

COOLX[®]1000

FANLESS, INTELLIGENT 1000 W MODULAR POWER SUPPLIES

Advanced Energy's CoolX[®]1000 series, part of our low voltage solutions, is the world's only fanless 1000 W modular power supply. Packaged in a compact 254 mm x 165.1 mm x 39.1 (10 in x 6.5 in x 1U) U-channel design, the CoolX1000 provides up to 1000 W without any requirement for fan or base plate cooling, eliminating acoustic noise detrimental to scientific and medical applications, as well as applications sensitive to vibration or where fan cooling is not available. The CoolX1000 also offers increased flexibility by allowing system designers to monitor and control power supply performance — essential for staving off process disruption — using either analog or digital communications (PMBus[™]).

¹ Full dynamic specifications may not be met at full load when output voltage is trimmed by above 13 V

² Max trim 14 V when used with high power module

³ Max trim 56 V when used with high power module

⁴ a) Only one high power module (CmE or CmF) can be used per CoolPac.

b) During load transients starting from 0% load on the High Power modules, other modules in the CoolPac may experience an output voltage dynamic during the load change. Contact applications support for details or support.

⁵ For the CmG module, the max combined power of both outputs is 120 W

⁶ For the CmH module, the max combined power of both outputs is 100 W
