact Area	Unit Weight
<b>Material: Copper</b>						
LPC557	1" Max	2 3/4"	2"	4"	8 in <sup>2</sup> Min	2.055 lb
<b>Material: Copper — Finish: Tinned</b>						
LPC557L	1" Max	2 3/4"	2"	4"	8 in <sup>2</sup> Min	2.055 lb

## BEAM CLAMP FOR SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- Clamp for attaching solid round conductor such as Cu-Bond Round Conductor to flat metal objects such as I-beams, angle irons and channel irons
- For use with copper-bonded, copper, or stainless steel solid conductors

Material: Stainless Steel 316 (EN 1.4401)

Part Number	Width	Height	Depth	Flange Thickness	ERICO CU-BOND Conductor	Unit Weight	Complies With
SBCS0810	2.17"	3.35"	2.76"	1/4" – 1"	CBSC8, CBSC10	0.61 lb	IEC® 62561-4
SBCS1314	2.17"	3.54"	2.76"	1/4" – 1"	CBSC13, CBSC14	0.61 lb	IEC® 62561-4

IEC compliance is valid only for Cu-Bond Conductors listed.

## PREFABRICATED LUG BOND

### FEATURED HIGHLIGHTS

- Made with bare annealed copper cable
- Tinned copper NEMA® lugs welded to the cable with Cadweld connections

Prefabricated lug bonds are custom made to specifications. Common usage includes cable tray bonding and grounding, structure bonds, surge arrester leads and power jumpers.

### B21-2-1L-12

B21	Lug Bond Assembly	
2	Lug Configuration	2 = Double-Lug Bond, 1-Hole each on Straight Lugs 3 = Double-Lug Bond, 2-Holes each on Straight Lugs 6 = Single-Lug Bond Stub, 1-Hole on Straight Lug 7 = Single-Lug Bond Stub, 2-Holes on Straight Lug 8 = Single-Lug Bond Stub, 1-Hole on 45° Lug 9 = Single-Lug Bond Stub, 2-Holes on 45° Lug

## LAY-IN LUG

### FEATURED HIGHLIGHTS

- Often used in solar bonding lug applications
- Lay-in features allows for easy positioning
- Set screw hardware made of 304 stainless steel

Material: Copper, Stainless Steel 304 (EN 1.4301)  
Finish: Tinned

Part Number	Length	Width	Height	Hole Size	Thread Size	Conductor Size
EL6CADB	1.04"	0.39"	0.76"	0.22"	1/4 NF	#14 Solid - #4 Stranded, 2.5 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded

## SOLAR BONDING LUG

### FEATURED HIGHLIGHTS

- Bonds the frames and mounting structures of solar photo voltaic systems in accordance with NEC® requirements
- Copper alloy is corrosion resistant and galvanically compatible with copper grounding conductors and aluminum photovoltaic module frames
- Lay-in feature allows for easy positioning along multiple frames

Material: Bronze, Stainless Steel 18-8 (EN 1.4305)  
Finish: Tinned

Part Number	Direct Burial	Conductor Size	Hole Size	Screw Included	Thread Size
EL6CS	No	#14 Solid - #6 Stranded	0.221"	Yes	10 UNS
EL6CS8	No	#14 Solid - #6 Stranded	0.221"	Yes	8 UNS
EL6CSDB	Yes	#14 Solid - #6 Stranded	0.221"	Yes	10 UNS
EL6CSDB8	Yes	#14 Solid - #6 Stranded	0.221"	Yes	8 UNS
EL6CSDBNH	Yes	#14 Solid - #6 Stranded	0.221"	No	
EL6CSNH	No	#14 Solid - #6 Stranded	0.221"	No	

## TRANSFORMER TANK GROUNDING CONNECTOR WITH ROTATING EYE BOLT

### FEATURED HIGHLIGHTS

- Rotating eye bolt accommodates cable either vertically or horizontally
- Fits all EEI®-NEMA® distribution transformers
- No special tools required; use regular lineman's wrench

Material: Bronze, Stainless Steel 302 (EN 1.4324), Stainless Steel 304 (EN 1.4301)

Part Number	Conductor Size	Thread Size
TGC2/0	#10 Solid - 2/0 Stranded	1/2 UNC

## TRANSFORMER TANK GROUNDING CONNECTOR, EXTERNAL THREAD

### FEATURED HIGHLIGHTS

- Fits all EEI®-NEMA® distribution transformers
- No special tools required; use regular lineman's wrench

Material: Bronze

Part Number	Conductor Size	Thread Size
Finish: Tinned		
CC207	#6 Solid - 1/0 Stranded	1/2 UNC

## TRANSFORMER TANK GROUNDING CONNECTOR, INTERNAL THREAD

### FEATURED HIGHLIGHTS

- Fits all EEI®-NEMA® distribution transformers
- No special tools required; use regular lineman's wrench

Material: Bronze, Stainless Steel 304 (EN 1.4301)

Part Number	Conductor Size	Thread Size
VC207IT	#6 Solid - 1/0 Stranded	3/8 UNC

## EARTH BOSS

### FEATURED HIGHLIGHTS

- Provides preferential equipotential bonding connection point

Material: Stainless Steel 316 (EN 1.4401), Steel

Part Number	Length	Diameter	Thread Size
50010EBOSS	1.97"	1.97"	M10

The surface of the earth boss needs to be cleaned before welding. Welding procedures vary, depending on the type of steel used.

## 516 PARALLEL CABLE CONNECTOR

### FEATURED HIGHLIGHTS

- Cable splice with positive single bolt tension grip on cable or wire
- For use with all full size cables on Class I/II structures
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Depth	Width	Unit Weight
<b>Material: Copper – Finish: Bare</b>			
LPC516	1.84"	1 1/2"	0.40 lb
<b>Material: Copper – Finish: Tinned</b>			
LPC516L	1.84"	1 1/2"	0.40 lb
<b>Material: Copper, Aluminum, Stainless Steel 18-8 (EN 1.4305) – Finish: Bare</b>			
LPC516A	1.84"	1 1/2"	0.26 lb

## 517 PARALLEL CABLE CONNECTOR

### FEATURED HIGHLIGHTS

- Cable splice with positive two bolt tension grip on cable or wire
- For use with all full size cables on Class I/II structures
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Depth	Width	Unit Weight
<b>Material: Copper</b>			
LPC517	1.91"	1.66"	0.514 lb
<b>Material: Copper – Finish: Tinned</b>			
LPC517L	1.91"	1.66"	0.514 lb

## CABLE CLAMP

### FEATURED HIGHLIGHTS

- Clamps to flat metal objects such as I-beams, angle irons and channel irons
- Can be used as a parallel conductor clamp
- Positive bolt tension draws tight on steel member to UL® 96
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max), Secondary

Part Number	Flange Thickness	Depth	Width	Unit Weight
<b>Material: Brass</b>				
LPC858	1/2" Max	1.66"	0.89"	0.240 lb
<b>Material: Brass – Finish: Tinned</b>				
LPC858L	1/2" Max	1.66"	0.89"	0.240 lb

Flange thickness will impact the maximum cable holding capability.

## STAMPED BOLTED PARALLEL CABLE CONNECTOR

## FEATURED HIGHLIGHTS

- For positive bolt tension cable clamping
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Depth	Height	Width	Unit Weight
<b>Material: Copper</b>				
LPC502	1 1/2"	1 1/2"	1.78"	0.215 lb
<b>Material: Copper — Finish: Tinned</b>				
LPC502L	1 1/2"	1 1/2"	1.78"	0.215 lb
<b>Material: Copper, Aluminum, Stainless Steel 304 (EN 1.4301)</b>				
LPC502A	1 1/2"	1 1/2"	1.78"	0.194 lb

Stainless steel separator included with LPC502A for bi-metallic applications.

## JUMPER CLAMP FOR TELECOM

## FEATURED HIGHLIGHTS

- For use in telecom applications

Material: Bronze  
Finish: Tinned

Part Number	Width	Thread Size	Conductor Size
KUL	1.4"	5/16 UNC	#6 Solid

Although a #6 Solid conductor is similar in size to a metric 16 mm<sup>2</sup> Solid conductor, the UL listing is currently only for #6 Solid.

## CROSS-RUN CABLE CONNECTORS, SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- Can be used as a cross-run cable connector
- Four bolts for positive bolt tension grip on cables
- For use with Cu-Bond Round Conductors

Material: Brass

Part Number	Depth	Height	Width	ERICO CU-BOND Conductor	Unit Weight	Complies With
LPC595NB	2"	1"	2"	CBSC8, CBSC10	0.62 lb	IEC® 62561-1

IEC compliance is valid only for Cu-Bond Conductors listed.

## T-CONNECTOR

### FEATURED HIGHLIGHTS

- For 90° conductor connections

Part Number	Conductor Size	Depth	Height	Width	ERICO CU-BOND Conductor	Unit Weight	Complies With
<b>Material: Brass</b>							
CTR8CU	8 mm Solid, 10 mm Solid	0.83"	1.81"	1.58"	CBSC10	0.37 lb	IEC® 62561-1
<b>Material: Zinc Alloy</b>							
CTR10	8 mm Solid, 10 mm Solid	0.80"	1.92"	1.04"		0.26 lb	

IEC compliance is valid only for Cu-Bond Conductors listed.

## IN-LINE CABLE CONNECTOR

### FEATURED HIGHLIGHTS

- Cable splicer with four bolts for pressure on each cable
- LPC513 is compatible with Cu-Bond Round Conductors

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Diameter 1	Diameter 2	Width	Cu-Bond Conductor	Unit Weight	Complies With
<b>Material: Copper</b>						
LPC513	3/4"	0.563"	3 1/4"	CBSC8, CBSC10, CBSC13	0.37 lb	IEC® 62561-1
<b>Material: Copper – Finish: Tinned</b>						
LPC513L	3/4"	0.563"	3 1/4"		0.37 lb	

IEC compliance is valid only for ERICO CU-BOND Conductors listed.

## MESH BONDING NETWORK CONNECTOR, MBNC240

### FEATURED HIGHLIGHTS

- Allows for fast, simple and economical field connection of grounding and bonding wires
- Heavy duty clamps with stainless steel hardware are suitable for direct burial
- Can accommodate additional pigtails that can be used to connect to building steel and equipment
- Can be combined with Universal Pedestal Clamp for bonding to various pedestal sizes for mesh bonding networks

For complete pedestal clamp assembly, reference part MBNUPCJ240

Material: Copper, Stainless Steel 304 (EN 1.4301)

Part Number	Conductor Size	Cu-Bond Conductor	Complies With	Standard Packaging Quantity
MBNC240	#2 Solid - 4/0 Stranded, 35 mm <sup>2</sup> - 100 mm <sup>2</sup>	CBSC8, CBSC10, CBSC13	IEC® 62561-1	25 pc

IEC compliance is valid only for Cu-Bond Conductors listed.

## MESH BONDING NETWORK CONNECTOR, MBNC240A

For complete pedestal clamp assembly, reference part number MBNUPCJ240

### FEATURED HIGHLIGHTS

- Allows for fast, simple and economical field connection of grounding and bonding wires
- Heavy duty clamps with stainless steel hardware are suitable for direct burial
- Can be combined with Universal Pedestal Clamp for bonding to various pedestal sizes for mesh bonding networks

Material: Copper, Stainless Steel 304 (EN 1.4301)

Part Number	Conductor Size	Standard Packaging Quantity
MBNC240A	#2 Solid - 4/0 Stranded, 35 mm <sup>2</sup> - 100 mm <sup>2</sup>	25 pc

## MESH BONDING NETWORK CONNECTOR, MBNC82

For complete pedestal clamp assembly, reference part number MBNUPJ82

### FEATURED HIGHLIGHTS

- Allows for fast, simple and economical field connection of grounding and bonding wires
- Heavy duty clamps with stainless steel hardware are suitable for direct burial
- Can accommodate additional pigtails that can be used to connect to building steel and equipment
- Can be combined with Universal Pedestal Clamp for bonding to various pedestal sizes for mesh bonding networks

Material: Bronze, Stainless Steel 304 (EN 1.4301)

Part Number	Conductor Size	Standard Packaging Quantity
MBNC82	#8 Solid - #2 Stranded, 10 mm <sup>2</sup> Solid - 35 mm <sup>2</sup> Stranded	25 pc

## SRG CONNECTOR

## FEATURED HIGHLIGHTS

- Allows for fast, simple and economical field connection of grounding and bonding wires
- Heavy duty clamps with stainless steel hardware are suitable for direct burial
- Can accommodate additional pigtails that can be used to connect to building steel and equipment
- Can be combined with Universal Pedestal Clamp for bonding to various pedestal sizes for mesh bonding networks

Material: Bronze, Stainless Steel 304 (EN 1.4301)

Part Number	Conductor Size
SRGC46	#6 Solid - #4 Stranded, 16 mm <sup>2</sup> Stranded

## SPLIT BOLT CONNECTOR

## FEATURED HIGHLIGHTS

- Unplated high-strength silicon bronze accommodates copper to copper connections
- Tin plated, high-strength copper alloy split bolt with spacer separates dissimilar conductors and accommodates copper-to-copper, copper-to-aluminum and aluminum-to-aluminum connections

Material: Silicon Bronze

Part Number	Conductor Size	Certifications
<b>Tin Plating: No</b>		
ESB2	#6 Solid - #2 Stranded, 16 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	cULus
ESB2/0	#2 Solid - 2/0 Stranded, 35 mm <sup>2</sup> Stranded - 50 mm <sup>2</sup> Stranded	UL
ESB4	#8 Solid - #4 Solid, 10 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	cULus
ESB4/0	1/0 Solid - 250 kcmil Stranded, 70 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded	
ESB6	#10 Solid - #6 Stranded, 6 mm <sup>2</sup> Stranded - 10 mm <sup>2</sup> Stranded	cULus
ESB8	#16 Stranded - #8 Stranded, 1.5 mm <sup>2</sup> Stranded - 6 mm <sup>2</sup> Stranded	cULus
<b>Tin Plating: Yes</b>		
ESBP1/0	#6 Solid - 1/0 Stranded, 16 mm <sup>2</sup> Stranded - 50 mm <sup>2</sup> Stranded	UL
ESBP2	#8 Solid - #2 Stranded, 10 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	UL
ESBP2/0	#8 Solid - 2/0 Stranded, 10 mm <sup>2</sup> Stranded - 50 mm <sup>2</sup> Stranded	UL
ESBP350	3/0 Stranded - 350 kcmil Stranded, 95 mm <sup>2</sup> Stranded - 150 mm <sup>2</sup> Stranded	
ESBP4	#8 Solid - #3 Stranded, 10 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	UL
ESBP4/0	#4 Stranded - 250 kcmil Stranded, 25 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded	
ESBP6	#10 Stranded - #6 Stranded, 6 mm <sup>2</sup> Stranded - 10 mm <sup>2</sup> Stranded	UL
ESBP8	#14 Stranded - #8 Stranded, 2.5 mm <sup>2</sup> Stranded - 6 mm <sup>2</sup> Stranded	UL

## WISE CLAMP

### FEATURED HIGHLIGHTS

- Used to splice two conductors together

Material: Bronze

Part Number	Conductor Size
VC62	#6 Solid - #2 Solid, 16 mm <sup>2</sup> Solid - 25 mm <sup>2</sup> Solid

## WISE CLAMP FOR TELECOM

### FEATURED HIGHLIGHTS

- Used to bond messenger wire to ground tap conductors
- When clamp is tightened, the piercing teeth puncture the insulation on the messenger wire, forming a positive ground connection without stripping the cable

Material: Copper Alloy, Stainless Steel 304 (EN 1.4301)  
 Finish: Tinned

Part Number	Height	Width	Depth	Diameter	Thread Size	Unit Weight
EVC167P	1 5/8"	1 1/4"	1"	0.146" – 0.312"	5/16 UNC	0.21 lb

## MULTI-PURPOSE GROUNDING CLAMP, STAINLESS STEEL

### FEATURED HIGHLIGHTS

- Convenient multi-purpose clamp designed to accommodate round conductors, flat conductors, ground rods and rebar
- Stainless steel material with inner plate allows compatibility between most dissimilar metals

Material: Stainless Steel 304 (EN 1.4301)

Conductor Size: 35 mm<sup>2</sup> Stranded - 50 mm<sup>2</sup> Stranded, #2 Stranded - 1/0 Solid

Tape Size: 40 x 4 mm Max

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Rebar Size, Metric	Rebar Size, US	Rebar Size, Canada	Length	Width
MPSC404SS	5/8" – 3/4"	0.561" – 0.750"	16 – 20 mm	#5 – #6	15M – 20M	2.6"	2.6"

## UNIVERSAL CLAMP, SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- For parallel connections of Cu-Bond Round Conductor

Material: Brass

Part Number	Depth	Width	ERICO CU-BOND Conductor	Unit Weight	Complies With
LPC466B	1 1/4"	2 1/2"	CBSC10, CBSC13	0.615 lb	IEC® 62561-1

IEC compliance is valid only for ERICO CU-BOND Conductors listed.

## WATER PIPE GROUND CLAMP

### FEATURED HIGHLIGHTS

- High-strength silicone bronze
- Used for connecting copper conductors to metallic water pipe or ground rods

Part Number	Pipe Size, Nominal	Conductor Size	Certifications
<b>Material: Silicon Bronze</b>			
CWP1JJ	1/2" – 1"	#10 Solid - #4 Stranded, 6 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	
CWP1JU	1/2" – 1"	#10 Solid - #2 Stranded, 6 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	CSA, cULus
CWP2JU	1 1/4" – 2"	#10 Solid - #2 Stranded, 6 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	CSA, cULus
CWP4J	2 1/2" – 4"	#10 Solid - #4 Stranded, 6 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	CSA, cULus
CWP6J	4 1/2" – 6"	#10 Solid - #4 Stranded, 6 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	CSA
<b>Material: Zinc Alloy</b>			
ZWP1J	1/2" – 1"	#10 Solid - #6 Solid, 6 mm <sup>2</sup> Stranded - 10 mm <sup>2</sup> Stranded	cULus

Optional copper screw for use in direct burial applications.

## WATER/GAS PIPE GROUND CLAMP

### FEATURED HIGHLIGHTS

- High-strength silicone bronze
- Used for connecting copper conductors to metallic water pipe, ground rods, or flexible gas pipe (CSST) with brass hex fittings
- Conform to the requirements of the 2009 edition of NFPA® 54, NFGC® (National Fuel Gas Code) and NEC® (National Electric Code) for bonding corrugated stainless steel tubing (CSST) gas piping systems to the grounding conductor of the building's electrical system
- SH version for outdoor applications

Material: Silicon Bronze

Part Number	Pipe Size, Nominal	Hex Width	Conductor Size	Certifications
<b>For Outdoor Use: No</b>				
CWP1J	1/2" – 1"	1" – 1 1/4"	#10 Solid - #2 Solid, 6 mm <sup>2</sup> Solid - 25 mm <sup>2</sup> Stranded	CSA, cULus
CWP2J	1 1/4" – 2"	1 1/2" – 2 1/8"	#10 Solid - #2 Stranded, 6 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	CSA, cULus
CWP3J	2 1/2" – 4"	2 1/2" – 3 1/8"	#10 Solid - #4 Stranded, 6 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	cULus
<b>For Outdoor Use: Yes</b>				
CWP1JSH	1/2" – 1"	1" – 1 1/4"	#10 Solid - #2 Stranded, 6 mm <sup>2</sup> Stranded - 25 mm <sup>2</sup> Stranded	cULus
CWP2JSH	1 1/4" – 2"	1 1/2" – 2 1/8"	#10 Solid - #2 Stranded, 6 mm <sup>2</sup> Solid - 25 mm <sup>2</sup> Stranded	cULus
CWP3JSH	2 1/2" – 4"	2 1/2" – 3 1/8"	#10 Solid - #4 Stranded, 6 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	cULus

## CAST PIPE CLAMP

### FEATURED HIGHLIGHTS

- Clamp for bonding horizontal or vertical pipes to the lightning protection system
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max), Secondary

Part Number	Outer Diameter	Depth	Width	Unit Weight
<b>Material: Brass – Finish: Bare</b>				
LPC580	0.75" – 1.32"	1 1/2"	2 3/4"	0.59 lb
<b>Material: Brass – Finish: Tinned</b>				
LPC580L	0.75" – 1.32"	1 1/2"	2 3/4"	0.59 lb

## CAST U-BOLT PIPE CLAMP

### FEATURED HIGHLIGHTS

- Clamp for bonding conductor to handrails, pipes and rebar to lightning protection system
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max), Secondary

Part Number	Outer Diameter	Depth	Height	Width	Unit Weight
<b>Material: Brass – Finish: Bare</b>					
LPC570	0.68" – 1.50"	1.8"	3"	2.67"	0.715 lb
<b>Material: Brass – Finish: Tinned</b>					
LPC570L	0.68" – 1.50"	1.8"	3"	2.67"	0.715 lb

## NOTCHED CAST U-BOLT PIPE CLAMP

### FEATURED HIGHLIGHTS

- Clamp for bonding of handrails and pipes to the lightning protection system
- Notched hole makes assembly easy and eliminates loose hardware
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Outer Diameter	Depth	Height	Width	Unit Weight
<b>Material: Aluminum – Finish: Bare</b>					
LPA571	2" – 2 1/2"	1.96"	3 1/2"	3.63"	0.400 lb
<b>Material: Brass – Finish: Bare</b>					
LPC571	2" – 2 1/2"	1.96"	3 1/2"	3.63"	0.835 lb
<b>Material: Brass – Finish: Tinned</b>					
LPC571L	2" – 2 1/2"	1.96"	3 1/2"	3.63"	0.835 lb

## PIPE TO RIGID CONDUIT GROUND CLAMP

### FEATURED HIGHLIGHTS

- For use in grounding rigid conduit systems to metallic water pipe

Material: Bronze

Part Number	Water Pipe Size	Rigid Conduit Size	Conductor Size
CWP1JH12	1/2" – 1"	1/2"	#10 Solid - #6 Solid
CWP1JH34	1/2" – 1"	3/4"	#10 Solid - 2/0 Stranded
CWP2JH34	1 1/4" – 2"	3/4"	#10 Solid - 2/0 Stranded
CWP2JH44	1 1/4" – 2"	1"	#10 Solid - 3/0 Stranded
CWP4JH34	2 1/2" – 4"	3/4"	#10 Solid - 2/0 Stranded

## STAMPED U-BOLT PIPE CLAMP

### FEATURED HIGHLIGHTS

- Clamp for bonding of pipes and exhaust stacks to the lightning protection system
- Listed to UL® 96

Part Number	Outer Diameter	Depth	Height	Width	Unit Weight
<b>Material: Copper, Stainless Steel 304 (EN 1.4301)</b>					
LPC5964	3.900" – 4.625"	2"	5 13/16"	6.250"	0.885 lb
LPC5966	0.438" – 6.858"	2"	8 13/16"	8.313"	0.820 lb

## STAMPED U-BOLT PIPE CLAMP, 90°

### FEATURED HIGHLIGHTS

- Clamp for bonding of pipes, handrails and exhaust stacks to the lightning protection system
- Listed to UL® 96

Conductor Size, UL: Class 1 - Class 2 (4/0 Max)

Part Number	Outer Diameter	Depth	Height	Width	Unit Weight
<b>Material: Copper, Stainless Steel 304 (EN 1.4301)</b>					
LPC5962	1.900" – 2.625"	2"	3.625"	4.675"	0.515 lb
LPC5963	2.630" – 3.630"	2"	4.693"	5.500"	0.763 lb

## THIN WALL PIPE GROUND CLAMP ASSEMBLY

### FEATURED HIGHLIGHTS

- Tinned copper strap draws tightly around pipe
- All hardware is included
- Includes emery cloth and anti-oxidant compound
- Conductor stub is easily spliced to ground conductor
- Cadweld connection of conductor to strap eliminates a mechanical interface

Material: Copper, Silicon Bronze  
Finish: Tinned

Part Number	Width	Water Pipe Size	Conductor Size	Cable Length
B852A12C1G96	2"	3" – 12"	#6 Solid	96'
B852A12C2Q60	2"	3" – 12"	4/0 Concentric	60'
B852A8C1G48	2"	3" – 8"	#6 Solid	48'
B852A8C1G96	2"	3" – 8"	#6 Solid	96'

## CABLE/POINT PIPE SUPPORT

### FEATURED HIGHLIGHTS

- Clamp for bonding horizontal or vertical pipes to the lightning protection system
- May be used as a vertical support for air terminals
- Listed to UL® 96

Part Number	Diameter	Outer Diameter	Depth	Width	Unit Weight
<b>Material: Brass – Finish: Bare</b>					
LPC330	3/8"	1.40" – 1.75"	1 5/8"	3.5"	0.790 lb
LPC331	3/8"	1.85" – 2.75"	1 5/8"	3.9"	0.835 lb
<b>Material: Brass – Finish: Tinned</b>					
LPC330L	3/8"	1.40" – 1.75"	1 5/8"	3.5"	0.790 lb
LPC331L	3/8"	1.85" – 2.75"	1 5/8"	3.9"	0.835 lb

## FENCE CLAMP, ONE CONDUCTOR

### FEATURED HIGHLIGHTS

- Theft-deterrent appearance
- Stainless steel hardware included
- Tin plating minimizes the risk of corrosion
- The clamp accepts the conductor either in parallel or at right angles to the pipe

Material: Bronze, Stainless Steel 304 (EN 1.4301)

Finish: Tinned

Part Number	Fence Post Size, Nominal	Fence Post Outside Diameter, Actual	Conductor Size	Cu-Bond Conductor	Complies With	Certifications
FC073	1 1/2"	1.90"	#4 Solid - 2/0 Stranded, 16 mm <sup>2</sup> Stranded - 70 mm <sup>2</sup> Stranded			
FC074	1 1/2"	1.90"	2/0 Solid - 250 kcmil Stranded, 50 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded			
FC075	2"	2.38"	#4 Solid - 2/0 Stranded, 16 mm <sup>2</sup> Stranded - 70 mm <sup>2</sup> Stranded	CBSC8	IEC® 62561-1	cULus
FC076	2"	2.38"	2/0 Solid - 250 kcmil Stranded, 50 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded	CBSC10, CBSC13	IEC® 62561-1	
FC078	2 1/2"	2.88"	2/0 Solid - 250 kcmil Stranded, 16 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded			
FC079	3"	3.50"	#4 Solid - 2/0 Stranded, 16 mm <sup>2</sup> Stranded - 70 mm <sup>2</sup> Stranded			
FC080	3"	3.50"	2/0 Solid - 250 kcmil Stranded, 50 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded			
FC082	3 1/2"	4.00"	#4 Solid - 2/0 Stranded, 16 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded			

IEC compliance is valid only for Cu-Bond Conductors listed.

## FENCE CLAMP, TWO CONDUCTORS

### FEATURED HIGHLIGHTS

- Theft-deterrent appearance
- Stainless steel hardware included
- Tin plating minimizes the risk of corrosion

Material: Copper Alloy, Stainless Steel 304 (EN 1.4301)

Finish: Tinned

Part Number	Fence Post Size, Nominal	Fence Post Outside Diameter, Actual	Conductor Size
FC076DH	2"	2.38"	2/0 Solid - 250 kcmil Stranded, 50 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded
FC078DH	2 1/2"	2.88"	2/0 Solid - 250 kcmil Stranded, 16 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded
FC082DH	3 1/2"	4.00"	#4 Solid - 2/0 Stranded, 16 mm <sup>2</sup> Stranded - 120 mm <sup>2</sup> Stranded

## FENCE CLAMP FOR FIELD-WELDED CONNECTIONS

### FEATURED HIGHLIGHTS

- Ideal for when Cadweld connections cannot be made to aluminum pipe or thin-wall steel tube
- Stainless steel hardware included
- Can be used when field-welding conductors

Material: Electrolytic Copper  
Finish: Tinned

Part Number	Fence Post Size, Nominal	Fence Post Outside Diameter, Actual
B522B	1 1/4"	1.66"
B522C	1 1/2"	1.90"
B522D	2"	2.38"
B522E	2 1/2"	2.88"
B522F	3"	3.50"
B522G	3 1/2"	4.00"
B522H	4"	4.50"
B522K	6"	6.63"

## FLEXIBLE JUMPER FOR FENCE AND GATE GROUNDING

### FEATURED HIGHLIGHTS

- Used to bond gates, switch operating handles and any other item where movement or vibration requires a flexible grounding jumper
- Multi-stranded insulated ropelay conductor provides flexibility and strand protection
- Swaged ends of jumper allow larger conductor to fit in the same mold as concentric conductor
- Connections are made with Cadweld exothermic connections using the same mold required for other fence post connections

Part Number	Article Number	Color Code Ring

## PREFABRICATED FENCE CLAMP ASSEMBLY WITH SINGLE GROUND LEAD

### FEATURED HIGHLIGHTS

- Ideal for when Cadweld connections cannot be made to aluminum pipe or thin-wall steel tube
- Stainless steel hardware included
- Available in either left or right-hand orientation

Material: Copper, Polyethylene Rubber

"Fixed gate" refers to the pipe on the fence itself, while "post frame" refers to the post on the swinging door. Left hand orientation shown in diagram.

### PREFABRICATED GATE JUMPER ASSEMBLY WITH GROUND LEADS

#### FEATURES

- Ideal for when Cadweld connections cannot be made to aluminum pipe or thin-wall steel tube
- Jumper conductor is insulated
- Stainless steel hardware included
- Available in either left or right-hand orientation

A239-EB-2S-24-2Q-4-RH

"Fixed gate" refers to the pipe on the fence itself, while "post frame" refers to the post on the swinging door. Left hand orientation shown in diagram.

### REBAR GROUNDING CLAMP, PARALLEL

#### FEATURED HIGHLIGHTS

- Universal use for rebar, rods or pipes
- Lay-in feature cuts installation time
- Bronze alloy construction with Stainless Steel 304 screws
- Approved for direct burial in earth and concrete

Material: Bronze, Stainless Steel 304 (EN 1.4301)

Connection Type: Parallel

Conductor Size:

Part Number	Ground Rod Diameter, Actual	Water Pipe Size	Rebar Size, Metric	Rebar Size, US	Rebar Size, Canada
EK16	0.5" – 1.0"	1/2" – 1"	12 – 25 mm	#4 – #8	10M – 25M

## REBAR GROUNDING CLAMP, PERPENDICULAR

Material: Bronze, Stainless Steel 304 (EN 1.4301)  
 Connection Type: Perpendicular  
 Conductor Size:

### FEATURED HIGHLIGHTS

- Universal use for rebar, rods or pipes
- Lay-in feature cuts installation time
- Bronze alloy construction with Stainless Steel 304 screws
- Approved for direct burial in earth and concrete

Part Number	Ground Rod Diameter, Actual	Water Pipe Size	Rebar Size, Metric	Rebar Size, US	Rebar Size, Canada
EK17	0.5" – 1.0"	1/2" – 1"	12 – 25 mm	#4 – #8	10M – 25M

## REBAR GROUNDING CLAMP, HEAVY DUTY

### FEATURED HIGHLIGHTS

- Provides two connection points to concrete encased electrodes (rebar) for states where the Authority Having Jurisdiction (AHJ) requires it
- Meets 2005 NEC® standard requirement for bonding to rebar into the grounding system
- Has high-strength bronze alloy construction
- Easy to install

Part Number	Rebar Size, Metric	Rebar Size, US	Rebar Size, Canada
<b>Conductor Size: #8 Solid - 2/0 Stranded, 10 mm<sup>2</sup> Stranded - 70 mm<sup>2</sup> Stranded</b>			
RC70	8 – 18 mm	#3 – #6	10M – 20M
<b>Conductor Size: #8 Solid - 4/0 Stranded, 10 mm<sup>2</sup> Stranded - 100 mm<sup>2</sup> Stranded</b>			
RC100	18 – 36 mm	#6 – #11	20M – 35M

## REBAR BONDING CLAMP

Material: Brass

Conductor Size, UL: Class 2 (4/0 Max)

### FEATURED HIGHLIGHTS

- Provides bond from lightning protection system to rebar

Part Number	Rebar Size, Canada	Rebar Size, Metric	Rebar Size, US	Depth	Width	Unit Weight
LPC466	10M Max	29 mm Max	#9 Max	1 1/4"	2 1/2"	0.615 lb

## ARC WELDABLE BOND

Material: Copper, Steel

### FEATURED HIGHLIGHTS

- 19-strand concentric cable flash-welded to steel rod for a bonding connection to structural steel and to rebar
- Economical alternative to exothermic welding when only a few connections need to be made and an arc welder is available on site
- Rod is sized to match the ampacity of the cable for fault currents

Part Number	Conductor Size	Cable Length	Rod Size	Rod Length
EWB2G9164	2/0 Stranded	4'	9/16"	8"
EWB2L584	3/0 Stranded	4'	5/8"	8"
EWB2Q344	4/0 Stranded	4'	3/4"	8"
EWBCS701	70 mm <sup>2</sup> Stranded	3'	1/2"	8"

## UNIVERSAL PEDESTAL CLAMP WITH CABLE MANAGEMENT, MBNUPCJ240

For individual connector, reference part number MBNC240A

Material: Copper, Steel, Stainless Steel 304 (EN 1.4301)  
Finish: nVent CADDY Armour, Electrogalvanized

Part Number	Conductor Size	Pedestal Size	Standard Packaging Quantity
MBNUPCJ240	#2 Solid - 4/0 Stranded, 35 mm <sup>2</sup> - 100 mm <sup>2</sup>	7/8" - 2" Round or Square	25 pc

### FEATURED HIGHLIGHTS

- Only one attachment required for both mesh bonding and cable management
- Eliminates the need for separate mounting brackets for different pedestal types or sizes
- Stainless steel construction of bracket and hardware reduces potential for galvanic corrosion
- Mesh bonding conductors do not have to bend around each pedestal to conform to grid pattern
- Suitable for round or square pedestals

## UNIVERSAL PEDESTAL CLAMP WITH CABLE MANAGEMENT, MBNUPCJ82

For individual connector, reference part number MBNC82

Material: Copper, Steel, Stainless Steel 304 (EN 1.4301)  
Finish: nVent CADDY Armour, Electrogalvanized

Part Number	Conductor Size	Pedestal Size	Standard Packaging Quantity
MBNUPCJ82	#8 Solid - #2 Stranded, 10 mm <sup>2</sup> Solid - 35 mm <sup>2</sup> Stranded	7/8" - 2" Round or Square	25 pc

### FEATURED HIGHLIGHTS

- Only one attachment required for both mesh bonding and cable management
- Eliminates the need for separate mounting brackets for different pedestal types or sizes
- Stainless steel construction of bracket and hardware reduces potential for galvanic corrosion
- Mesh bonding conductors do not have to bend around each pedestal to conform to grid pattern
- Suitable for round or square pedestals

## SRG CONNECTOR PEDESTAL MOUNTING BRACKET

### FEATURED HIGHLIGHTS

- Only one attachment required for both mesh bonding and cable management
- Eliminates the need for separate mounting brackets for different pedestal types or sizes
- Stainless steel construction of bracket and hardware reduces potential for galvanic corrosion
- Mesh bonding conductors do not have to bend around each pedestal to conform to grid pattern
- Suitable for round or square pedestals

Material: Stainless Steel 304 (EN 1.4301), Bronze

Part Number	Pedestal Size	Standard Packaging Quantity
SRGC46BR	7/8" Square; 1" Round	10 pc

## COMMON BONDING NETWORK JUMPER

### FEATURED HIGHLIGHTS

- Helps to achieve a secure electrical connection in telecommunications
- Stranded wire allows for small radius bends
- Tinned copper lug and hardware included

Material: Steel, Copper  
 Finish: Electrogalvanized, Tinned  
 Number of Wires: 7  
 Insulation: Green Insulated Conductor

Part Number	Length	Width	A	Thickness	Hole Size	Slot Size	Angle	Conductor Size	Cable Length	Standard Packaging Quantity
CBNJ09	1.27"	0.48"	0.57"	0.08"	0.27"	0.27" x 0.40"	45°	#6 Stranded	9'	25 pc
CBNJ09P10	1.27"	0.48"	0.57"	0.08"	0.27"	0.27" x 0.40"	45°	#6 Stranded	9'	5 x 10 pc

## COPPER LUG MECHANICAL CONNECTOR

### FEATURED HIGHLIGHTS

- Simple to use and install
- Suitable for telecom and equipotential bonding applications

Material: Copper

Part Number	Conductor Size	Thread Size	Hole Size
EL4	#14 Solid - #4 Stranded, 2.5 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	5/16 UNF	0.3"

## FLUSH MOUNT POSITIONER, SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- Flush-mount positioning clamps for use with solid round conductors, including Cu-Bond Round Conductor
- For use with copper-bonded, copper, or stainless steel solid conductors

Material: Stainless Steel 18-8 (EN 1.4305), Stainless Steel 316 (EN 1.4401)

Part Number	Width 1	Width 2	Height 1	Height 2	Depth	Cu-Bond Conductor	Unit Weight	Complies With
CSS0810000	3.74"	3.15"	0.79"	0.2"	0.67"	CBSC8, CBSC10	0.2 kg	IEC® 62561-4
CSS1314000	3.74"	3.15"	0.79"	0.2"	0.67"	CBSC13, CBSC14	0.2 kg	IEC® 62561-4
CSS1618000	3.74"	3.15"	0.98"	0.2"	0.67"	CBSC16, CBSC18	0.2 kg	IEC® 62561-4

IEC compliance is valid only for Cu-Bond Conductors listed.

## 50 MM OFFSET POSITIONER, SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- Positioning clamps with 50 mm (1.97") offset for use with solid round conductors, including Cu-Bond Round Conductor
- For use with copper-bonded, copper, or stainless steel solid conductors

Material: Stainless Steel 18-8 (EN 1.4305), Stainless Steel 316 (EN 1.4401)

Part Number	Width 1	Width 2	Height 1	Height 2	Depth	Cu-Bond Conductor	Unit Weight	Complies With
CSS0810050	3.94"	3.15"	2.56"	1.97"	0.67"	CBSC8, CBSC10	0.24 lb	IEC® 62561-4
CSS1314050	3.94"	3.15"	2.56"	1.97"	0.67"	CBSC13, CBSC14	0.24 lb	IEC® 62561-4
CSS1618050	3.94"	3.15"	2.75"	1.97"	0.67"	CBSC16, CBSC18	0.24 lb	IEC® 62561-4

IEC compliance is valid only for Cu-Bond Conductors listed.

## 150 MM OFFSET POSITIONER, SOLID ROUND CONDUCTOR

### FEATURED HIGHLIGHTS

- Positioning clamps with 150 mm (5.9") offset for use with solid round conductors, including Cu-Bond Round Conductor
- For use with copper-bonded, copper, or stainless steel solid conductors
- Ideal for use in positioning solid round conductor in a horizontal orientation, such as on a roof or parapet

Material: Stainless Steel 18-8 (EN 1.4305), Stainless Steel 316 (EN 1.4401)

Part Number	Width 1	Width 2	Height 1	Height 2	Depth	Cu-Bond Conductor	Unit Weight	Complies With
CSS0810150	2.17"	1"	7.28"	5.9"	0.67"	CBSC8, CBSC10	0.29 kg	IEC® 62561-4
CSS1314150	2.17"	1"	7.28"	5.9"	0.67"	CBSC13, CBSC14	0.29 kg	IEC® 62561-4

IEC compliance is valid only for Cu-Bond Conductors listed.

## THEFT DETERRENT COMPOSITE CABLE CLIP

### FEATURED HIGHLIGHTS

- For use with CC5A04 Theft Deterrent Composite Cable

Material: Aluminum

Part Number	Conductor Size	Hole Size
CCL04A	#14 Solid - 2/0 Solid, 2.5 mm <sup>2</sup> Stranded - 10 mm <sup>2</sup> Stranded	0.2"

# Conductors

## CU-BOND ROUND CONDUCTOR

For decades, nVent ERICO has provided the market with high quality copper-bonded ground rods. nVent ERICO has taken that same concept in ground rods and made this into a revolutionary new grounding conductor. The core of the nVent ERICO Cu-Bond Round Conductor is a low carbon steel grade for improved flexibility in the field. The steel core is plated with nickel then electro-plated with a coating of copper. This electro-plating process helps ensure a long-lasting molecular bond between the copper layer and the steel.

Material: Copper-Bonded Steel  
 Plating Thickness: 10 mil  
 Complies With: IEC® 62305-3 Edition 2; IEC® 62561-2; EN 62561-2

### FEATURED HIGHLIGHTS

- Theft-deterrent; steel core is hard to cut with hand tools
- Cost-effective; copper bonded to a steel core minimizes the amount of copper in the cable
- Superior corrosion resistance; application life of typically 30-40 years in most soil conditions
- Copper-bonded coating will not crack or tear when the conductor is bent
- High resistance to corrosion and provides a low-resistance path to ground
- Cu-Bond Round Conductor is marked every meter (3.28') for easy measurement in the field
- Meets the requirements of IEC® 62305-3 Edition 2 and IEC/EN 62561-2 for lightning protection applications
- Cu-Bond Round Conductors are UL certified to IEC® 62561-2

Resistance per unit length measurements made in mΩ/m, CBSC compared with respect to AWG/Metric. The IEEE® 837 standard (Annex C) provides a method of calculating the fusing current for conductors. This chart is a reference of the calculations for copper-bonded steel conductor according to the IEEE 837 standard. This information is for reference only.

## CONDUCTOR PHYSICAL SIZE COMPARISON

Conductor Size	Approximate Diameter	Approximate Diameter	Cross Section	Cross Section
#4 AWG	0.235"	5.97 mm	-	-

### CU-BOND ROUND CONDUCTOR MANUAL STRAIGHTENING TOOL

#### FEATURED HIGHLIGHTS

- Hand tool used to reduce curvature in Cu-Bond Round Conductor
- Can be used with Cu-Bond Round Conductors CBSC8, CBSC10, and CBSC13

Part Number	Length
EGRA15	53 1/2"

## CU-BOND ROUND CONDUCTOR POWERED STRAIGHTENING TOOL

### FEATURED HIGHLIGHTS

- Operates on 220/240V (single phase) or 110/120V with step-up transformer included on CBSCSSMT
- Two operating modes: Automatic with speed control and manual forward/reverse
- Interchangeable rollers allow the machine to straighten CBSC8, CBSC10, and CBSC13
- Manual straightening bar straightens the first few sections of Cu-Bond Round Conductor prior to feeding it into the machine
- Enclosure covers moving internal parts
- Safety switch for emergency shutoff
- Includes control rod to calibrate setup of the straightening machine
- Designed to be able to be moved on site by a forklift
- Wheels and collapsible handles allow for easy movement on the jobsite
- Add-on uncoiler holds Cu-Bond Round Conductor coils and provides a method of feeding material into the machine and gives repeatable and precise straightness results

Part Number	Length 1	Length 2	Width 1	Width 2	Height 1	Height 2	Operating Voltage	Unit Weight
CBSCSSM	43 1/4"	44 1/2"	20"	44 1/2"	39 1/4"	40"	220/240V	507 lb
CBSCSSMT	43 1/4"	44 1/2"	20"	44 1/2"	39 1/4"	40"	110/120V - 220/240V	507 lb

Spare parts are available for order. Contact your nVent ERICO representative for more information.

## CU-BOND COMPOSITE CABLE

Cu-Bond is a bare concentric stranded conductor that consists of peripheral tinned copper plated steel which protects and conceals the internal copper stranding.

Material: Copper, Copper-Bonded Steel  
Finish: Tinned  
Insulated: No

### FEATURED HIGHLIGHTS

- Outer strands comprised of tinned copper-bonded steel for theft deterrence and improved corrosion resistance
- Inner copper stranding is tinned for superior corrosion resistance
- Copper stranding inside of conductor increases conductivity and conductor flexibility
- Copper strands are hidden by outer galvanized steel strands
- Available in three sizes/configurations with electrical equivalency to 4, 2/0 and 4/0 AWG copper
- Suitable for direct burial applications
- More flexible and easier to work with than copper clad steel conductors

Part Number	Stranding	Resistance	Fusing Capacity Equivalency	Cable Diameter	Cable Length	Conductor Code	Hammerlock	Unit Weight
CC5A05CB	(19) Strands: (3) Tinned Copper, (16) Tin Plated Copper-Bonded Steel	0.374 Ω/1000'	#4	0.320"	250'	S1	EHL58C2G, EHL34C2G	61 lb
CC5A20CB	(154) Strands: (133) Tinned Copper, (21) Tin Plated Copper-Bonded Steel	0.087 Ω/1000'	2/0	0.524"	200'	S5		113 lb
CC5A40CB	(161) Strands: (133) Tinned Copper, (27) Tinned Copper- Bonded Steel	0.056 Ω/1000'	4/0	0.651"	200'	S7		174 lb

Weight does not include reel.

## INSULATED COPPER CONDUCTOR

### FEATURED HIGHLIGHTS

- Insulated copper conductor is compacted, so the diameter is smaller than conventional insulated copper conductor
- Green and yellow insulation protects the strands of the conductor

Material: Copper, Polyvinylchloride

Part Number	Conductor Size	Number of Wires	Wire Diameter	Cable Diameter	Outer Diameter	Cable Length	Insulation Thickness	Unit Weight
<b>Conductor Type: Concentric, Compacted</b>

Outer diameter dimensions are approximate.

## NON-INSULATED SOLID CONDUCTOR

### FEATURED HIGHLIGHTS

- Solid cable for a variety of applications
- Available in smaller pool sizes for convenience
- LPA and LPC parts are used for lightning protection system downconductor or grounding applications

Part Number	Length	Cross Section	Conductor Size	Diameter	Unit Weight	Certifications
<b>Material: Copper — Finish: Bare</b>						
A809A06F100	100'	41.70 kcmil	#4 Solid	0.204"	0.038 lb

Unit weight is per foot (0.3048 m).Cut-to-order (CTO) lengths are available for an additional charge.

## NON-INSULATED STRANDED CONDUCTOR

### FEATURED HIGHLIGHTS

- Stranded pure electrolytic copper cable conductors for a variety of applications
- Stranded grounded conductor cut into standard lengths for easy field installation

Material: Copper  
Conductor Type: Concentric

Part Number	Number of Wires	Wire Diameter	Diameter	Length	Cross Section	Conductor Size	Unit Weight
A800A09F100	19	0.084"	0.500"	100'	133.0 kcmil	2/0 Stranded	41.1 lb

Outer diameter dimensions are approximate.

## CPI GROUNDING AND BONDING BRAID, STAINLESS STEEL

High-quality CPI stainless steel grounding and bonding braids can be installed in extremely corrosive environments, like offshore applications or coastal applications. The full range of CPI braids are ideal for applications using stainless steel pipe or tanks, like the food and beverage industry, building industry, transportation, oil and chemical industry.

### FEATURED HIGHLIGHTS

- Superior abrasion, corrosion, chemical and UV resistance make CPI braids ideal for outdoor applications
- Great for expansion joints where constant movement requires a flexible and durable solution
- Ready to use out of the box, eliminates the need for cutting, stripping, crimping and punching
- Quick and easy to install
- Resistant to vibration and fatigue, reducing maintenance
- Will not rust or discolor, so the appearance will never fade or change
- Excellent electrical contact
- No additional lugs or terminals needed
- Non-magnetic material
- Recommended by the EMC/EMI directives
- GOST compliant
- RoHS compliant

Material: Stainless Steel 316L (EN 1.4404)  
 Certification Details: UL® 467

## MBJ GROUNDING AND BONDING BRAID, TINNED COPPER

MBJ Grounding and Bonding Braids are a reliable and convenient grounding solution for applications that require flexibility and durability. The tinned copper ground braids with massivated palms come ready to install without any additional cutting, stripping, crimping or punching and do not require the addition of tin or crimped lugs. The proprietary manufacturing process optimizes the electrical contact between each wire and helps eliminate moisture issues in the palms, preventing corrosion and lengthening the useful life of the braid.

### FEATURED HIGHLIGHTS

- Complete range of earth/ground flexible connections from 6 - 100 mm<sup>2</sup> (11.84 - 197.35 kcmil) cross section and from 100 - 500 mm (3.937" - 19.685") length
- Integral palm, without tin or crimped lugs for superior electrical contact and tensile strength resistance
- Resistant to vibration and fatigue, reducing maintenance
- Provides weight savings, material savings and lower impedance when compared to similar lugged cables with insulation
- Ready to use out of the box, eliminates the need for cutting, stripping, crimping and punching
- Quick and easy to install
- Recommended by the EMC/EMI directives and less impedance than cables
- GOST compliant
- RoHS compliant

## TAPE CONDUCTOR

### FEATURED HIGHLIGHTS

- Lower impedance than equivalent sized round conductor
- Used for lightning protection system downconductor or grounding applications

Material: Copper  
Finish: Bare

Part Number	Length	Width	Thickness	Unit Weight
A811A26F50	50'	2"	26 GA	0.152 lb
A811A26F500	500'	2"	26 GA	0.152 lb

A811C20F20	20'	3"	20 GA	0.410 lb
LPC172CTO		3/4"	8 GA	0.110 lb

Cut-to-order (CTO) lengths are available for an additional charge. Unit weight is per meter (3.28').

## LOW IMPEDANCE RISER

### FEATURED HIGHLIGHTS

- Used to connect the signal reference grid to equipment
- Welded to the SRG using Cadweld mold type TW
- Has a lower impedance than a 4/0 AWG copper conductor

Material: Copper

# Grounding & Bonding

## COPPER-BONDED GROUND ROD, POINTED

### FEATURED HIGHLIGHTS

- 99.9% pure electrolytic copper coating
- Molecular bond to nickel-sealed high strength steel core
- Rods have a high carbon steel core and tip that provide superior strength when driving
- Copper coating will not crack when bent or tear when driven
- Minimum copper coating of 10 mils on rods listed to UL® 467
- nVent ERICO name, length, diameter and part number is roll-stamped within 12" (304,8 mm) of chamfered end
- UL logo and control number where applicable stamped on each rod for easy inspection after installation

Material: Copper-Bonded Steel  
Tensile Strength: 80,000 psi Min

For rods to be listed to UL® 467, they must be at least 8' (2.43 m) in length. IEC® EN 62561-2 supercedes EN 50164-2. Additional lengths available.

### COPPER-BONDED GROUND ROD, SECTIONAL

#### FEATURED HIGHLIGHTS

- Cold-rolled threads with continuous, unbroken grain flows preserve copper coating and are stronger than cut threads
- 99.9% pure electrolytic copper coating
- Molecular bond to nickel-sealed high strength steel core
- Rods have a high carbon steel core and tip that provide superior strength when driving
- Copper coating will not crack when bent or tear when driven
- Minimum copper coating of 10 mils on rods listed to UL® 467
- nVent ERICO name, length, diameter and part number is roll-stamped within 12" (304,8 mm) of chamfered end
- UL logo and control number where applicable stamped on each rod for easy inspection after installation

For rods to be listed to UL® 467, they must be at least 8' (2.43 m) in length. IEC® EN 62561-2 supercedes EN 50164-2.

## CONVENIENT GROUND ELECTRODE KIT

### FEATURED HIGHLIGHTS

- Kit includes two ground rods, ground clamp, compression coupler and drive sleeve
- UL®-Listed and NEC®-Compliant
- Allows for installation from ground level
- Two 4' (1.2 m) ground rods with coupler provide more convenient storage and transportation than one 8' (2.4 m) ground rod

Part Number	Ground Rods	Clamp	Hammerlock	Drive Sleeve	Conductor Size
<b>Material: Copper-Bonded Steel, Bronze</b>

## PORTABLE GROUND ROD KIT

### FEATURED HIGHLIGHTS

- Segmented portable ground rod kit specified by the United States military
- Each of the three ground rod sections is 3' (0.91 m) long, thus creating a total depth of 9' (2.74 m) of earth grounding
- All accessories are provided in the kit to assemble the portable ground
- 6' (1.83 m) of copper grounding cable connected to the rod, makes for an easy connection to a vehicle or other item requiring a ground

### Part Number

635837

Kit Includes: 3 sectional copper-bonded ground rods - 5/8" x 3" (190.5 mm x 0.91 m), 3 threaded couplers, 1 drive stud, 1 heavy duty ground rod clamp, Tang and collar lugs, and 6' (1.83 m) of #6 copper wire.

## STAINLESS STEEL GROUND ROD, POINTED

### FEATURED HIGHLIGHTS

- For use in highly-corrosive soils

Material: Stainless Steel 302 (EN 1.4324), Stainless Steel 304 (EN 1.4301)  
Tensile Strength: 85,000 psi Min

## CHEMICAL GROUND ELECTRODE

Chemical ground electrodes provide a low impedance ground in locations of high soil resistivity and dry soil conditions. Used in conjunction with a Bentonite backfill and nVent ERICO's unique GEM material, the nVent ERICO chemical ground rod electrode systems provide a method to improve soil resistivity directly surrounding the electrode, and can replace multiple conventional ground rods. It maintains a low ground resistance, maintenance-free installation that dissipates lightning energy and other dangerous electrical fault currents, even in sandy or rocky soil conditions.

### FEATURED HIGHLIGHTS

- Contains natural electrolytic salts, which permeate into the surrounding soil to condition the soil and increase its conductivity
- Easy connection to ground electrode conductor using the factory provided pigtail (up or down orientation)
- Provides decades of reliable services due to rugged construction and high-quality metals with a 30-year minimum service life
- 2-1/8" (54 mm) outside diameter copper pipe with 0.083" (2.1 mm) wall
- Available in continuous sections up to 10' (3.05 m) in length; longer rods can be field assembled using 5' (1.52 m) or 10' (3.05 m) extensions
- Optional factory-attached radial strips are available to reduce impedance to high-frequency lightning energy and to control the direction of the dissipation
- L-shaped rods are available for horizontal installation applications where it is impractical to auger deep vertical holes
- Access segment on horizontal (L-shaped) chemical ground electrodes is 32" (813 mm) deep

## CHEMICAL GROUND ELECTRODE SALT MIX

### FEATURED HIGHLIGHTS

- Individual packages of salt mix are available for sale separately from the chemical ground rod assembly

Part Number	Unit Weight
ECRCHM15LB	15 lb

## SOLID COPPER GROUND ROD, POINTED

### FEATURED HIGHLIGHTS

- Solid copper ground rods made of high conductive hard drawn bare copper

Material: Copper  
Tensile Strength: 42,000 psi Min

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Length	Unit Weight	Certifications
LPC700	1/2"	0.500"	8'	6.1 lb	UL
LPC702	1/2"	0.500"	10'	7.6 lb	cULus
LPC704	5/8"	0.625"	8'	9.5 lb	UL
LPC706	5/8"	0.625"	10'	11.8 lb	cULus
LPC711	3/4"	0.750"	10'	17.0 lb	cULus

Due to the inherent softness of the copper material, special consideration should be given when driving this product into the soil.

## GALVANIZED GROUND ROD, POINTED

### FEATURED HIGHLIGHTS

- Meets ANSI®/NEMA® GR1
- Zinc-coated exteriors are hot-dip galvanized for solid protection against corrosion, in accordance with ASTM® specification A153-78
- Surfaces are rigidly inspected to eliminate seams, slivers and other defects

Material: Steel

Finish: Hot-Dip Galvanized

Tensile Strength: 80,000 psi Min

## VENT ERICO GROUND ENHANCEMENT MATERIAL (GEM)

nVent ERICO Ground Enhancement Material (GEM) is a superior conductive material that solves your toughest grounding problems. It is the ideal material to use in areas of poor conductivity, such as rocky ground, mountain tops and sandy soil. GEM dramatically reduces earth resistance and impedance measurements. Furthermore, GEM may reduce the size of the grounding system where conventional methods are unsatisfactory. Once installed, GEM is maintenance-free, not requiring periodic charging or the presence of water to maintain its conductivity.

**To learn more about GEM, please see pages 18-20.**

Unit Weight: 25 lb

Part Number	Packaging
GEM25A	Bag with handles
GEM25ABKT	Plastic bucket with locking lid

### FEATURED HIGHLIGHTS

- Maintains constant resistance for the life of the system once in its set form
- Performs in all soil conditions even during dry spells
- Does not require periodic charging treatments or placement
- Does not require the continuous presence of water to maintain its conductivity
- Fully sets within 3 days, fully cures within 28 days
- Does not dissolve, decompose, or leach out with time
- Non-corrosive
- Reduces vandalism and theft since conductors are hard to remove from concrete
- Easy-to-handle 25 lb (11.3kg) bags or buckets
- Requires only one person to install
- Exceeds IEC® 62561-7 which sets the benchmark for corrosion, leaching, sulfur content, and other environmental regulations
- Complies to the United States Environmental Protection Agency (EPA) Toxicity Characteristic Leaching Procedure (TCLP), EPA test method 1311
- Can be installed using trench or ground rod backfill methods

## INSPECTION HOUSING, HIGH DENSITY POLYETHYLENE (HDPE)

### FEATURED HIGHLIGHTS

- Pedestrian load rating
- Suitable for lighter load rating applications in turf
- Chemical, UV and corrosion resistant
- 3/8" x 1 3/4" (44 mm) stainless steel lock bolt included
- Boxes and covers nest in 3 1/4" (83 mm) increments
- Two 3 1/2" x 1 1/2" (89 x 38 mm) knockouts per box
- T416BH includes four additional holes in the cover to allow water to enter the inspection well, typically for use with chemical ground rods

Material: High Density Polyethylene (HDPE)  
Color: Green  
Load Rating: 300 psf

Part Number	Diameter, Grade Level	Outer Diameter	Height	Unit Weight
T416B	10 1/4"	13.1"	10"	4.5 lb
T416BH	10 1/4"	13.1"	10"	4.5 lb

## INSPECTION HOUSING WITH CONDUIT CUTOUT, HIGH DENSITY POLYETHYLENE (HDPE)

### FEATURED HIGHLIGHTS

- Suitable for lighter load rating applications in turf
- Chemical, UV and corrosion resistant

Material: High Density Polyethylene (HDPE)  
 Color: Black  
 Load Rating: 300 psf

Part Number	Diameter, Grade Level	Outer Diameter	Height	Hole Size	Unit Weight
T416C	14 1/4"	24.38"	18 1/4"	2 3/4"	16.2 lb

## KEY FOR T416C INSPECTION HOUSING

### FEATURED HIGHLIGHTS

- Replacement key for the T416C Inspection Housing
- Useful for maintenance crews or inspectors in the field

Part Number	Unit Weight
T416CKEY	0.65 lb

## INSPECTION HOUSING, LIGHTWEIGHT POLYMER CONCRETE

### FEATURED HIGHLIGHTS

- Tier 15 Design Load of 15,000 lbs (6,804 kg) with a test load of 22,500 lbs (10,206 kg)
- Non-slip cover suitable for non-deliberate, incidental traffic
- Cuts with a standard hole saw, no concrete tools required

Material: Polymer Concrete

Part Number	Height	Length	Width	Unit Weight
T416A	18"	25.1"	16.2"	75 lb
T416D	12"	15.4"	15.4"	31 lb
T416E	18"	15.4"	15.4"	35 lb
T416F	23"	15.4"	15.4"	47 lb

Product specifications subject to change without notice.

## INSPECTION HOUSING, HIGH-IMPACT POLYPROPYLENE

### FEATURED HIGHLIGHTS

- Offers a high level of protection for critical grounding terminations through the use of its lockable lid
- Easy-locking lid only opened with security key
- Ease of ground termination maintenance due to large working aperture
- Lightweight design allows easy handling, storage and transportation
- Suitable for both paving and hot tar applications
- UV-stabilized against degradation by sunlight
- Non-brittle to prevent cold weather damage
- Base designed to accommodate Grounding Busbar for Inspection Housing (545135)

Material: High-Impact Polypropylene

Part Number	Height	Length	Width	Unit Weight
PIT03	8.5"	9.5"	8.2"	2.8 lb

## INSPECTION HOUSING, CONCRETE

### FEATURED HIGHLIGHTS

- Concrete design for higher load rating
- Available with a central lifting hook
- Flush-fitting lid with plain surface minimizes slipping
- Suitable for most grounding and lightning protection installations
- Base designed to accept 545140 Grounding Busbar for Inspection Housings
- Square shape

Material: Concrete  
Color: Gray

Part Number	Height	Length	Width	Unit Weight
IP900C	6"	13"	13"	57.2 lb

## INSPECTION HOUSING, SEAL KIT

### FEATURED HIGHLIGHTS

- Prevents the ingress of ground water into and surrounding the inspection housing
- Waterproofing is achieved by enclosing an upper section of copper-bonded ground rod within a plastic pipe with seals located on both sides of the concrete pour
- The two plate-style flange serves to reduce pressure, which may occur from the capillary effect of water on the outside of the seal and inspection housing
- The flanges are intended to prevent water pressure from “popping” the inspection pit out of the concrete
- Delivered as a kit, including a 3.9 foot (1.2 meter) PVC pipe, to be adjusted to site conditions

Material: Thermoplastic

Part Number	Length (L)	Width (W)	Depth (D)	A	Diameter	Water Pressure	Working Load (F)	Unit Weight
WGRS200	9.7"	9.7"	4.6'	8.2"	13.8"	80 psi Max	13,227 lb	9.5 lb

## GROUNDING BUSBAR FOR INSPECTION HOUSING

### FEATURED HIGHLIGHTS

- Grounding busbar for use in conjunction with ground rod inspection housings

Material: Copper

Part Number	Length	Width	Thickness	A	Hole Size	Number of Holes	Inspection Housing	Unit Weight
545135	7.87"	0.98"	0.02"	0.98"	0.41"	8	PIT03	0.49 lb
545140	11.81"	0.98"	0.02"	0.98"	0.41"	12	IP-900-C	0.73 lb
545530	5.90"	0.98"	0.02"	0.98"	0.41"	6	103470, 103480	0.37 lb

## GROUND MAT

Prefabricated ground mats, made of wire mesh, are ideal for systems designed for safety purposes to protect operators against "touch potentials" at manually operated disconnect switches.

Material: Copper, Copper-Bonded Steel

Part Number	MAT
Length 1 (L1)	96" Max
Width 1 (W1)	72" Max
Grid Spacing (L2 x W2)	2" x 2"
	4" x 4"
	6" x 6"
	8" x 8"
	10" x 10"
	12" x 12"
Conductor Size	#4 Solid Copper
	#6 Solid Copper
	#6 Copper-Clad Steel (30% or 40% Conductivity)
	#8 Solid Copper
	#8 Copper-Clad Steel (30% or 40% Conductivity)
Center Wire Conductor Size	1/0 Solid or Stranded
	2/0 Solid or Stranded
	4/0 Solid or Stranded
	250 kcmil Stranded
	300 kcmil Stranded
	350 kcmil Stranded
	500 kcmil Stranded
Overhang	Standard: Half Conductor Spacing + 2" (51 mm)
	With Center Wire
	With Overhanging Center Wire

W2 and L2 available in listed Grid Spacing only.

### FEATURED HIGHLIGHTS

- Silver brazed joints (35% silver alloy brazing material) provide strength to resist separation during installation and bear the traffic of heavy vehicles
- Conductor spacing available in standard configurations
- Option to add center wire into the mat configuration is available
- Ground mats are laid flat onto pallets for shipping

## GROUND MESH

### FEATURED HIGHLIGHTS

- Prefabricated ground mesh wound into a roll format for shipping
- Silver brazed joints (35% silver alloy brazing material) provide strength to resist separation during installation and bear the traffic of heavy vehicles
- Conductor spacing in many rectangular configurations up to 24" x 48" (610 mm x 1219 mm) in 2" (51 mm) increments
- Normally supplied in sections with standard overhang for interconnecting half conductor spacing + 2" (51 mm)

Prefabricated ground mesh from nVent ERICO is a convenient, efficient and economical means of improving grounding systems at facilities with high voltage installations and wherever large area grounds are required. Equipotential mesh reduces step potentials at power plants and substations, and effectively minimizes ground plane fluctuations at communications antenna sites. Wire mesh is also an excellent ground screen, reflector and electronic shield for large facilities.

Material: Copper, Copper-Bonded Steel

Part Number	MESH
Length 2 (L2)	2" – 24"
Width 1 (W1)	20' Max
Width 2 (W2)	2" – 48"
Conductor Size	#6 Solid Copper #6 Copper-Clad Steel (30% or 40% Conductivity) #8 Solid Copper #8 Copper-Clad Steel (30% or 40% Conductivity) #10 Solid Copper
Overhang	Standard: Half Conductor Spacing + 2" (51 mm) None Half Conductor Spacing
Unit Weight	500 lb Max

### Net Weight (lbs) per 1,000 Square Feet

6" x 6"	295 lbs	186 lbs	117 lbs	325 lbs	203 lbs	128 lbs
8" x 8"	222 lbs	139 lbs	88 lbs	243 lbs	153 lbs	96 lbs
12" x 12"	148 lbs	93 lbs	59 lbs	163 lbs	102 lbs	64 lbs
24" x 24"	74 lbs	47 lbs	29 lbs	91 lbs	51 lbs	32 lbs

Add 75 lbs per roll for approximate shipping weight.

Length 1 (L1) is unlimited, up to 500 lbs. (227 kg) maximum. Length 2 (L2) and Width 2 (W2) are available in 2" (51 mm) increments only.

## EXPANDED COPPER MESH

### FEATURED HIGHLIGHTS

- Produced from copper plate and contains no welds or joints

Material: Copper

Part Number	Length	Width	Thickness	A	B
EMMCU080X36X96A	96"	36"	0.08"	0.9"	2"

## POOL MESH

### FEATURED HIGHLIGHTS

- Convenient, efficient and economical solution for equipotential bonding grids for swimming pool applications

The requirements for bonding and grounding permanently installed indoor and outdoor swimming pools are provided in Article 680 "Swimming Pools, Fountains and Similar Installations" of the 2005 Edition of the National Electrical Code (NEC®). All of the bonded parts in or around swimming pools must be attached to an equipotential bonding grid. This grid must extend 3' (0.91 m) beyond the inside surface of the pool under concrete, stone or other paved walking surfaces.

Material: Copper

Part Number	Length 1	Width 1	Grid Spacing	Conductor Size
POOLMESH2100	100'	2'	12" x 12"	#8 Solid
POOLMESH250	50'	2'	12" x 12"	#8 Solid
POOLMESH3100	100'	3'	12" x 12"	#8 Solid
POOLMESH350	50'	3'	12" x 12"	#8 Solid

Net Weight (lbs) per Standard Mat										
Grid Spacing										
Conductor Size										
Standard Mat Size (square feet)										
	2" x 2"		4" x 4"		6" x 6"		8" x 8"		12" x 12"	
	4' x 4'		4' x 6'		4' x 4'		4' x 6'		4' x 4'	
#6 Copper-Clad Steel Wire	14.6 lbs	21.7 lbs	7.6 lbs	11.2 lbs	5.3 lbs	7.7 lbs	4.1 lbs	6 lbs	2.9 lbs	4.2 lbs
#8 Copper-Clad Steel Wire	9.2 lbs	13.7 lbs	4.8 lbs	7.1 lbs	3.3 lbs	4.9 lbs	2.6 lbs	3.8 lbs	1.9 lbs	2.7 lbs

Weights are for copper-clad steel wire. Add 10% for approximate weight of solid copper wire.  
Mats are palletized for shipment. Add 50 lbs per pallet for gross weight. Maximum of 100 mats per pallet.

## SIGNAL REFERENCE GRID

### FEATURED HIGHLIGHTS

- Provides a low impedance equipotential plane to protect sensitive electronic equipment from transient noise
- Pre-engineered welded grid of 26 gauge copper strips reduces voltage differences between interconnected electronic equipment
- Welded connections do not deteriorate, corrode or loosen with time
- Can be easily field-welded to suit any size computer room
- Complies with IEEE® Standard 1100-1992

Material: Copper

Part Number	Length 1	Width 1	Grid Spacing	Thickness	Strip Width
SRGBD100	100'	10'	24" x 24"	0.016"	2"
SRGBE100	100'	12'	24" x 24"	0.016"	2"
SRGBG100	100'	16'	24" x 24"	0.016"	2"

Custom sizes available upon request. Contact your nVent ERICO representative for more information.

## COPPER GROUND PLATE

### FEATURED HIGHLIGHTS

- Provides a large surface area to dissipate current into the ground
- Available in a variety of sizes and pigtail configurations

### GPE-C-E-A-H-024-1L-024-(T)

## COPPER GROUND PLATE WITH BENT CORNERS

### FEATURED HIGHLIGHTS

- Used to ground utility poles
- The corners of the ground plate are nailed into the base of the pole

Material: Copper

Part Number	Length	Width	Thickness	Hole Size	Conductor Size	Pigtail Included	Pigtail Length
<b>Finish: Bare – Type: Ground Plate, No Holes</b>							
GPECEHX1	17"	17"	0.064"		#6 Solid	Yes	12'
GPECEHX3	17"	17"	0.064"		#2 Stranded	Yes	12'
<b>Finish: Tinned – Type: Ground Plate With Holes</b>							
GPECEHX1T	17"	17"	0.064"	1/2"	#6 Solid	Yes	12'

The pigtail for GPECEHX1T is tinned, but the plate itself is bare copper.

## COPPER GROUND PLATE WITH CABLE ATTACHMENTS

### FEATURED HIGHLIGHTS

- Bonding plates provide mechanical attachment points to ground plate
- Listed to UL® 96

Material: Copper

Part Number	Width	Length	Thickness
<b>Number of Cable Attachments: 1</b>			
LPC753	12"	24"	20 GA
LPC754	18"	18"	20 GA
LPC755	36"	36"	20 GA
<b>Number of Cable Attachments: 2</b>

UGP738SBP5	ESB2 Split Bolt	38 1/2"	7 1/2"	1/16"	5 pc

## COPPER UTILITY POLE BOTTOM PLATE

### FEATURED HIGHLIGHTS

- Integrated connector provides a convenient method for terminating the grounding conductor
- Quick and easy installation
- Cost-effective ground electrode solution
- Manufactured of corrosion-resistant electrolytic copper
- Construction meets the requirements of the NESC®
- Fix cable and nail to base before raising pole

Material: Copper

Part Number	Connector	Conductor Size	Diameter	Thickness
EGP100	Lug	#14 Solid - #4 Stranded, 2.5 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	7 1/2"	0.025"
EGP100HL	Hammerlock	#14 Solid - #4 Stranded, 2.5 mm <sup>2</sup> Stranded - 16 mm <sup>2</sup> Stranded	7 1/2"	0.025"

## STEEL GROUND PLATE

### FEATURED HIGHLIGHTS

- Provides a large surface area to dissipate current into the ground
- Includes a welded steel rod pigtail

Material: Steel

Part Number	Connector	Length 1	Length 2	Width	Thickness	Diameter	Certifications
<b>Finish: Electrogalvanized</b>							
EGGP	None	16"	2"	10"	1/4"	5/8"	C-CSA-US
EGGPC	HDC58	16"	2"	10"	1/4"	5/8"	C-CSA-US
<b>Finish: Plain</b>							
EBGP	None	16"	2"	10"	1/4"	5/8"	

## B162 EARTHPOINT, TWO STUD

### FEATURED HIGHLIGHTS

- Long-lasting design
- Low ground resistance and impedance
- Superior electrical conductivity and resistance to corrosion
- Electrically and mechanically robust and reliable
- Easy to install as a Prefabricated Earthbridge once Cadweld welded to a piece of conductor

Material: Brass

Part Number	Width 1	Width 2	Depth	Height	Diameter	Thread Size
B1622Q	1 3/4"	3 1/4"	1 5/8"	3"	0.53"	1/2 UNC

Assemblies require conductors and Cadweld connections, which must be ordered separately.

## B161/B164 EARTHPOINT, FOUR STUD

### FEATURED HIGHLIGHTS

- Long-lasting design
- Low ground resistance and impedance
- Superior electrical conductivity and resistance to corrosion
- Electrically and mechanically robust and reliable
- Easy to install as a Prefabricated Earthbridge once Cadweld welded to a piece of conductor

Material: Brass

Part Number	Width 1	Width 2	Depth 1	Depth 2	Height	Diameter	Thread Size
B1612Q	1 1/4"	2 1/2"	1"	2 1/4"	3"	0.530"	3/8 UNC
B1613Q	1 1/4"	2 1/2"	1"	2 1/4"	3"	0.825"	3/8 UNC
B1642Q	1 3/4"	3 1/4"	1 3/4"	3 1/4"	3"	0.530"	1/2 UNC
B1643Q	1 3/4"	3 1/4"	1 3/4"	3 1/4"	3"	0.825"	1/2 UNC

Assemblies require conductors and Cadweld connections, which must be ordered separately.

## GROUND POINT

### FEATURED HIGHLIGHTS

- Cast grounding plate for equipment, machinery, or structure grounding points
- May be installed flush in concrete floor or wall
- Cable connection under bolt tension

Material: Brass

Part Number	Conductor Size, UL	Thread Size	Depth	Width	A	Unit Weight
LPC682	Class 1 - Class 2 (4/0 Max)	1/2 UNC	3 1/4"	3 1/4"	1 3/4"	1.535 lb

## REBAR BONDING KIT, SINGLE CONNECTION

### FEATURED HIGHLIGHTS

- Kit includes Rebar Bonding Plate, Rebar Bonding Clamp and conductor
- Provides ground system connection points in concrete structures
- Used for equipment, machinery and structure grounding

Material: Brass, Copper

Part Number	Conductor Type	Cable Length	Thread Size	A	Unit Weight
LPC46740X1	LPC404	3'	1/2 UNC	4"	3.218 lb
LPC467X1	LPC401	3'	1/2 UNC	4"	2.400 lb

## REBAR BONDING KIT, DUAL CONNECTION

### FEATURED HIGHLIGHTS

- Kit includes Rebar Bonding Plate, two Rebar Bonding Clamps and two conductors
- Provides ground system connection points in concrete structures
- Used for equipment, machinery and structure grounding

Material: Brass, Copper

Part Number	Conductor Type	Cable Length	Thread Size	A	Unit Weight
LPC46740X2	LPC404	3'	1/2 UNC	4"	5.792 lb
LPC467X2	LPC401	3'	1/2 UNC	4"	4.154 lb

Cable Length represents the length of a single conductor.

## REBAR BONDING PLATE

### FEATURED HIGHLIGHTS

- Provides ground system connection points in concrete structures
- Used for equipment, machinery and structure grounding

Material: Brass

Part Number	Conductor Size	Thread Size	Depth	Height	Width	A	Hole Size	Unit Weight
LPC467	2/0 Stranded - 4/0 Stranded	1/2 UNC	4"	2.92"	4"	3"	0.45"	0.644 lb

## GROUND POINT ASSEMBLY

### FEATURED HIGHLIGHTS

- Convenient ground system connection points in concrete structures
- Used for equipment, machinery and structure grounding
- Results in maximum current-carrying capacity equal to the cross-sectional area of the conductor or stud
- The Cadweld connection between the stud and pigtail will not loosen or corrode

## AIRCRAFT GROUNDING RECEPTACLE WITH BAR ATTACHMENT POINT

### FEATURED HIGHLIGHTS

- Castings for use in static grounding systems of refueling areas
- Suitable as a combination tie down and static ground point
- Easily connected to grounding system conductor and/or ground rods
- Designed for simple installation with flush paved surfaces
- Compatible with Cadweld connections

Material: Phosphor Bronze

Part Number	Diameter 1	Diameter 2	Depth	Attachment Point	Pipe Size	Connection Type
B166	3 7/8"	3 5/8"	6 1/4"	3/4" Diameter Bar	1/2"	RA, RB
B167	4 3/4"	4 13/32"	7 1/4"	1 1/2" Diameter Bar	1/2"	RA, RB

## AIRCRAFT GROUNDING RECEPTACLE WITH BALL STUD

### FEATURED HIGHLIGHTS

- Castings for use in static grounding systems of refueling areas
- Easily connected to grounding system conductor and/or ground rods
- Designed for simple installation with flush paved surfaces
- Compatible with Cadweld connections

Material: Phosphor Bronze

Part Number	Diameter 1	Diameter 2	Depth	Attachment Point	Pipe Size	Connection Type
B165	2 3/4"	2 3/16"	4 1/2"	Permanent 5/8" Ball Stud	1/2"	RA, RB
B165R	2 3/4"	2 3/16"	4 1/2"	Removable 5/8" Ball Stud	1/2"	RA, RB

## AIRCRAFT GROUNDING RECEPTACLE REPLACEMENT BALL STUD

### FEATURED HIGHLIGHTS

- Replacement ball stud for B165R Aircraft Grounding Receptacle

Material: Phosphor Bronze

#### Part Number

B165RS

## AIRCRAFT GROUNDING RECEPTACLE REPLACEMENT COVER

### FEATURED HIGHLIGHTS

- Replacement covers available for Aircraft Grounding Receptacles
- Includes cover only, without chain or spring clip

Material: Phosphor Bronze

Part Number	For Use With	Diameter
B165B	B165 and B165R	2 3/16"
B166B	B166	3 5/8"
B167B	B167	4 13/32"

## AIRCRAFT GROUNDING RECEPTACLE FOR SECTIONALGROUND RODS

### FEATURED HIGHLIGHTS

- Castings for use in static grounding systems of refueling areas
- Designed for simple installation with flush paved surfaces
- Standard pin connection
- Chain-retained cover plate
- Couple directly to 3/4" (nominal) sectional or extension rod
- LPC681 includes spring clip to secure the cover plate
- Listed to UL® 96

Material: Bronze

Part Number	Diameter	Height	Attachment Point	Spring Clip Included
LPC680	2 3/4"	3 1/2"	Permanent 3/4" Ball Stud	No
LPC681	2 3/4"	3 1/2"	Permanent 3/4" Ball Stud	Yes

## AIRCRAFT GROUNDING TIE DOWN

### FEATURED HIGHLIGHTS

- Used as an attachment point for static grounding

Material: Copper-Bonded Steel, Bronze

Part Number	Diameter	Length	Thread Size	A	B
663400	2"	10'	3/4 UNC	5"	1"

## AIRCRAFT GROUNDING TIE DOWN MOLD

### FEATURED HIGHLIGHTS

- Plastic mold for making depression in concrete pour around loop in Aircraft Grounding Tie Down

Material: High-Impact Polystyrene

Part Number	Length	Width	Depth
DM5834	6"	3"	2.9"

## AIRCRAFT GROUNDING CLAMP

### FEATURED HIGHLIGHTS

- Fits ground rods up to 3/4" nominal and nVent ERICO Aircraft Grounding Receptacles B165 and B166
- Cast aluminum construction with plated steel jaws
- Aviation industry standard for bonding and grounding aircraft and refueling vehicles
- Ideal for attaching to landing gear, posts, ground balls, ground rods and other curved unpainted surfaces
- Complies with Mil Spec M83413/7-1

Material: Aluminum, Steel

Part Number	Jaw Opening	Throat Depth	Harness Included
B2617A	3/4" Max	3/4"	No

## STATIC GROUNDING CLAMP FOR DRUMS

### FEATURED HIGHLIGHTS

- Designed specifically for grounding or bonding small containers, drums, totes, machinery or personnel in areas containing flammable liquids or dust
- Plier-type clamp has a die cast aluminum body with two stainless steel points and a hefty 55 pound (25 kg) spring compression
- Design allows the clamp to penetrate multiple layers of paint or corrosion build-up so that proper contact is made to bare metal

Material: Aluminum, Stainless Steel 416 (EN 1.4005)

Part Number	Jaw Opening	Throat Depth	Harness Included
B2610A	1" Max	1"	No

FM is a registered certification mark of FM Approvals LLC, LTD.

## STATIC GROUNDING CABLE REEL, BARE CABLE

### FEATURED HIGHLIGHTS

- Includes a stop at the end of the retractable cable
- Typically used with B2610A Static Grounding Clamp For Drums (sold separately)

Material: Steel  
Finish: Electrogalvanized

Part Number	Product	Diameter	Length
B2618A	Cable for grounding flammable drums and totes	3/32"	20'
B2618B	Cable for grounding tanker trucks and rail cars	3/32"	50'

Containers with flammable liquid should remain closed until bonding and grounding is complete, because an initial spark may occur during the connection of grounding equipment which could ignite vapors or gases.

# Grounding Busbars

## GROUNDING BUSBAR - ELECTRICAL BUSBAR

### FEATURED HIGHLIGHTS

- Provides a convenient, single-point grounding and bonding location
- Conductors are welded to the bar using a Cadweld exothermic connection or are mechanically fastened by using lugs
- Custom bars can be designed and manufactured to customer specifications

## TELECOM GROUNDING BUSBAR

### FEATURED HIGHLIGHTS

- Meets TIA-607-C and conforms to BICSI® recommendations
- Complies with NEMA® standards
- Accepts two hole lugs with 5/16" or 7/16" bolt holes (hardware not included)
- Telecom grounding busbar splice kits are available to extend the length of the busbar

Material: Copper  
Width: 2"  
Thickness: 1/4"

## TELECOM MAIN GROUNDING BUSBAR

### FEATURED HIGHLIGHTS

- Meets TIA-607-C and conforms to BICSI® recommendations
- Complies with NEMA® standards
- Accepts two hole lugs with 5/16" or 7/16" bolt holes (hardware not included)
- Telecom grounding busbar splice kits are available to extend the length of the busbar

Material: Copper  
Width: 4"

## TELECOM GROUNDING BUSBAR SPLICE KIT

### FEATURED HIGHLIGHTS

- For use with telecom grounding busbars
- Includes two tinned copper splice plates and 1/4" stainless steel fasteners

Material: Copper  
Finish: Tinned

Part Number	For Use With	Height	Width	Thickness	Hole Size
TGBSPLICEKIT	TGB Series	2"	3"	1/4"	11/32"
TMGBSPLICEKIT	TMGB Series	4"	3 1/2"	1/4"	11/32"

## PERIMETER GROUNDING BUSBAR FOR CORNERS

### FEATURED HIGHLIGHTS

- For use in installing perimeter grounding busbar system to fit within or around 90° corners

Material: Copper

Part Number	Length	Width	Thickness
EPGC1416X6	6"	1"	1/4"
EPGC1426X6	6"	2"	1/4"
EPGC1428X8	8"	2"	1/4"
EPGC1436X6	6"	3"	1/4"

EPGC1446X6	6"	4"	1/4"
EPGC1816X6	6"	1"	1/8"
EPGC1826X6	6"	2"	1/8"
EPGC1846X6	6"	4"	1/8"
<b>Finish: Tinned</b>			
EPGC1446X6T	6"	4"	1/4"

### PERIMETER GROUNDING BUSBAR FOR DOORS

#### FEATURED HIGHLIGHTS

- For use in installing perimeter grounding busbar system to fit around doors

Material: Copper

Part Number	Length	Width	Thickness	Certifications
EPGC1418X8FL	8"	1"	1/4"	
EPGC1818X8FL	8"	1"	1/8"	cULus
EPGC1828X8FL	8"	2"	1/8"	cULus
EPGC1848X8FL	8"	4"	1/8"	cULus

### PERIMETER GROUNDING BUSBAR FOR WALLS

#### FEATURED HIGHLIGHTS

- Perimeter grounding busbars are used to terminate ground wires and cables from equipment and other devices
- For busbars that include insulators and brackets, eight individual brackets and insulators are provided

Part Number	Length	Width	Thickness	A	B	Hole Size
<b>Material: Copper – Busbar Configuration: Busbar Only</b>						
EPGC141120	120"	1"	1/4"	15"	30"	7/16"
EPGC142120	120"	2"	1/4"	15"	30"	7/16"
EPGC142144	144"	2"	1/4"	15"	30"	7/16"
EPGC143120	120"	3"	1/4"	15"	30"	7/16"
EPGC144120	120"	4"	1/4"	15"	30"	7/16"
EPGC182120	120"	2"	1/8"	15"	30"	7/16"

EPGC183144	144"	3"	1/8"	15"	30"	7/16"
EPGC184120	120"	4"	1/8"	15"	30"	7/16"
<b>Material: Copper, Polyamide, Stainless Steel 304 (EN 1.4301) – Busbar Configuration: Busbar, Insulators and Brackets</b>						
EPGA142120	120"	2"	1/4"	15"	30"	7/16"
EPGA144120	120"	4"	1/4"	15"	30"	7/16"

### GROUNDING BUSBAR MOUNTING KIT

#### FEATURED HIGHLIGHTS

- Includes hardware, fasteners, insulators and brackets

Material: Polyamide, Stainless Steel 304 (EN 1.4301)  
Finish: Bare

Part Number	Busbar Width	Height	Length	Width
B548A41	1" – 2"	2 5/8"	4 1/4"	2"
B548A42	3" – 4"	3 3/8"	6 5/16"	2"

### GROUNDING BUSBAR MOUNTING KIT WITH BEAM CLAMP

#### FEATURED HIGHLIGHTS

- Mounting kit for grounding busbars to steel beam
- Includes stainless steel hardware, fasteners, insulators and brackets

Material: Polyamide, Stainless Steel 304 (EN 1.4301)

Part Number	Flange Thickness	Length	Width
B548A39	7/8" Max	3 3/8"	2"

## THEFT-DETERRENT GROUNDING BUSBAR, FLANGE MOUNT ASSEMBLY

### FEATURED HIGHLIGHTS

- Mounts to a typical structural beam flange on a telecom tower without cutting or drilling the flange
- Accepts standard telecommunication grounding lugs (lugs not included)
- Includes 14 Standard Spacers (TDSGAS)

Material: Copper, Stainless Steel 18-8 (EN 1.4305), Nylon  
 Finish: Tinned  
 Spacer Thickness: 1/4"

Part Number	Length 1	Length 2	Depth	Height	A	Flange Thickness	Thread Size 1	Thread Size 2	Thread Size 3
TDSGABC14	10 1/2"	4"	2.13"	2.7"	1"	1/4" – 1"	3/8 UNC	5/16 UNC	5/16 UNC

## THEFT-DETERRENT GROUNDING BUSBAR, POLE MOUNT ASSEMBLY

### FEATURED HIGHLIGHTS

- Mounts on a standard Schedule 40 ice bridge pole (3.5" or 88.9 mm nominal outer diameter) and provides a path to the buried ground ring via a connection to the post
- This assembly eliminates the need for a solid copper busbar and down lead
- The connection to the ground ring is concealed below grade
- Accepts standard telecommunication grounding lugs (lugs not included)
- Includes 14 Standard Spacers (TDSGAS) and 2 Pole Mount Spacers (TDSGAP)
- Pole itself is not included in the assembly

Material: Copper, Stainless Steel 304 (EN 1.4301), Stainless Steel 18-8 (EN 1.4305)  
 Finish: Tinned  
 Spacer Thickness: 1/4"

Part Number	Length	A	Thread Size
TDSGAPA14	10 1/2"	1"	3/8 UNC

## THEFT-DETERRENT GROUNDING BUSBAR, POST MOUNT ASSEMBLY

### FEATURED HIGHLIGHTS

- Mounts to a Schedule 40 pipe or post without cutting or drilling the pipe
- Accepts standard telecommunication grounding lugs (lugs not included)
- Includes 14 Standard Spacers (TDSGAS)

Material: Copper, Stainless Steel 304 (EN 1.4301), Stainless Steel 18-8 (EN 1.4305)  
 Finish: Tinned  
 Spacer Thickness: 1/4"

Part Number	Length	A	Fence Post Size, Nominal	Fence Post Outside Diameter, Actual	Thread Size 1	Thread Size 2	Thread Size 3
TDSGAPC14	10 1/2"	1"	1 1/2" – 2"	1.9" – 2.5"	3/8 UNC	5/16 UNC	5/16 UNC

## THEFT-DETERRENT GROUNDING BUSBAR, WALL MOUNT ASSEMBLY

### FEATURED HIGHLIGHTS

- Utilizes a utility or telecom tower's or other mounting structure's connection to a ground ring to provide equipotential bonding and a low-impedance path to ground
- Can be used for any mounting application and in any configuration
- Accepts standard telecommunication grounding lugs (lugs not included)
- Includes 17 Standard Spacers (TDSGAS)

Material: Copper, Aluminum, Stainless Steel 304 (EN 1.4301)  
 Finish: Tinned  
 Spacer Thickness: 1/4"

Part Number	Length 1	Length 2	Width	Height	A	Hole Size	Thread Size
TDSGAWB17	9 1/4"	1 1/2"	2"	2"	1"	0.39"	3/8 UNC

## THEFT-DETERRENT GROUNDING BUSBAR, WALL MOUNTING BRACKET

### FEATURED HIGHLIGHTS

- Replacement wall bracket for wall mount assembly

Material: Aluminum

Part Number	Length	Width	Height	Hole Size	Slot Size	Unit Weight
TDSGAWB	2"	1 1/2"	2"	0.39"	0.64" x 0.39"	0.14 lb

## SPACER FOR THEFT-DETERRENT GROUNDING BUSBAR

### FEATURED HIGHLIGHTS

- Extra spacers available for additional conductor connections
- Additional standard spacers for use with all Theft-Deterrent Grounding Busbar assemblies
- Pole mount spacers are curved to fit next to the mounting pole

Material: Copper  
Finish: Tinned

Part Number	Type	Length	Width	A	B	Thickness	Hole Size	Slot Size
TDSGAP	Pole Mount	1 3/4"	1"	3/8"	7/8"	1/4"	0.39"	0.64" x 0.39"
TDSGAS	Standard	1 3/4"	3/4"	3/8"	7/8"	1/4"	0.39"	0.64" x 0.39"

## GROUNDING STANDOFF FOR TELECOM TOWERS

### FEATURED HIGHLIGHTS

- Provides a direct, low-impedance electrical ground connection to the tower
- Offers a quick installation process
- Compact design fits in tight and confined locations
- Available in tinned copper to reduce dissimilar metal issues
- 6 TIA double-hole lug attachment points

Most equipment on a telecommunication tower is grounded by connecting a copper conductor to a ground bar mounted to the tower itself. The lead length of the conductor is often extensive, which can add resistance to the grounding system.

Material: Copper, Stainless Steel 301 (EN 1.4310)  
Finish: Tinned

Part Number	Diameter	Height	Hole Size
ETMAGS	5" Max	3"	3/8"

## EARTH BLOCK

### FEATURED HIGHLIGHTS

- Used to connect multiple earthing cables to a single point which then connects to the earthing system
- Two holes available (countersink M5) for installation of the earth block

Material: Brass  
Finish: Tinned

Part Number	Length	Width	Height	Hole Size 1	Hole Size 2	Hole Size 3
EBL08	3.465"	0.787"	0.512"	0.157"	0.204"	0.256"

## INTERSYSTEM BONDING TERMINATION BAR

### FEATURED HIGHLIGHTS

- Interconnects and terminates grounding conductors from telephone, CATV, radio and TV antennas
- Ideal for residential and small commercial applications
- Meets requirements of 2008 NEC® Article 250.94
- Accommodates five connectors for conductor sizes #14 Solid – #6 Stranded (1,5 – 25 mm<sup>2</sup>)
- Accommodates one connector for conductor sizes #6 Solid – #2 Stranded (16 – 35 mm<sup>2</sup>)
- Integral mounting base enables easy installation
- Includes mounting hardware
- Connects to grounding electrode conductor – does not rely on meter base enclosure bonding connection

The Intersystem Bonding Termination (IBTB), part of the nVent ERICO line of Facility Electrical Protection products, is designed to meet the requirements of the 2008 NEC® Article 250.94 “Bonding for Other Systems.” The IBTB is mounted adjacent to the meter base or service entrance equipment and is a convenient way to interconnect and terminate grounding conductors from telephone, CATV or radio and television antennas. The IBTB includes corrosion-resistant, stainless steel mounting hardware and is easily accessible for connection and inspection. The lay-in connection clamp (#6- #2 AWG, or 16-35 mm<sup>2</sup>) allows easy installation of the grounding electrode conductor in one continuous length, where possible. The polymeric base and housing is impact-resistant, UV-stabilized and meets UL® requirements for weatherability performance.

Part Number	Depth	Length	Width
IBTB	1.41"	4.5"	2.01"

# Grounding Tools

## GROUND ROD DRIVER

### FEATURED HIGHLIGHTS

- Usable on all types of round ground rods: copper-bonded, galvanized, and stainless steel
- Inserts are interchangeable with standard ground rod driver body
- The driver will not deform the end of the rod, making connection of the ground conductor quick and easy

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Length	Unit Weight
EGRD34	3/4" Max	0.68" Max	5'	23 lb
EGRD58	5/8" Max	0.56" Max	5'	23 lb

## GROUND ROD DRIVER REPLACEMENT INSERT

### FEATURED HIGHLIGHTS

- For use with the EGRD Ground Rod Driver
- Inserts are interchangeable with standard ground rod driver body

Part Number	Ground Rod Diameter, Nominal	Ground Rod Diameter, Actual	Unit Weight
EGRD34I	3/4"	0.68" Max	6 lb
EGRD58I	5/8"	0.56" Max	6 lb

## GROUND ROD DRIVING HEAD FOR POWER TOOLS

### FEATURED HIGHLIGHTS

Material: Steel  
Ground Rod Type: Copper-bonded, Galvanized

Part Number	Ground Rod Diameter, Nominal	Diameter 1	Diameter 2	Length
DH34	3/4"	0.78"	0.85"	7"
DH58	5/8"	0.58"	0.85"	7"

## GROUND ROD DRIVING HEAD FOR ROTARY HAMMER

### FEATURED HIGHLIGHTS

- Ground rod driving head for use with a rotary hammer

Material: Steel  
Ground Rod Type: Copper-bonded, Galvanized

Part Number	Ground Rod Diameter, Nominal	Diameter 1	Diameter 2	Diameter 3	Length
B13716RH15	5/8"	0.58"	0.74"	0.64"	7.7"

## GROUND ROD DRIVING STUD FOR ROTARY HAMMER WITH COUPLER

### FEATURED HIGHLIGHTS

- Used in conjunction with a CC58 ground rod coupler to drive a pointed ground rod
- DSCC58 driving stud fits inside CC58 coupler, then the assembly is placed on top of the ground rod
- Hammering is then carried out on the DSCC58

Material: Steel

Ground Rod Type: Copper-bonded

Part Number	Ground Rod Diameter, Nominal	Diameter 1	Diameter 2	Length
DSCC58	5/8"	0.78"	0.52"	2"

## GROUND ROD DRIVE SLEEVE FOR POINTED GROUND RODS

### FEATURED HIGHLIGHTS

- For use with unthreaded ground rods
- Slides on top of ground rod to prevent mushrooming while driving into ground

Material: Steel

Ground Rod Type: Copper-bonded, Galvanized

Part Number	Ground Rod Diameter, Nominal	Diameter	Length
158380	5/8"	0.63"	2.6"
B13714	1/2"	0.52"	6.0"

## GROUND ROD DRIVING STUD FOR SECTIONAL GROUND RODS

### FEATURED HIGHLIGHTS

- Used in conjunction with threaded couplers while driving sectional ground rods

Material: Steel

Part Number	Ground Rod Diameter, Nominal	Thread Size	Length
158100	5/8"	5/8 UNC	1.25"
158110	3/4"	3/4 UNC	1.50"
710090	3/8"	M10	0.71"
710100	3/8"	M10	0.83"
DS1	1"	1 UNC	2.50"
DS12	1/2"	1/2 UNC	1.50"
DS12S	1/2"	9/16 UNC	1.75"
DS34	3/4"	3/4 UNC	2.00"
DS58	5/8"	5/8 UNC	1.75"
DS58C	5/8"	5/8 UNC	1.44"

## GROUND ROD DRIVING POINT FOR SECTIONAL GROUND RODS

### FEATURED HIGHLIGHTS

- Threaded ground rod driving tip to assist in driving sectional ground rods into the earth

Material: Steel

Part Number	Ground Rod Diameter, Nominal	Thread Size	Length
SDT34	3/4"	3/4 UNC	1.7"
SDT58	5/8"	5/8 UNC	1.7"

## 2- AND 3-POINT GROUND RESISTANCE TESTER KIT

### FEATURED HIGHLIGHTS

- Measures ground resistance (2- and 3-Point) Fall-of-Potential method
- Provides high-breaking fuse protection capacity, 0.1A, >250V
- Auto-ranging: automatically selects the optimum range
- Color-coded terminals and lead identification
- Extremely simple to operate: connect – press – hold – read
- Designed to reject high levels of noise and interference
- Large LCD digital display
- Rugged dustproof and rainproof field case
- Battery-powered, with low battery indication
- Includes eight 1.5V AA batteries to power approximately 1800 15-second measurements

<b>Part Number</b>	EST3640
<b>Soil Resistivity Test</b>	No
<b>Measurement Range</b>	0 – 2,000 Ω
<b>Resolution</b>	10 mΩ – 1 Ω
<b>Test Current</b>	10.0 – 0.1 mA
<b>Open Voltage</b>	42 V Max
<b>Operating Frequency</b>	128 Hz square wave
<b>Accuracy</b>	3% of Reading +/- 3ct 5% of Reading +/- 3ct
<b>Unit Weight</b>	35 lb

Kit includes: Two 300' (91.4 m) color-coded leads on spools (red and blue), two 5' (1.5 m) color-coded leads (red and blue), two 100' (30.5 m) color-coded leads (green and black), four 14.5" (368 mm) T-shaped auxiliary ground electrodes, one set of five-spaded lugs, one 100' (30.5 m) tape measure, and one carrying bag.

## 2-, 3- AND 4-POINT GROUND RESISTANCE TESTER KIT

### FEATURED HIGHLIGHTS

- Measures ground resistance (2- and 3-Point) Fall-of-Potential method and soil resistivity (4-Point)
- Fuse protection of 0.1A, >250V, 0.25 x 1.25" with 30kA Interrupt Capacity
- Both models will perform over 2,000 measurements of the 15-second tests between recharging or battery replacement
- Provides a response time of approximately four to eight seconds for a stabilized measurement
- Step voltage tests and touch potential measurements
- Auto-ranging: automatically selects the optimum resistance range and test current
- Designed to reject high levels of noise and interference
- Extremely simple to operate: connect – press – hold – read
- May also be used for continuity tests on bonding
- Large easy-to-read backlit display
- LED on faceplate informs operator of high input noise, high auxiliary rod resistance and fault connections
- Rugged dustproof and rainproof field case
- Color-coded terminals
- Low battery indication

Part Number	Soil Resistivity Test	Measurement Range	Resolution	Open Voltage	Test Current	Operating Frequency	Accuracy	Auxiliary Electrode Influence	Withstanding Voltage	Unit Weight
EST4620	Yes	0 – 2,000 Ω	10 mΩ – 1 Ω	42 V Max	10.0 – 0.1 mA	128 Hz square wave	2% of Reading +/- 1ct, 5% of Reading +/- 3ct	3 – 50 kΩ	250 VAC, 100 VDC	35 lb
EST4630	Yes	0 – 2,000 Ω	10 mΩ – 1 Ω	42 V Max	10.0 – 0.1 mA	128 Hz square wave	2% of Reading +/- 1ct, 5% of Reading +/- 3ct	3 – 50 kΩ	250 VAC, 100 VDC	35 lb

Kit includes: Two 300' (91.4 m) color-coded leads on spools (red and blue), two 5' (1.5 m) color-coded leads (red and blue), two 100' (30.5 m) color-coded leads (green and black), four 14.5" (368 mm) T-shaped auxiliary ground electrodes, one set of five-spaded lugs, one 100' (30.5 m) tape measure, and one carrying bag.

## 2-, 3- AND 4-POINT GROUND RESISTANCE TESTER KIT WITH DATAVIEW® SOFTWARE

### FEATURED HIGHLIGHTS

- Measures Ground Impedance at frequencies up to 5kHz to test lightning strike protection
- Ground Resistance testing using the 2 clamp method (no auxiliary rods needed) using optional current probes
- Includes DataView® software for data storage, real-time display, analysis, report generation and system configuration
- 3-Point Fall-of-Potential measurement with manual or automatic frequency selection
- Used under difficult conditions such as the presence of high-stray currents that normally affect accuracy
- Automatic report generation including the fall of potential plot
- 4-Point soil resistivity measurement with automatic calculation of Rho and user selection of Wenner or Schlumberger test method
- 3-Point earth coupling measurement
- Manual and automatic frequency scan from 41 to 5,078Hz for optimum test accuracy in electrically-noisy environments
- Selectable test voltage of 16 or 32V up to 250mA of test current
- 2- and 4-Wire Bond Resistance/Continuity Measurement (DC Resistance) with automatic polarity reversal
- Stores up to 512 complete test results in internal memory
- Optically isolated USB communication included
- Display with automatic backlight when entering a function
- Rugged dustproof and rainproof field case - IP53 rated in closed position
- AC-powered with rechargeable NiMH batteries from wall charger or vehicle power
- Auto-off power management

### Part Number

EST6472

Kit includes: Two 300' (91.4 m) color-coded leads on spools (red and blue), two 5' (1.5 m) color-coded leads (red and blue), two 100' (30.5 m) color-coded leads (green and black), four 14.5" (368 mm) T-shaped auxiliary ground electrodes, one set of five-spaded lugs, one 100' (30.5 m) tape measure, and one carrying bag. Ground Resistance Tester Clamp-On Probe is not included and must be ordered separately.

### Ground Resistance Tester Information

3-Point Measurement	
Range (Auto-Ranging)	0.09Ω to 99.9kΩ
Resolution	0.01Ω to 100Ω
Test Voltage	Nominal 16 or 32Vrms user selectable
Operating Frequency	41 to 5078Hz automatic or user selectable
Test Current	Up to 250mA
Accuracy	±2% of Reading + 1ct @ 128Hz
2-Clamp Measurement	
Range	0.1 to 500Ω
Resolution	0.01 to 1Ω

Ground Resistance Tester Information	
Operating Frequency	Auto: 1367Hz; Manual: 128Hz-1367Hz-1611Hz-1758Hz
Soil Resistivity 4-Point Measurement	
Test Method	Wenner or Schlumberger selectable with automatic calculation of test results in $\Omega$ -meters
Range (Auto-Ranging)	0.01 to 99.99k $\Omega$ ; $\rho$ max: 999k $\Omega$ m
Resolution	0.01 to 100 $\Omega$
Test Voltage	16 or 32V user selectable
Operating Frequency	From 41 to 128Hz selectable
External Voltage Measurement	
Range (Auto-Ranging)	0.1 to 65.0VAC/DC – DC to 440Hz
Accuracy	$\pm 2\%$ of Reading + 1ct
Resistance Measurement (Bond Testing)	
Measurement Type	2-Pole (with lead resistance compensation) or 4-Pole (Kelvin sensing) user selectable
Range (Auto-Ranging)	2-Pole 0.02 $\Omega$ to 99.99k $\Omega$ ; 4-Pole 0.02 $\Omega$ to 99.99k $\Omega$
Accuracy	$\pm 2\%$ of Reading + 2cts
Test Voltage	16VDC (+, - or auto polarity)
Test Current	Up to 250mA max
Data Storage	
Memory Capacity	512 test results (64KB)
Power	
Power Source	9.6V rechargeable battery pack (included)
Recharging Source	110/220 50/60Hz external charger with 18Vdc, 1.9A output

Kit includes: Two 300' (91.4 m) color-coded leads on spools (red and blue), two 5' (1.5 m) color-coded leads (red and blue), two 100' (30.5 m) color-coded leads (green and black), four 14.5" (368 mm) T-shaped auxiliary ground electrodes, one set of five-spaded lugs, one 100' (30.5 m) tape measure, and one carrying bag.

Ground Resistance Tester Clamp-On Probe is not included and must be ordered separately.

## HANDHELD CLAMP-ON GROUND RESISTANCE TESTER

### FEATURED HIGHLIGHTS

- Measures earth resistance without need to disconnect from the electrical system or need for auxillary ground electrodes or reels
- Ground Resistance is auto-ranging from 1 to 199Ω
- Current Measurement is auto-ranging from 1mA to 40A
- Ground voltage indication - warns of unsafe conditions
- Clamping diameter of 1.4" (35 mm) with large jaw design
- Stores up to 300 measurements
- Includes a hard carrying case, calibration loop, four 1.5V AA batteries and a user manual

Part Number	Ground Resistance Measurement Range	Ground Resistance Resolution	Ground Resistance Accuracy	Current Measurement Range	Current Measurement Resolution	Current Measurement Accuracy	Current Measurement Frequency	Operating Frequency	Loop Impedance Measurement
EST401	0.01 – 1,500.00 Ω	0.001 – 50.000 Ω	Approx. 1.5% - 25%	0.20 mA – 39.99 A	1 μA – 10 mA	+/- 2%	47 – 800 Hz	2,083 Hz	10 to 100μH; 100 to 500μH

## GROUND RESISTANCE TESTER CLAMP-ON PROBE

### FEATURED HIGHLIGHTS

- AC Clamp-on probe for use with EST6472
- Extends use of EST6472 to be used as a clamp-on ground resistance tester

Part Number	Unit Weight
ESR182	3 lb

## GROUND RESISTANCE TESTER CABLE REEL

### FEATURED HIGHLIGHTS

- Includes two reels of silicone rubber insulated wire—one reel is red and the other reel is blue—for easy stake identification
- The far end of test lead remains attached to the reel base, which eliminates tangling and speeds up the process of test stake deployment
- Each reel includes 500 feet (152.4 m) of cable, a screwdriver and a lead that connects the reel to the test meter

Part Number	Cable Length	Unit Weight
ESTREELKIT500	500'	17 lb

# nVent ERICO Cadweld Molds

## GROUNDING CONNECTION SPECIFICATION

This specification covers the nVent ERICO Cadweld exothermic welding system for use in making electrical connections. The Cadweld system supplied under this specification shall include welding material, molds, tools and accessories as required.

Unless otherwise specified, Cadweld exothermic welding system shall be used for all electrical grounding connections of copper to copper and copper to steel conductors. Cadweld connections shall be suitable for exposure to the elements of direct burial in earth or concrete without degradation over the lifetime of the grounding system.

The Cadweld exothermic welding system furnished under this specification shall meet the applicable requirements of IEEE Standard 80 "IEEE Guide for Safety in AC Substation Grounding" and IEEE Standard 837 IEEE "Standard for Qualifying Permanent Connections Used in Substation Grounding". Independent test data showing conformance to IEEE Std. 837 shall be readily available.

### The Cadweld Mold Numbering System

The Cadweld mold part number gives, in code, the complete information about the mold. Type of connection, mold price key, and conductor size(s)

#### Examples:

## CONNECTIONS USED FOR GROUNDING REINFORCING BARS

Cadweld provides efficient and permanent connections for both grounding and attaching lightning protection conductors to rebar. When making Cadweld connections to rebar, the normal materials required are: mold, handle and weld metal. In addition, packing material is also required. These materials act as a seal between the mold and rebar to prevent leaks. One unit of packing material must be ordered for each weld.

## CONNECTIONS TO STRUCTURAL REINFORCING BAR AND ANCHOR BOLTS

Welding of ground conductors to reinforcing bars (rebar) by the Cadweld process should not be harmful if stresses in the rebar are below yield. As design stresses are normally only about 50% to 60% of the nominal yield strength of the rebar, welding by the Cadweld process should not be detrimental under design stresses.

As the ACI Building Code (ACI318-14 Commentary, 25.5.2.1) advises, "splice requirements encourage splicing bars at points of minimum stress ... encourage the location of splices away from regions of high tensile stress." The same advice should apply to locations of Cadweld connections of a ground conductor to rebar. Where possible, locate the weld area away from areas of maximum tensile stress, e.g., near the free end of the bar in a lap splice, on the hook extension for a hooked bar, etc. The same considerations apply to Cadweld connections to anchor bolts.

### NOTE:

For lightning protection applications where the main lightning protection conductor is connected to the rebar, nVent ERICO recommends a 2/0 AWG copper conductor for structures over 75 feet in height and a #2 AWG copper conductor for structures under 75 feet. For a bonding conductor, a #6 AWG copper may be used. These sizes meet NFPA78 Code requirement. Anchor bolts are connected in the same way.

**All welds to rebar requiring larger than a #150 weld metal will be sold only after review by nVent ERICO.**

## CABLE TO CABLE

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

## CABLE TO GROUND ROD SPLICE

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

## GB MOLDS

Global Part Number	Mold Family	Price Key	Ground Rod Diameter (Nominal)	Ground Rod Diameter (Actual)	Ground Rod Type	Welding Material Required	Ease of Use	Handle Clamp Required	Other Accessories Required

## CABLE TO CABLE TO GROUND ROD OR OTHER ROUNDS

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

## CABLE TO STEEL

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

## CABLE TO LUG OR BUSBAR

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

LQJH2V	LQ	J	250 kcmil Concentric	1/2" x 2" and wider	200 x 3 or 600PLUSF20	Easy	L159

## BUSBAR TO BUSBAR

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

## BA MOLDS

Global Part Number	Mold Family	Price Key	Busbar Size 1	Busbar Size 2	Welding Material Required	Ease of Use	Handle Clamp Required

## CABLE TO GROUND RECEPTACLE OR GROUND PLATE

- Forms a permanent, low resistance connection
- Provides a molecular bond
- Cadweld Exothermic Connections are rated with the same current capacity as the conductor
- Portable installation equipment with no external source of power required
- Installers can be easily trained to make Cadweld Exothermic Connections
- Connections are visually inspected

HXC12	HX	C	3/8" Steel Stud	Steel Surface	45 or 45PLUSF20	Easy	L160
HXC14	HX	C	1/2" Steel Stud	Steel Surface	65 or 65PLUSF20	Easy	L160
HXC14CU	HX	C	1/2" Copper Stud	Steel Surface	115 or 115PLUSF20	Easy	L160
HXC16	HX	C	5/8" Steel Stud	Steel Surface	90 or 90PLUSF20	Easy	L160
HXC22	HX	C	1" Steel Stud	Steel Surface	150 x 2 or 300PLUSF20	Easy	L160

# Additional Molds

The Cadweld connection styles presented in the additional mold section are “non-catalog” offerings. These connection styles and others are available when standard connections do not meet the installation requirements. Connections are identified with an ease of use and a mold split identifier. Ease of use categories include: preferred, easy, difficult and most difficult.

If possible, efforts should be made to use preferred or easy to use connection styles. Mold split identifies molds that have a vertically split crucible (V). Those without a designation do not have a vertically split crucible. For additional information and/or assistance in ordering non-catalog connection styles, please contact your nVent ERICO representative.

# ERICO Cadweld Welding Material, Tools + Accessories

## CADWELD WELDING MATERIAL, F20

### FEATURED HIGHLIGHTS

- Mixture consists mainly of copper oxide and aluminum
- Primarily used in grounding and bonding applications
- Welding material is in the top of the tube and starting material is in the bottom of the tube
- Packaged by size in plastic tubes with clear caps
- Tubes packaged in plastic boxes along with metal disks
- Each welded connection uses a single disk
- Non-explosive
- Not subject to spontaneous ignition
- See specific Cadweld connection details to determine welding material requirements

Part Number	Standard Packaging Quantity
115	10 pc
15	20 pc
150	10 pc

## CADWELD PLUS WELDING MATERIAL, F20

### FEATURED HIGHLIGHTS

- Mixture consists mainly of copper oxide and aluminum
- Primarily used in grounding and bonding applications
- Integrated welding material package
- Color coding by size for easy identification
- Electronic ignition
- No starting material required
- Non-explosive
- Not subject to spontaneous ignition
- See specific Cadweld connection details to determine welding material requirements

## CADWELD EXOLON WELDING MATERIAL, F20

### FEATURED HIGHLIGHTS

- Mixture consists mainly of copper oxide and aluminum
- Primarily used in grounding and bonding applications
- Designed for applications where low smoke emission is required
- Welding material packaged in tubes without starting material
- Tubes packaged with filters and igniters
- Electronic ignition
- Each weld uses one igniter
- Not subject to spontaneous ignition
- See specific Cadweld connection details to determine welding material requirements

**CADWELD ONE SHOT, CABLE TO GROUND ROD**

**FEATURED HIGHLIGHTS**

- Single use ceramic mold which eliminates the need for a graphite mold and handle clamp/frame
- Produces a permanent connection that will not loosen or corrode
- Fits plain copper-bonded, threaded copper-bonded, full-size galvanized and stainless steel ground rods
- NEC® compliant

## 4 HOLE OFFSET LUG

### FEATURED HIGHLIGHTS

- Provides an efficient bolting surface for grounding and power applications
- Electrolytic grade copper
- For use with Cadweld type LA connections only

Material: Copper  
Finish: Tinned  
Type: NEMA®

Part Number	H	L	W	T	A	B	C	D	HS
B104EKOL	1.56	6.00	3	0.250	0.625	1.75	3.375	1.75	0.563
B104GKOL	1.56	6.25	3	0.375	0.625	1.75	3.625	1.75	0.563
B104JKOL	1.56	6.25	3	0.500	0.625	1.75	3.625	1.75	0.563

For sizes not listed, contact nVent ERICO.

## 1 HOLE LUG, GL STYLE

### FEATURED HIGHLIGHTS

- Provides an efficient bolting surface for grounding and power applications
- Electrolytic grade copper
- For use with Cadweld type LA connections only

Material: Copper  
Finish: Tinned  
Type: NEMA®

Part Number	Height	Length	Width	Thickness	A	Hole Size	Angle	Equivalent Conductor Size
B121CE	0.44"	1.440"	1.000"	0.125"	0.625"	0.563"	90°	159 kcmil

## 2 HOLE TELECOM LUG

### FEATURED HIGHLIGHTS

- Provides an efficient bolting surface for grounding and power applications
- Electrolytic grade copper
- Hole spacing for telecom ground bars
- For use with Cadweld mold GLPCC001TC only

Material: Copper  
Finish: Tinned

Part Number	Height	Length	Width	Thickness	A	B	Hole Size	Angle	Equivalent Conductor Size
B922CC14A	0.31"	1.875"	0.625"	0.125"	0.375"	0.625"	0.281"	90°	99 kcmil

For sizes not listed, contact nVent ERICO.

## PREFABRICATED LUG BOND

Prefabricated lug bonds are custom made to specifications. Common usage includes cable tray bonding and grounding, structure bonds, surge arrester leads and power jumpers.

Material: Copper  
Finish: Tinned

### FEATURED HIGHLIGHTS

- Made with bare annealed copper cable
- Tinned copper NEMA® lugs welded to the cable with Cadweld connections

Part Number	Conductor Size	Number of Wires	Length 1	Length 2	Width	Thickness	Hole Size	Angle

## HANDLE CLAMP

### FEATURED HIGHLIGHTS

- Used to securely close the mold around the conductors
- Handle clamps are required for most molds
- Specialized frames and handles are required for some molds
- L160SM has off-set handles to ease the installation of connections in a ditch
- See specific Cadweld mold requirements

Part Number	Fits Mold Price Key
L159	D, F, J, Z
L160	C, E, Q, R
L160SM	C, E, Q, R

## HANDLE CLAMP FOR THREE-PIECE VERTICAL SPLIT MOLDS

### FEATURED HIGHLIGHTS

- Opens the mold in two directions
- Provides more convenience and further simplifies the installation process

Part Number	Fits Mold Price Key
L163	3
L164	4

## HANDLE CLAMP, MAGNETIC

### FEATURED HIGHLIGHTS

- Designed to securely hold an Cadweld mold to a large flat or slightly curved vertical steel surface
- Used on vertically split molds

Part Number	Fits Mold Price Key
B159M	D, F
B396	C, R

## HANDLE CLAMP WITH CHAIN SUPPORT

### FEATURED HIGHLIGHTS

- Securely holds the Cadweld mold to a pipe
- See specific Cadweld mold requirements

Part Number	Fits Mold Price Key	For Connection Type
<b>Pipe Orientation: Horizontal</b>		
B159H	D, F	HA, HC, HS, HT
B160B	C, R	Vertical Split Molds
B160H	C, R	HA, HC, HS, HT
<b>Pipe Orientation: Vertical</b>		
B159V	D, F	VS, VF, VB, VV
B159VT	D, F	VT
B160V	C, R	VS, VF, VB, VV
B160VT	C, R	VT
L160VG	C, R	VG

## HANDLE CLAMP CHAIN

### FEATURED HIGHLIGHTS

- Handle clamp accessory used on specific clamps to securely hold the Cadweld mold to a pipe
- See specific Cadweld mold requirements

Part Number	For Connection Type	Handle Clamp	Chain Length	Pipe Orientation	Pipe Size
B158	HA, HC, HS, HT, VB	B159V, B160V, B159VT, B160VT, B159H, and B160H	20"	Horizontal, Vertical	4" – 10"

## MAGNETIC ASSEMBLY

### FEATURED HIGHLIGHTS

- Powerful welding magnet securely positions the mold during the connection process to a flat steel surface or steel pipe
- Helps with mold stability to reduce the chance of welding material leakage
- Quickly and easily attaches to hold down "A" Price Key molds (new or retrofit)
- Assembly is adjustable
- Ideal when used with Cadweld PLUS to allow for use of full extension of control unit lead

Part Number

B323N2

## PIPE CLAMP CHAIN

### FEATURED HIGHLIGHTS

- Handle clamp accessory
- Used on specific clamps to hold the Cadweld mold to a particular surface
- See specific Cadweld mold requirements

Part Number	Fits Mold Price Key	Pipe Size	Pipe Orientation
B319	CAN, CAP, CAT	6" Max	Vertical
B320	CAA	6" Max	Horizontal

## SUPPORT CLAMP FOR VERTICAL FLAT STEEL SURFACE

### FEATURED HIGHLIGHTS

- Securely supports an Cadweld mold to a vertical "H" column or angle
- Easily attaches to an L160 or L159 handle clamp
- For use with type VF molds for up to 3/4" (19.1 mm) thick steel
- For use with type VB, VG, VN, and VS molds for up to 1" (25.4 mm) thick steel

Part Number	For Use With Handle Clamp
B134	L160, Sold Separately
B135	L159, Sold Separately

## FENCE FABRIC ATTACHMENT ASSEMBLY

### FEATURED HIGHLIGHTS

- Fastens to an L160 or L159 handle clamp
- Firmly holds the mold to the fence post after the fence fabric is in place
- Ideal for retrofit jobs

Part Number	For Connection Type
B827A	VS, VF, VB, VV

## HANDLE CLAMP, MINI EZ

### FEATURED HIGHLIGHTS

- Mini EZ Handle Clamps are typically included with the mold
- See specific Cadweld mold or Cadweld kit requirements to determine the handle clamp requirements

Part Number	Fits Mold Price Key
B399A	N, P, T
B399B	N, P, T
B399C	N, P, T
B399Q	N, P, T
L161	N, P, T

## HANDLE CLAMP, MINI EZ WITH CHAIN SUPPORT

### FEATURED HIGHLIGHTS

- Securely holds the Cadweld mold to a rod or rebar in a vertical position

Part Number	Fits Mold Price Key	Connection Type
L161A	P	GYP, GY35 Compact kit, RC35 and GY35 Maxikit

## HANDLE CLAMP, MINI EZ WITH SPRING CLAMP

### FEATURED HIGHLIGHTS

- Mini EZ Handle Clamps with Spring Clamp are typically included with the mold
- Ideal for connections to ground rods and rebar
- See specific Cadweld mold or Cadweld kit requirements to determine the handle clamp requirements

Part Number	Fits Mold Price Key
B399AS	N, P, T
B399BS	N, P, T
B399CS	N, P, T
B399DS	N, P, T
B399ES	N, P, T

## HANDLE CLAMP, MINI EZ, MAGNETIC

### FEATURED HIGHLIGHTS

- Designed to securely hold an Cadweld mold to a large flat or slightly curved vertical steel surface
- Allows for simple placement of the Cadweld mold in the desired connection location
- See specific Cadweld mold or Cadweld kit requirements to determine the handle clamp requirements

Part Number	Fits Mold Price Key
B399AM	N, P, T
B399BM	N, P, T

## CABLE CLAMP ASSEMBLY

### FEATURED HIGHLIGHTS

- Designed for use with hard-drawn copper cable, copper-bonded conductors or any cable under tension
- Use of the clamp aids in preventing cable movement and prolongs mold life

Part Number
B265

## GROUND ROD CLAMPING TOOL

### Part Number

B120

### FEATURED HIGHLIGHTS

- Must be used to provide the correct positioning of ground rods and mold while splicing the rods with Cadweld for HDGB and GB type connections

## DISK

### FEATURED HIGHLIGHTS

- Required each time a traditional Cadweld connection is made
- Placed at the bottom of the crucible, holding the welding material until the reaction takes place

Material: Steel

Part Number	Welding Material	Diameter
B117A	15 - 32, Sold Separately	3/4"
B117B	45 - 115, Sold Separately	1"
B117C	150 - 500, Sold Separately	1 1/2"

**DISK KIT**

**FEATURED HIGHLIGHTS**

- Contains three disk sizes for common Cadweld connection applications
- Convenience item for replacing lost or damaged disks

Part Number	Material
T328D	Steel

**DISK CONTAINER**

**FEATURED HIGHLIGHTS**

- Metal container for holding disks and small Cadweld accessories

Part Number	Diameter	Height
T328	3"	1"

## CONDUCTOR SLEEVE

### FEATURED HIGHLIGHTS

- Used to adapt a limited range of smaller size cables to a larger size Cadweld Mold
- Provides strength and stability on finely-stranded copper conductors

## SLEEVE KIT

### FEATURED HIGHLIGHTS

- Contains a variety of adapter sleeves that allow a buildup of smaller conductors to fit the opening of larger sized conductors in a Cadweld mold
- Includes shim stock for wrapping around a conductor, increasing the diameter to fit larger conductor openings in a Cadweld mold
- Contains extra disks for all sizes of traditional welding material
- Includes extra flints for Cadweld Flint Igniters

Part  
Number

T427

## COPPER SHIM

### FEATURED HIGHLIGHTS

- Wrapped around the cable until the diameter is about the same as the cable opening in the mold

Material: Copper

Part Number	Length	Width	Thickness
B140A	1.5"	3.0"	0.013"
B140B	2.5"	3.0"	0.013"

## CADWELD REPLACEMENT PART KIT

### FEATURED HIGHLIGHTS

- Miscellaneous handle clamp and Cadweld connection accessories
- Kit includes: (1) disk container, (2) handle clamp thumb screws, (1) handle clamp clevis pin, (1) handle clamp hitch pin, (1) handle clamp adjustment screw, (10) replacement flints, (4) B140A copper shims, (5) B1331L tinned copper sleeves, and (5) B1332Q tinned copper sleeves

#### Part Number

K158A

## BATTING/PACKING MATERIAL

### FEATURED HIGHLIGHTS

- Preformed ceramic packing material
- Seals mold conductor openings
- Prevents welding material leakage
- See Cadweld mold requirements for specific batting part number

## GALVANIZING BAR

### FEATURED HIGHLIGHTS

- Used to repair a galvanized surface that has been damaged by welding or drilling
- Low-temperature self-fluxing material
- The bar may be melted using the heat produced after making a Cadweld connection, or a small torch may be used

Part Number	Material
T319	Zinc Alloy

## GALVANIZING SPRAY

### FEATURED HIGHLIGHTS

- Easy-to-use galvanizing paint in a spray can
- Used to touch up heat affected areas on galvanized steel surfaces after welding

Part Number	Unit Weight
T372A	1 lb

## HAMMER DIE

### FEATURED HIGHLIGHTS

- Hardened steel die
- Used to form the end of a field-made bond
- Formed end designed to fit specific Cadweld mold

Material: Steel

Part Number	Conductor Size	nVent ERICO Sleeve
<b>Type: Grounding</b>

## MOLD SEALER

### FEATURED HIGHLIGHTS

- Ideal for sealing hot or cold molds to retard leakage from large stranded conductors
- Prolongs useful mold life when the cable opening becomes worn
- Required on certain Cadweld molds such as Types HA, HB, HC, VG and VN

Part Number	Unit Weight
T403	2 lb

## FLINT IGNITOR

### FEATURED HIGHLIGHTS

- Used to ignite the starting material when making a traditional Cadweld connection or a nVent LENTON Cadweld rebar connection

Part Number
T320

## REPLACEMENT FLINT

### FEATURED HIGHLIGHTS

- Replacement flints for T320 Flint Ignitor

Part Number	Standard Packaging Quantity
T320A	10 pc

## FLINT IGNITOR EXTENSION

### FEATURED HIGHLIGHTS

- Attaches to T320 Flint Ignitor and allows the installer to be approximately 30" (762 mm) away from the mold
- Ideal for applications such as making a mold in a narrow trench while the installer is at ground level

Part Number
B32130

## CADWELD PLUS CONTROL UNIT

### FEATURED HIGHLIGHTS

- Battery-powered controller box designed for 600 connections with one set of batteries
- Requires no special batteries or charger
- Comes standard with high temperature lead
- Connects to the welding material ignition strip with a custom made, purpose-designed termination clip
- Sends a predetermined voltage to the ignition strip and initiates the reaction
- PBPLUSCU meets AREMA® C&S Manual Recommendations; Part 8.1.34, 2013

Part Number	Cable Length	Batteries	Working Temperature	Certifications
<b>Type: Controller Box with Leads</b>				
PBPLUSCU	6'	8 Lithium AA Batteries	-40 to 140 °F	cURus
PLUSCU	6'	8 Standard AA Batteries	0 – 130 °F	cURus, NOM
PLUSCU15L	15'	8 Standard AA Batteries	0 – 130 °F	cURus
<b>Type: Replacement Leads Only</b>				
PLUSCULD15QC	15'			
PLUSCULDQC	6'			

## BATTERY PACK

### FEATURED HIGHLIGHTS

- Battery, charger, and carrying case required for the ignition of Cadweld Exolon welding material
- Battery operates approximately 200 connections before requiring a recharge
- Charger, all electrical connections and instructions are included in the battery case

**Part Number**

XLB971A1

## CARD CLOTH BRUSH

### FEATURED HIGHLIGHTS

- Aids in removing oxides from conductor surfaces
- Made of short, stiff bristles
- Generally preferred for cleaning concentric conductors and busbars which are not heavily oxidized

#### Part Number

T313

## WIRE BRUSH

### FEATURED HIGHLIGHTS

- Aids in removing oxides from conductor surfaces
- Useful for cleaning coarse or very dirty conductors

#### Part Number

#### Product

T314	Brush with Replaceable Brush Heads
T314A	Replacement Brush Heads
T336	Standard Brush

## MOLD CLEANING BRUSH

### FEATURED HIGHLIGHTS

- Ideal for cleaning Cadweld molds
- Soft bristles minimize wear of graphite during the cleaning process
- Removes slag and particles from mold cavity, tap hole, crucible and cover

Part Number	Type
T302A	Wide
T394	Narrow

## MOLD CLEANER

### FEATURED HIGHLIGHTS

- Used to remove the slag from the crucible area of the mold after making a Cadweld connection

Part Number	Mold Type
B136A	Most Cadweld molds using #65 welding material and smaller
B136B	Most Cadweld molds using #90 welding material and larger
B136D	Most Cadweld rail bond molds
B136E	Specific Cadweld molds only (See mold requirements to determine need)
B136F	Specific Cadweld molds only (See mold requirements to determine need)

## CADWELD TOOL KIT

### FEATURED HIGHLIGHTS

- Convenient tool kits for Cadweld connection installations

Part Number	Product
T315	Standard Kit
T315A	Complete Kit
T343	Heavy-Duty Kit
T343R	Heavy-Duty Kit with Rasp

## TORCH HEAD

### FEATURED HIGHLIGHTS

- Self-igniting propane torch head
- Squeezing the control knob produces an instant flame; releasing it extinguishes the flame
- No flame adjusting
- Burn tip remains cool during normal use
- Operates on its side or upside down
- Can withstand 60 MPH (96 KPH) winds without flareout
- Fits all standard 14.1 and 16.4 ounce (400 and 465 gram) propane cylinders

Part Number
-------------

T111

## TOOL BOX

### FEATURED HIGHLIGHTS

- Metal box with removable tote tray
- Recommended for carrying tools, molds, welding material and propane torch used to make Cadweld connections

Part Number	Length	Width	Height
T396	19"	7"	7 1/2"

## TOOL TRAY

### FEATURED HIGHLIGHTS

- Ideal for carrying one or two molds, welding material, propane torch and tools

Part Number
T331

## RASP

### FEATURED HIGHLIGHTS

- Used to remove rust from steel surfaces or to remove galvanizing from hot dipped galvanized steel to expose the bare steel for welding
- Curved blade makes it an efficient tool for flat surfaces

Part Number	Product
T321	Rasp
T321A	Replacement Blade

**WELDING TRAY**

**FEATURED HIGHLIGHTS**

- Recommended when using Cadweld overhead or over expensive equipment
- Designed to contain a potential spill of molten weld metal

Part Number	Height	Length	Width
XLB974B2	3 1/4"	13 1/4"	7"

**CERAMIC BLANKET**

**FEATURED HIGHLIGHTS**

- Woven ceramic blanket that can be used to hold a hot mold or keep the work surface free of slag when cleaning the mold

Part Number
T306

## SAFETY GLASSES

---

Material: Polycarbonate

**Part  
Number**

T393

---

As with all tasks, nVent ERICO recommends users consider safety first when making Cadweld connections and wear appropriate safety equipment.

### FEATURED HIGHLIGHTS

- Provides protection against moderate impact hazards
- May be worn separately or over prescription glasses

## CANVAS GLOVE WITH LEATHER PALM

---

**Part  
Number**

T378L

---

As with all tasks, nVent ERICO recommends users consider safety first when making Cadweld connections and wear appropriate safety equipment.

### FEATURED HIGHLIGHTS

- Heavy canvas gloves with leather palms
